Child Left Behind legislation **Teaching with the Common Core Standards for English Language Arts, PreK-2** Lesley Mandel Morrow, Timothy Shanahan, Karen K. Wixson, 2012-11-29 Nearly every state has independently adopted the Common Core State Standards CCSS making this practical guide an indispensable resource for PreK-2 teachers and teachers in training. Leading authorities explain each of the English language arts ELA standards and vividly show how to implement them. The book is filled with grade-specific classroom vignettes, instructional strategies, and activities, sample lesson plans, and discussion questions. Chapters cover the major ELA strands: reading, literature, informational texts, and foundational skills; writing, speaking, and listening; and language. Issues of assessment and technology integration are also explored. An appendix includes thematic units for each grade level demonstrating ways to embed CCSS ELA standards into content area instruction. See also *Teaching with the Common Core Standards for English Language Arts, Grades 3-5* **Creating Literacy Communities as Pathways to Student Success** Jessica Singer Early, Christina Saidy, 2018-10-04 *Creating Literacy Communities as Pathways to Student Success* offers a model for using literacy as a pathway for secondary students to explore fields from which they are often systematically excluded. In particular, this volume demonstrates how access for young Latina students to STEM-related fields can be bolstered through engagement with mentors in writing and reading programs. Written for pre- and in-service teachers as well as scholars across disciplines, this book aims to reconceptualize the ways in which writing can best serve ethnically and linguistically diverse students, especially girls. **Start Young!** Shannan McNair, 2006 You asked for it, now you've got it! In a focus group at a recent NSTA convention, teachers of prekindergarten through second grade clamored for help. They don't want easy-to-do science activities they can use for everyday teaching. But they don't want to be forced to adapt material meant for older children. So here's the solution: *Start Young!* offers a wealth of simple educational activities designed to use right away with even the littlest scientists. The book includes a chapter of helpful background on the latest thinking about effective ways to introduce science in early childhood. But the bulk of the book is two dozen articles compiled from *Science Children*, NSTA's award-winning journal for elementary school teachers.

Teacher Research Deborah Roberts, Claire Bove, 2007 If you're a science teacher, this collection will show you paths that others have found to deepen their understanding of the philosophy and practice of teacher research. If you're a science teacher educator, it will give you examples about the many ways in-service teachers can conduct inquiry. Either way, *Teacher Research* provides a memorable passage into learning and growing. **Exemplary Science in Grades PreK-4** Robert Eugene Yager, 2006 The 14 programs are real-life examples you can learn from in carrying out reforms in teaching, assessment, professional development, and content. When both teachers and students are enthused, curious, and involved, science becomes central to the lives of students. *Beyond the Science Fair* Wendy Saul, 2005 It's time to rethink the traditional science fair with its tired, tri-fold posters and first-prize ribbons. It's time to create an event where children share the results of authentic, personally meaningful explorations with one another rather than compete for adults' praise and
