**Utopias in Nonfiction Film** Simon Spiegel, 2022-01-11 Comprehensive and thorough *Utopias in Nonfiction Film* takes a new direction in its surprise application to documentary that has the potential to shake up the field Jane Gaines Columbia University USA Spiegel has introduced a new sub genre to utopian studies the documentary film The book covers an impressive range of films making the book one of the few truly international and comparative works in utopian studies Lyman Tower Sargent University of Missouri St Louis USA Simon Spiegel's magisterial overview of utopian documentaries and nonfiction films is a treasure trove of information and unearths many forgotten and half forgotten films providing perceptive discussions of sidelined movies that deserve his and our critical scrutiny Eckart Voigts University of Braunschweig Institute of Technology Germany This book is the first major study on utopias in nonfiction film Since the publication of Thomas More's *Utopia* more than 500 years ago countless books have been written which describe a better world But in film positive utopias seem to be nonexistent So far research has focused almost exclusively on dystopias since positive outlooks seem to run contrary to the media's requirement *Utopias in Nonfiction Film* takes a new approach starting from the insight that literary utopias are first and foremost meant as a reaction to the ills of the present and not as entertaining stories it looks at documentary and propaganda films an area which so far has been completely ignored by research Combining insights from documentary research and utopian studies a vast and very diverse corpus of films is analysed Among them are Zionist propaganda films cinematic city utopias socialist films of the future as well as web videos produced by the Islamist terrorist group ISIS

**The (Un)Certain Future of Empathy in Posthumanism, Cyberculture and Science Fiction** Elsa Bouet, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This volume investigates the future of empathy as contemplated by posthumanism cyberculture and science fiction As humanity increasingly networks and communicates online the reconfiguration of human communities through the removal and immediacy of the body challenges traditional notions of humanity and human capacity for empathy The impact of cyberculture and posthumanism on humanity and its capacity for empathy is here assessed through research in literature films neuroscience anthropology and philosophy

This volume addresses the centrality of the body to human interactions and assesses how intrinsic it is to the defining of the human. The exploration of posthuman narratives which display futuristic bodily modifications also engages with the anxieties and hopes for the future of human empathy. Research in dystopian narratives shows that these anxieties are also expressed without the tropes of bodily modifications and that ideological distancing creates the conditions necessary for a lack of empathy towards otherness. Girls on Fire Sarah Hentges, 2018-04-04 Under the threat of climate change corruption

inequality and injustice Americans may feel they are living in a dystopian novel come to life. Like many American narratives dystopian stories often focus on males as the agents of social change. With a focus on the intersections of race gender class sexuality and power the author analyzes the themes issues and characters in young adult YA dystopian fiction featuring female protagonists the Girls on Fire who inspire progressive transformation for the future. **Utopia and Terror in**

**Contemporary American Fiction** Judie Newman, 2014-07-17 This book examines the quest for failure of Utopia across a range of contemporary American transnational fictions in relation to terror and globalization through authors such as Susan Choi Andr Dubus Dalia Sofer and John Updike. While recent critical thinkers have reengaged with Utopia the possibility of terror whether state or non state external or homegrown shadows Utopian imaginings Terror and Utopia are linked in fiction through the exploration of the commodification of affect a phenomenon of a globalized world in which feelings are managed homogenized across cultures exaggerated or expunged according to a dominant model. Narrative approaches to the terrorist offer a means to investigate the ways in which fiction can resist commodification of affect and maintain a reasoned but imaginative vision of possibilities for human community. Newman explores topics such as the first American bestseller with a Muslim protagonist the links between writer and terrorist the work of Iranian Jewish Americans and the relation of race and religion to Utopian thought. *The Cambridge Companion to American Fiction after 1945* John N. Duvall, 2011-12-08 Each

generation revises literary history and this is nowhere more evident than in the post Second World War period. This 2011 Companion offers a comprehensive authoritative and accessible overview of the diversity of American fiction since the Second World War. Essays by nineteen distinguished scholars provide critical insights into the significant genres historical contexts cultural diversity and major authors during a period of enormous American global political and cultural power. This power is overshadowed nevertheless by national anxieties growing out of events ranging from the Civil Rights Movement to the rise of feminism from the Cold War and its fear of Communism and nuclear warfare to the Age of Terror and its different yet related fears of the Other. American fiction since 1945 has faithfully chronicled these anxieties. An essential reference guide this Companion provides a chronology of the period as well as guides to further reading. Utopias and the

Environment Geoffrey Berry, 2017-10-02 Utopias and the Environment explores the way in which the kind of dreaming or re-visioning known as the utopian imaginary takes environmental concerns into account. This kind of creative intervention is increasingly important in an era of ecological crisis as we witness the failure of governments worldwide to significantly

change industrial civilization from a path of business as usual In this context it is up to the artists in this case authors to imagine new ways of being that respond to this imperative and immediate global issue Concurrently it is also up to critics readers and thinkers everywhere to appraise these narratives of possibility for their complexities and internal conflicts as well as for their promise as we enter this new era of rapid change and adaptation Because creative and critical thinkers must work together towards this goal the idea of the critical utopia coined by Tom Moylan in response to the fiction of the 1970s is now ingrained in the common argot and is one of the key ideas discussed in this book This development in the genre which combines self reflexivity and multiple perspectives within its dreaming represents the postmodern spirit in its most regenerative aspect This book is testament to such hopes and potential realities This book was originally published as a special issue of Green Letters

**Handmaids, Tributes, and Carers** Myrna Santos, 2018-12-21 This book is a multi disciplinary anthology about the role of female figures in dystopian narratives Such female figures from all stages of life are often critical to these narratives positing females as particularly powerful heroines or catalysts to action especially in young adult manifestations such as The Hunger Games and Divergent trilogies among others This book explores the totality of these rich and varied roles from fiction to television to film This collection will capture the interest of scholars and students in popular culture literature gender studies and media as well as fan readers and followers of genre fiction television and film

**The Cambridge Companion to Utopian Literature** Gregory Claeys, 2010-08-05 Since the publication of Thomas More's genre defining work *Utopia* in 1516 the field of utopian literature has evolved into an ever expanding domain This Companion presents an extensive historical survey of the development of utopianism from the publication of *Utopia* to today's dark and despairing tendency towards dystopian pessimism epitomised by works such as George Orwell's *Nineteen Eighty Four* and Margaret Atwood's *The Handmaid's Tale* Chapters address the difficult definition of the concept of utopia and consider its relation to science fiction

and other literary genres The volume takes an innovative approach to the major themes predominating within the utopian and dystopian literary tradition including feminism romance and ecology and explores in detail the vexed question of the purportedly western nature of the concept of utopia The reader is provided with a balanced overview of the evolution and current state of a long standing rich tradition of historical political and literary scholarship Utopia Ltd. Matthew Beaumont,2005-03-01 This book uncovers the historical preconditions for the explosive revival of utopian literature at the nineteenth century fin de siècle and excavates its ideological content It marks a contribution not only to the literary and cultural history of the late Victorian period and to the expanding field of utopian studies but to the development of a Marxist critique of utopianism The book is particularly concerned with three kinds of political utopia or anti utopia those of state socialism feminism and anti communism the characteristic expression of this last example being the cacotopia After an extensive contextual account of the politics of utopia in late nineteenth century England it devotes a chapter to each of these topics before developing an original reinterpretation of William Morris's seminal Marxist utopia *News from Nowhere*

**Storytelling for Sustainability in Higher Education** Petra Molthan-Hill, Heather Luna, Tony Wall, Helen Puntha, Denise Baden,2020-03-25 To be a storyteller is an incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy Stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted The craft of storytelling is as old as time and has influenced human experience throughout the ages The conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area Written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the Ecology of Law to the exploration of sustainability in accounting and finance via contemporary cinema Practical advice in each chapter ensures that ideas may be put into practice with ease In addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work It also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories Everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students The Bioregional Imagination Tom Lynch, Cheryll Glotfelty, Karla Armbruster,2012 Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective Although bioregional ideas occur regularly in ecocritical writing until now no systematic effort has been made to outline the

principles of bioregional literary criticism and to use it as a way to read write understand and teach literature The twenty four original essays here are written by an outstanding selection of international scholars The range of bioregions covered is global and includes such diverse places as British Columbia s Meldrum Creek and Italy s Po River Valley the Arctic and the Outback There are even forays into cyberspace and outer space In their comprehensive introduction the editors map the terrain of the bioregional movement including its history and potential to inspire and invigorate place based and environmental literary criticism Responding to bioregional tenets this volume is divided into four sections The essays in the Reinhabiting section narrate experiments in living in place and restoring damaged environments The Rereading essays practice bioregional literary criticism both by examining texts with strong ties to bioregional paradigms and by opening other less obvious texts to bioregional analysis In Reimagining the essays push bioregionalism to evolve by expanding its corpus of texts coupling its perspectives with other approaches or challenging its core constructs Essays in the Renewal section address bioregional pedagogy beginning with local habitat studies and concluding with musings about the Internet In response to the environmental crisis we must reimagine our relationship to the places we inhabit This volume shows how literature and literary studies are fundamental tools to such a reimagining
