Scientific Theology Vol 3 Theory:

A Scientific Theology Alister E. McGrath, 2003 Written by Alister McGrath one of the world's best known theologians these volumes present the most extended and systematic exploration of the relation between Christian theology and the natural sciences ever undertaken Thoroughly ecumenical in approach A Scientific Theology is a significant work for Catholic Orthodox and Protestant readers Each volume is marked throughout by a sustained critical engagement with the history and philosophy of the natural sciences and by a passionate commitment to the legitimacy of theology as an academic discipline Volume 3 provides a fresh evaluation of the origins and place of theory in Christian theology Dealing with the question of how reality is represented in Christian theology and the natural sciences theory is understood as a response to experienced reality a communal beholding of reality Against those who might favor a non dogmatic Christianity McGrath argues that the Christian community is under an intellectual obligation to give an account of what it corporately beholds The many theoretical issues addressed in this volume include the manner in which closure is secured in theological theorizing the problem of reductionism in theoretical analysis the explanatory dimensions of theology the implications of the stratification of reality for its representation the place of metaphysics in Christian theology and the nature of revelation itself Book jacket

Scientific Theology: Theory Alister E. McGrath, 2006-11-23 Noting the important parallels between scientific theory and Christian doctrine McGrath offers a sustained defense of the necessity of doctrine within Christian theology against those who argue for a non dogmatic Christianity The approach developed within this volume builds on the work of writers such as Heidegger and Habermas and argues that theory is to be conceived in terms of the communal beholding of reality The many theoretical issues to be addressed in this volume include the manner in which closure is secured in theological theorizing the implications of the stratification of reality for its representation the place of metaphysics in Christian theology and the nature of revelation itself Viewed as a whole Theory represents a fresh evaluation of the origins and place of theory in Christian theology which is certain to provoke discussion and debate This third volume completes the A Scientific Theology series A Scientific Theology is a groundbreaking work of systematic theology in three volumes Nature Reality and Theory Now available as a three volume set Scientific Theology: Theory Alister E. McGrath, 2007-01-23 The third volume of an

extended and systematic exploration of the relation between Christian theology and the natural sciences focussing on the origins and place of theory in Christian theology God, Humanity and the Cosmos - 3rd Edition Christopher Southgate, 2011-12-15 **Our Common Cosmos** Zoë Lehmann Imfeld, Andreas Losch, 2018-12-27 This volume collects an international body of voices as a timely response to a rapidly advancing field of the natural sciences The contributors explore how the disciplines of theology earth and space sciences contribute to the debate on constantly expanding ethical challenges and the prospect of humanity's future The discussions offered in this volume see the community as central to a sustainable and ethical approach to earth and space sciences examining the role of theology in this communal approach but also

recognizing theology itself as part of a community of humanity disciplines Examining the necessity for interaction between disciplines this collection draws on voices from biodiversity studies geology aesthetics literature astrophysics and others to illustrate precisely why a constructive and sustainable dialogue is needed within the current scientific climate Persons, Powers, and Pluralities Eric G Flett, 2012-05-31 Through an intimate conversation with the writings of Thomas F Torrance Flett articulates a Trinitarian theology of culture Torrance s work suggests that Christian assumptions in the areas of God creation and humanity had an important influence upon the development of Western scientific culture This book develops each of these areas of Torrance s thought in order to articulate a theology of culture rooted in a Christian understanding of God as triune creation as contingent and human persons as stewards created in the image of God Drawn together these three areas of Torrance s thought suggest that human culture and cultural plurality ultimately originate in the creative action of a triune God mediated through the creative activity of the human creature as it engages a contingent created order in its attempts to foster human flourishing and to bear embodied witness to its Creator The result is not only a unique contribution to the emerging secondary material on Torrance s work but also a contribution to the field of theology of culture as a systematic locus in its own right *Ramified Natural Theology in Science and Religion* Rodney Holder, 2020-10-15 This book offers a rationale for a new ramified natural theology that is in dialogue with both science and historical critical study of the Bible Traditionally knowledge of God has been seen to come from two sources nature and revelation However a rigid separation between these sources cannot be maintained since what purports to be revelation cannot be accepted without qualification rational argument is needed to infer both the existence of God from nature and the particular truth claims of the Christian faith from the Bible Hence the distinction between bare natural theology and ramified natural theology The book begins with bare natural theology as background to its main focus on ramified natural theology Bayesian confirmation theory is utilised to evaluate competing hypotheses in both cases in a similar manner to that by which competing hypotheses in science can be evaluated on the basis of empirical data In this way a case is built up for the rationality of a Christian theist worldview Addressing issues of science theology and revelation in a new framework this book will be of keen interest to scholars working in Religion and Science Natural Theology Philosophy of Religion Biblical Studies Systematic Theology and Science and Culture **Enlightened Common Sense** Roy Bhaskar, 2016-07-01 Since the 1970s critical realism has grown to address a range of subjects including economics philosophy science and religion It has become a complex and mature philosophy Enlightened Common Sense The Philosophy of Critical Realism looks back over this development in one concise and accessible volume The late Roy Bhaskar was critical realism s philosophical originator and chief exponent He draws on a lifetime s experience to give a definitive systematic account of this increasingly influential international and multidisciplinary approach Critical realism s key element has always been its vindication and deepening of our understanding of ontology Arguing that realist ontology is inexorable in knowledge and action Bhaskar sees this as the key to a new enlightened

common sense From the definition of critical realism and its applicability in the social sciences to explanation of dialectical critical realism and the philosophy of metaReality this is the essential introduction for students of critical realism

Creation and Humanity Veli-Matti Karkkainen,2015-03-26 The third installment in a wide and deep constructive theology for our time This third volume of Veli Matti Karkkainen s ambitious five volume theology project develops a Christian theology of creation and humanity theological anthropology in dialogue with the Christian tradition with contemporary theology in all its global and contextual diversity and with other major living faiths Judaism Islam Buddhism and Hinduism In constructing his theology of creation and humanity Karkkainen uniquely engages the natural sciences including physical cosmological and neuroscientific theories He devotes particular attention to the topics of divine action in a world subjected to scientific study environmental pollution human flourishing and the theological implications of evolutionary theory with regard to both cosmos and humanity

The Intelligent Design Debate and the Temptation of Scientism Erkki Vesa Rope Kojonen,2016-04-28 The controversy over Intelligent Design ID has now continued for over two decades with no signs of ending For its defenders ID is revolutionary new science and its opposition is merely ideological For its critics ID is both bad science and bad theology But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides A balanced and deep analysis of a controversial debate this volume argues that beliefs about the purposiveness or non purposiveness of nature should not be based merely on science Rather the philosophical and theological nature of such questions should be openly acknowledged

A Critical Realist Perspective of Education Brad Shipway,2010-07-20 Explores the capability of critical realism to throw light on educational theory This book investigates the convergence and divergence between two forms of critical realism It outlines the key characteristics that are necessary for a theological position to claim the term critical realist

Science of God Kevin J. Sharpe,2006 Is theology responsible to tradition or new insight Institutional church or humanity at large Spiritual or everyday existence Revelation or scientific findings In his new book *Science of God Truth in the Age of Science* Kevin Sharpe proposes a method for doing theology which does not divorce it from the practical applications of science Not only does this work establish that theology ought to be empirical in what it says about the world and God s relationship to it but it also outlines a clear method for doing this Science and theology can each share the same empirical method when each attempts a description of any part of reality it is relying on its own essential assumptions or lens When applied to theology the method assumes the existence of God and then seeks the nature of God using falsifiable and verifiable techniques Starting with the sciences that examine happiness particularly biology genetics psychology and social psychology *Science of God* seeks to understand the spiritual nature of humans and through it the nature of God

Science and Theology James K. Dew,2011-01-17 Alister McGrath s work on the relationship between Science and Theology makes the most notable contribution to the subject written by an evangelical in recent history McGrath holds earned doctorates in both science and theology and his three volume set *A Scientific*

Theology is the culmination of three decades of his work on the subject In this book James K Dew explores McGrath s contribution to the issue and highlights the benefits of adopting a critical realist perspective such as his own In particular Dew argues that McGrath s approach helps establish a unified theory of knowledge and holds significant advantages for scientists and theologians alike

Theology in Transposition

Myk Habets,2013-11-01 T F Torrance was one of the most significant English language theologians of the twentieth century known extensively for his curatorship of the English translation of Barths Church Dogmatics but also for his own prodigious theological scholarship The complexity and astonishing breadth of Torrances output however have made assessment and appropriation markedly difficult This volume seeks to rectify that lack of assessment through careful exposition of the vital centers and interconnections within Torrances theology alongside constructive appraisal and critique of his contributions to contemporary theology

Key Theological Thinkers Svein Rise,2016-04-22 The 20th and 21st Centuries have been characterized by theologians and philosophers rethinking theology and revitalizing the tradition This unique anthology presents contributions from leading contemporary theologians including Rowan Williams Fergus Kerr Aidan Nichols G R Evans and Tracey Rowland who offer portraits of over fifty key theological thinkers in the modern and postmodern era Distinguished by its broad ecumenical perspective this anthology spans arguably one of the most creative periods in the history of Christian theology and includes thinkers from all three Christian traditions Protestant Catholic and Orthodox Each individual portrait in this anthology includes a biographical introduction an overview of theological or philosophical writing presentation of key thoughts and contextual placing of the thinker within 20th Century religious discourse Overview articles explore postmodern theology radical orthodoxy ecumenical theology feminist theology and liberation theology A final section includes portraits of important thinkers who have influenced Christian thought from other fields not least from Continental philosophy and literature

Beyond

Evangelicalism Steven Knowles,2016-12-05 A prolific author and thinker Stanley J Grenz was a respected and influential figure not only within evangelicalism but in the wider theological world Amongst the many issues tackled by him it is perhaps his revisioning of evangelical theology in the light of the postmodern challenge that has caused the biggest stir in the theological world Advocating a nonfoundationalist methodology Grenz attempts to re position evangelical theology in line with postmodern concerns This work examines the main traits of postmodern thought that would seem to directly challenge how evangelical theology is traditionally done An examination of the seminal influences on Grenz will be traced in order to understand more fully the position he takes A rigorous critique and assessment of his theological methodology will follow with the conclusion that his work goes beyond evangelicalism This will be the first book length treatment on Grenz s work on theological methodology and therefore will break new ground in this important area of study

Theologically Engaged

Anthropology J. Derrick Lemons,2018-08-23 After years of discussion within the field of anthropology concerning how to properly engage with theology a growing number of anthropologists now want to engage with theology as a counterpart in

ethnographic dialogue Theologically Engaged Anthropology focuses on the theological history of anthropology illuminating deeply held theological assumptions that humans make about the nature of reality and illustrating how these theological assumptions manifest themselves in society This volume brings together leading anthropologists and theologians to consider what theology can contribute to cultural anthropology and ethnography It provides anthropologists and theologians with a rationale and framework for using theology in anthropological research

Flat Earths and Fake Footnotes Derrick Peterson, 2021-02-17 We are all haunted by histories They shape our presuppositions and ballast our judgments In terms of science and religion this means most of us walk about haunted by rumors of a long war However there is no such thing as the history of the conflict of science and Christianity and this is a book about it In the last half of the twentieth century a sea change in the history of science and religion occurred revealing not only that the perception of protracted warfare between religion and science was a curious set of mythologies that had been combined together into a sort of supermyth in need of debunking It was also seen that this collective mythology arose in the nineteenth and twentieth centuries by historians involved in many sides of the debates over Darwin's discoveries and from there latched onto the public imagination at large Flat Earths and Fake Footnotes takes the reader on a journey showing how these myths were constructed collected together and eventually debunked Join us for a story of flat earths and fake footnotes to uncover the strange tale of how the conflict of science and Christianity was written into history

The Merging of Theology and Spirituality Larry S. McDonald, 2006-07-29 While acknowledging the inherent tension between evangelicals who emphasize theological propositions and those who emphasize personal experience Alister McGrath believes that spirituality represents the interface between ideas and life between Christian theology and human existence The book explores the centrality of McGrath's theology in the development of his views on spirituality McGrath does not approach spirituality from a theological void but instead uses his theological perspective as the foundation Through detailed examination of McGrath's previous work and the writing of other evangelicals *The Merging of Theology and Spirituality* offers an overview of a unique thinker's contributions and a guide for future theological and spiritual exploration

Dictionary of Critical Realism Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in the field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate

use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism
