Ogburn, Alexander Goldenweiser, 1927 [Social Science Quotations](#) Robert Merton, 2018-04-27 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline

Wilbur, 2014-08-13 The annual Conferences on Value Inquiry bring together philosophers scientists and humanists to discuss the many facets of the problem of value in the experience of the individual and in contemporary society

One of the criteria in choosing papers for the Conference is the ability to stimulate discussion and clarification The papers in the present volumes show deep concern with the problems and responsibilities in making choices of value **Non-humans in Social Science** Petr Gibas,Karolína Pauknerová,Marco Stella,2012-04-01 Ideas of dead inert space non living machinelike reflexive controlled bodies and passive meaningless things are very modern At the very heart of the program of modernity resource exploitation and consumption is the idea that non humans have no agency they are simply resources to be manipulated and exploited at our will Mostly leaving aside the more and more evident ethical concerns of this worldview and this setting of the human non human boundary this volume attempts to explore what social sciences have to say about the relationship between the human and non human The intention of this book is to offer a non human perspective We realize that it is sometimes difficult to say whether the outcome of such a perspective would be just a shallow tendency to anthropomorphize or whether we could reach some of the previously unseen properties of non humans Being aware of the dangers this volume puts together different case studies that are more or less inspired by this non human perspective The aim is to explore what has been for a long time put aside and to provide new insights new revelations that can lead social science to undiscovered or hidden realms The outcome of this thrilling adventure can in the end be a discovery that the role of natural and social sciences or even more the character of the nature culture dichotomy would have to be re evaluated
