Science on the Ropes Carlos Elías,2019-05-15 In this controversial essay Carlos Elías addresses the worldwide phenomenon that is threatening the scientific and economic progress of Western countries The rise and influence of magic and irrationality in the media in social networks and at universities is a disturbing phenomenon many Western students no longer want to pursue STEM Science Technologies Engineering and Math careers This lucid and well written book addresses one of the key issues of public debate the deteriorating state of science in Western countries and their governments and its rise in Asian countries The author compares two distinct models the Spanish or Latin model which closed the door on science with the Counter Reformation and that employed by a second group of countries where science was encouraged Elías suggests that a similar development could now be taking place between Western countries where the press television and social science academics are becoming increasingly critical towards science and Asia where most prime ministers and other politicians are scientists or engineers This book is intended for STEM educators both at secondary schools and universities scientists and academics interested in scientific culture in the era of fake news [Man in Revolt](#) Emil Brunner,2002 In the struggle of ideas the most fundamental and far reaching is that of the nature of mankind What are we Why are we not at peace with ourselves or our neighbours How does our understanding of our nature lead to personal and social well being We have followed the false leads of Darwin Nietzsche Marx and Freud in trying to understand ourselves Despite other differences they all interpret man in relation to nature rejecting transcendent metaphysical or religious understanding of the human condition They do not solve the contradiction between what we are and what we ought to be Brunner sees the human contradiction as comprehensible only in terms of a God to whose word we must respond This is not communication by language it refers to the fundamental character of personal relations People are persons in so far as they can freely say to each other what they think and feel This communication is possible in so far as we recognise that God speaks to us and respond to Him Brunner sees responsibility as the key to personality The Biblical doctrine of man created in the image of God and capable of responding to God s Word is the key to recovering an effective sense of responsibility With

profound penetration and power Brunner applies his thesis to such vexed questions as individuality and community character relations between man and woman relations between soul and body Man in Revolt explains our frustration and confusion about ourselves and why the Christian view of man of his place in nature and history is the truth which man both needs and seeks in the search for himself

Darwin the Writer George Levine, 2011-06-30 Charles Darwin's *On the Origin of Species* arguably the most important book written in English in the nineteenth century transformed the way we looked at the world It is usually assumed that this is because the idea of evolution was so staggeringly powerful Prize winning author George Levine suggests that much of its influence was due in fact to its artistry to the way it was written Alive with metaphor vivid descriptions twists hesitations personal exclamations and humour the prose is imbued with the sorts of tensions ambivalences and feelings characteristic of great literature Although it is certainly a work of science the *Origin* is equally a work of literature at home in the company of celebrated Victorian novels such as *Middlemarch* and *Bleak House* books that give us a unique yet recognisable sense of what the world is really like while not being literally true Darwin's enormous cultural success Levine contends depended as much on the construction of his argument and the nature of his language as it did on the power of his ideas and his evidence By challenging the dominant reading of his work this impassioned and energetic book gives us a Darwin who is comic rather than tragic ebullient rather than austere and who takes delight in the wild and fluid entanglement of things
