Laura Cox Dzurec PhD PMHCNS BC Dean and Professor Kent State University College of Nursing. This appears to be the first book that focuses on the philosophy of science and its application to practice doctorates. The authors assume readers may not have a formal background in the philosophy of science and write in a conversational tone with a minimum of difficult terminology. They discuss the current state of DNP education in a way that can foster discourse and debate. Score 97.5 Stars Doody's Medical Reviews. Tailored for both DNP and PhD doctoral nursing programs, this text is the first to focus on philosophy of science applications to the discipline of nursing. The authors, a philosopher and a nurse scholar who co-teach the course upon which this volume is based, address a growing need for increased philosophy of science content in evolving DNP programs as well as practice-oriented research considerations for this discipline. The volume presents a creative use of the social, political, and historical content in which nursing has evolved. As a whole, this extremely important text reassures the student of the fluid and palpable connections between philosophy of science and nursing science and practice. Key Features: Explores the concept of nursing as a practice profession and assesses how much philosophy of science is needed for doctoral nursing students; Examines the practical application of the philosophy of science to both DNP and PhD students; Addresses the basic principles and concepts of the philosophy of science and their practical application for contemporary practice inquiry; Provides an overview of the century-long path to the development of nursing science that is an essential bridge to the philosophy of science content and serves as a next step towards building a nursing epistemology; Reinforces important connections between the philosophy of science to nursing science and nursing practice.
