Mobility, Data Mining and Privacy Fosca Giannotti, Dino Pedreschi, 2008-01-12 Mobile communications and ubiquitous computing generate large volumes of data Mining this data can produce useful knowledge yet individual privacy is at risk This book investigates the various scientific and technological issues of mobility data open problems and roadmap The editors manage a research project called GeoPKDD Geographic Privacy Aware Knowledge Discovery and Delivery and this book relates their findings in 13 chapters covering all related subjects

Geospatial Web Services: Advances in Information Interoperability Zhao, Peisheng, Di, Liping, 2010-12-31 As Web service technologies have matured in recent years an increasing number of geospatial Web services designed to deal with spatial information over the network have emerged Geospatial Web Services Advances in Information Interoperability provides relevant theoretical frameworks and the latest empirical research findings and applications in the area This book highlights the strategic role of geospatial Web services in a distributed heterogeneous environment and the life cycle of

geospatial Web services for building interoperable geospatial applications **R-Trees: Theory and Applications** Yannis Manolopoulos, Alexandros Nanopoulos, Apostolos N. Papadopoulos, Yannis Theodoridis, 2010-09-08 Space support in databases poses new challenges in every part of a database management system the capability of spatial support in the physical layer is considered very important This has led to the design of spatial access methods to enable the effective efficient management of spatial objects R trees have a simplicity of structure together with their resemblance to the B tree allow developers to incorporate them easily into existing database management systems for the support of spatial query processing This book provides an extensive survey of the R tree evolution studying the applicability of the structure its variations to efficient query processing accurate proposed cost models implementation issues like concurrency control and parallelism Written for database researchers designers programmers as well as graduate students this comprehensive monograph will be a welcome addition to the field Progressive Methods in Data Warehousing and Business Intelligence: Concepts and Competitive Analytics Taniar, David, 2009-02-28 Provides developments and research as well as current innovative activities in data warehousing and mining focusing on the intersection of data warehousing and business intelligence Moving Objects Management Xiaofeng Meng, Jidong Chen, 2011-01-27 We live in an age of rapid technological development The Internet already affects our lives in many ways Indeed we continue to depend more and more intrinsically on the Internet which is increasingly becoming a fundamental piece of societal infrastructure just as water supply electricity grids and transportation networks have been for a long time But while these other infrastructures are relatively static the Internet is undergoing swift and fundamental change Notably the Internet is going mobile The world has some 6.7 billion humans 4 billion mobile phones and 1.7 billion Internet users The two most populous continents Asia and Africa have relatively low Internet penetration and hold the greatest potentials for growth Their mobile phone users by far outnumber their Internet users and the numbers are growing rapidly China and India are each gaining about half a dozen million new phone users per month Users across the globe as a whole increasingly embrace mobile Internet devices with smart phone sales are starting to outnumber PC sales Indeed these and other facts suggest that the Internet stands to gain a substantial mobile component This mega trend towards mobile is enabled by rapid and continuing advances in key technology areas such as mobile communication consumer electronics g positioning and computing In short this is the backdrop for this very timely book on moving objects by Xiaofeng Meng and Jidong Chen **Generalized Jeffrey Conditionalization** Dirk Draheim, 2017-11-06 This book provides a frequentist semantics for conditionalization on partially known events which is given as a straightforward generalization of classical conditional probability via so called probability testbeds It analyzes the resulting partial conditionalization called frequentist partial F P conditionalization from different angles i.e. with respect to partitions segmentation independence and chaining It turns out that F P conditionalization meets and generalizes Jeffrey conditionalization i.e. from partitions to arbitrary collections of events opening it for reassessment and a range of potential

applications A counterpart of Jeffrey's rule for the case of independence holds in our frequentist semantics This result is compared to Jeffrey's commutative chaining of independent updates The postulate of Jeffrey's probability kinematics which is rooted in the subjectivism of Frank P Ramsey is found to be a consequence in our frequentist semantics This way the book creates a link between the Kolmogorov system of probability and one of the important Bayesian frameworks Furthermore it shows a preservation result for conditional probabilities under the full update range and compares F P semantics with an operational semantics of classical conditional probability in terms of so called conditional events Lastly it looks at the subjectivist notion of desirabilities and proposes a more fine grained analysis of desirabilities a posteriori This book appeals to researchers who are involved in any kind of knowledge processing systems F P conditionalization is a straightforward fundamental concept that fits human intuition and is systematically linked to one of the important Bayesian frameworks As such the book is interesting for anybody investigating the semantics of reasoning systems Handbook of Research on Geoinformatics Karimi, Hassan A.,2009-01-31 This book discusses the complete range of contemporary research topics such as computer modeling geometry geoprocessing and geographic information systems Provided by publisher **Mining of Data with Complex Structures** Fedja Hadzic, Henry Tan, Tharam S. Dillon,2011-01-30 Mining of Data with Complex Structures Clarifies the type and nature of data with complex structure including sequences trees and graphs Provides a detailed background of the state of the art of sequence mining tree mining and graph mining Defines the essential aspects of the tree mining problem subtree types support definitions constraints Outlines the implementation issues one needs to consider when developing tree mining algorithms enumeration strategies data structures etc Details the Tree Model Guided TMG approach for tree mining and provides the mathematical model for the worst case estimate of complexity of mining ordered induced and embedded subtrees Explains the mechanism of the TMG framework for mining ordered unordered induced embedded and distance constrained embedded subtrees Provides a detailed comparison of the different tree mining approaches highlighting the characteristics and benefits of each approach Overviews the implications and potential applications of tree mining in general knowledge management related tasks and uses Web health and bioinformatics related applications as case studies Details the extension of the TMG framework for sequence mining Provides an overview of the future research direction with respect to technical extensions and application areas The primary audience is 3rd year 4th year undergraduate students Masters and PhD students and academics The book can be used for both teaching and research The secondary audiences are practitioners in industry business commerce government and consortiums alliances and partnerships to learn how to introduce and efficiently make use of the techniques for mining of data with complex structures into their applications The scope of the book is both theoretical and practical and as such it will reach a broad market both within academia and industry In addition its subject matter is a rapidly emerging field that is critical for efficient analysis of knowledge stored in various domains **Partitional Clustering Algorithms** M. Emre Celebi,2014-11-07 This book focuses

on partitional clustering algorithms which are commonly used in engineering and computer scientific applications The goal of this volume is to summarize the state of the art in partitional clustering The book includes such topics as center based clustering competitive learning clustering and density based clustering Each chapter is contributed by a leading expert in the field

Scientific Data Management Arie Shoshani,Doron Rotem,2009-12-16 Dealing with the volume complexity and diversity of data currently being generated by scientific experiments and simulations often causes scientists to waste productive time Scientific Data Management Challenges Technology and Deployment describes cutting edge technologies and solutions for managing and analyzing vast amounts of data helping

Connecting a Digital Europe Through Location and Place Joaquín Huerta,Sven Schade,Carlos Granell,2014-05-17 This book collects innovative research presented at the 17th Conference of the Association of Geographic Information Laboratories for Europe AGILE on Geographic Information Science held in 2014 in Castell n Spain The scientific papers cover a variety of fundamental research topics as well as applied research in Geospatial Information Science including measuring spatiotemporal phenomena crowdsourcing and VGI geosensor networks indoor navigation spatiotemporal analysis modeling and visualization spatiotemporal decision support digital earth and spatial information infrastructures The book is intended for researchers practitioners and students working in various fields and disciplines related to Geospatial Information Science and technology
