Wilson, 2023-11-06 First published in 1984 Tradition and Innovation by viewing Western civilization as a culture puts the common perspectives of our major Western institutions in bolder relief The author shows how the institutionalization of central modes of Western rationality found in capitalism industrialization science science based technology bureaucracy the rule of law the social and behavioral sciences has created a culturally and historically unique form of collective life advanced industrial society Indicative of this development is the nature and meaning of the so called innovative society itself where rationality is increasingly seen to repose in institutions and organized structures rather than in individuals Professor Wilson argues that this rationality is becoming traditionalized as a central artifact of our form of life one which believes in the independent existence of the facts of life This is borne out by the increasing autonomy of what professor Wilson calls disembodied disciplined observation determined as it is to annihilate contemplation and reflection in its effort to reconstitute practice in its own image This is an interesting read for students of sociology political science public administration and social science in general **University Leadership and Public Policy in the Twenty-First Century** Peter

MacKinnon, 2015-01-15 Canadian universities face a complicated and uncertain future when it comes to funding governance and fostering innovation Their leaders face an equally complicated future attempting to balance the needs and desires of students faculty governments and the economy Drawing on more than a decade of service as president of one of Canada s

major research universities Peter MacKinnon offers an insider's perspective on the challenges involved in bringing those constituencies together in the pursuit of excellence Clear contentious and uncompromising University Leadership and Public Policy in the Twenty First Century offers a unique and timely analysis of the key policy issues affecting Canada's university sector Covering topics such as strategic planning tuition policy labour relations and governance MacKinnon draws on his experience leading the University of Saskatchewan to argue that Canadian universities must embrace competitiveness and change if they are to succeed in the global race for talent
