Science Without Unity Reconciling The Human And Natural Sciences The Persistence Of Reality Volume :

Mead and Merleau-Ponty Sandra B. Rosenthal, Patrick L. Bourgeois, 1991-10-04 This book unites George Herbert Mead and Maurice Merleau Ponty in a shared rejection of substance philosophy as well as spectator theory of knowledge in favor of a focus on the ultimacy of temporal process and the constitutive function of social praxis Both Mead and Merleau Ponty return to the richness of lived experience within nature and both lead to radically new insightful visions of the nature of selfhood language freedom and time itself as well as of the nature of the relation between the so called tensions of appearance and reality sensation and object the individual and the community freedom and constraint and continuity and creativity

Naked Science Laura Nader, 2014-01-02 Naked Science is about contested domains and includes different science cultures physics molecular biology primatology immunology ecology medical environmental mathematical and navigational domains While the volume rests on the assumption that science is not autonomous the book is distinguished by its global perspective Examining knowledge systems within a planetary frame forces thinking about boundaries that silence or affect knowledge building Consideration of ethnoscience and technoscience research within a common framework is overdue for raising questions about deeply held beliefs and assumptions we all carry about scientific knowledge We need a perspective on how to regard different science traditions because public controversies should not be about a glorified science or a despicable science

The Persistence of Reality Joseph Margolis, 1986 *Human Ecology And Climatic Change* David L. Peterson, Darryll R. Johnson, 2020-03-06 The Far North a land of extreme weather and intense beauty is the only region of North America whose ecosystems have remained reasonably intact Humans are newcomers there and nature predominates As is widely known recent changes in the Earth's atmosphere have the potential to create rapid climatic shifts in our life time and well into the future These changes a product of southern industrial society will have the greatest impact on ecosystems at northern latitudes which until now have remained largely undisturbed In this fragile balance as terrestrial and aquatic habitats change animal and human populations will be irrevocably altered

Merleau-Ponty Vivant M. C. Dillon, 1991-08-06 The essays in this volume situate Merleau Ponty's thinking in the last decade of the twentieth century both with regard to general context and with regard to specific themes These are original contributions which reconfigure traditional patterns of thought by means of a plurality of styles which reflect each author's response to Merleau Ponty's incomplete vision The text opens with a new vision of space and proceeds to reorient traditional structures of thinking in ethics psychology political theory axiology language theory metaphysics textuality semiology and aesthetics Through this procession one witnesses currently emerging views of subjectivity objectivity location locution and personal style as these themes have evolved through the deconstructive critique Contributors include Edward S Casey Duane H Davis David Michael Levin Alphonso Lingis G B Madison Joseph Margolis Hugh J Silverman and Jacques Taminiaux
