Sciences De La Terre Tectonique 2:

L'évolution des idées en géologie Bernard Balan, 2011 Alors que l'intérêt primordial pour la Terre notre demeure s'est d'abord traduit par des spéculations mythiques et philosophiques sur l'origine du monde dont elle occupait le centre la rencontre au XVIII^e siècle entre l'Art des Mines et l'Histoire Naturelle des Minéraux à laquelle se rattachait la Géographie Physique a fait du globe terrestre envisagé dans sa profondeur un nouveau domaine de recherche positive Mais entre ce moment initial et son accès récent au rang de science la Géologie a connu une longue période de gestation au cours de laquelle l'interprétation des résultats obtenus sur le terrain nous fait assister à une confrontation permanente entre les cosmogonies imaginaires avec leurs séquelles et la volonté de parvenir à l'explication objective des phénomènes observés

Seismic Ground Motion in Large Urban Areas Giuliano F. Panza, Ivanka Pakaleva, Concettina Nunziata, 2012-12-06 The accelerated and often uncontrolled growth of the cities has contributed to the ecological transformation of their immediate surroundings Factors contributing to the urban vulnerability include lowering or rising of the water table subsidence loss of bearing capacity of soil foundations and instability of slopes Recent catastrophic earthquakes highlight the poor understanding by decision makers of seismic related risk as well as the tendency of some builders to use the cheapest designs and construction materials to increase short term economic returns on their investment Losses from earthquakes will continue to increase if we do not shift towards proactive solution Disaster reduction is both an issue for consideration in the sustainable development agenda and a cross cutting issue relating to the social economic environmental and humanitarian sectors As location is the key factor which determines the level of risk associated with a hazard land use plans and mapping should be used as tools to identify the most suitable usage for vulnerable areas *Encyclopedia of Library and Information Science* Allen Kent, Harold Lancour, Jay E.
