Excavations at Cill Donnain Mike Parker Pearson, Marek Zvelebil, 2014-06-30 The SEARCH Sheffield Environmental and Archaeological Research Campaign in the Hebrides project began in 1987 and covers the Scotland's Outer Hebrides The aim of the project is to investigate how human societies adapted in the long term to the isolated environment of the Outer Hebrides The first major excavation on South Uist discovered that what was thought to be a shell midden at Cill Donnain was in fact a wheelhouse a type of dwelling used in the period c 300 BC AD 500 under which lay the remains of a Bronze Age settlement This settlement was partly investigated by Marek Zvelebil in 1991 and then later by Mike Parker Pearson and Kate MacDonald in 2003 The site itself is situated at the foot of a high steep sided dune on the eastern edge of a large sand valley close to the western shore of Loch Cill Donnain The archaeological report of the excavation at the Cill Donnain wheelhouse shows that in comparison with contemporary neighbouring settlements it was unlikely that each was an independent unit and that they were linked by social and economic inter dependency The wheelhouse thus provides striking new evidence that contributes to developing theories about the social material and economic life in the period This volume presents the extensive archaeological evidence found at the site including pottery faunal remains and a variety of bone and metal tools illustrating that the Cill Donnain landscape is rich in archaeological sites of all periods from the Beaker to the post Medieval

Handbook of Paleontological Techniques Paleontological Society, 1965 [The Oxford Handbook of Later Medieval Archaeology in Britain](#) Christopher Gerrard, Alejandra Gutiérrez, 2018-01-11 The Middle Ages are all around us in Britain The Tower of London and the castles of Scotland and Wales are mainstays of cultural tourism and an inspiring cross section of later medieval finds can now be seen on display in museums across England Scotland and Wales Medieval institutions from Parliament and monarchy to universities are familiar to us and we come into contact with the later Middle Ages every day when we drive through a village or town look up at the castle on the hill visit a local church or wonder about the earthworks in the fields we see from the window of a train The Oxford Handbook of Later Medieval Archaeology in Britain provides an overview of the archaeology of the later Middle Ages in Britain between AD 1066 and 1550 61 entries divided into 10 thematic sections cover topics ranging from later medieval objects human remains archaeological science standing buildings and sites such as castles and monasteries to the well preserved relict landscapes which still survive This is a rich and exciting period of the past and most of what we have learnt about the material culture of our medieval past has

been discovered in the past two generations This volume provides comprehensive coverage of the latest research and describes the major projects and concepts that are changing our understanding of our medieval heritage
