Screen Interiors Pat Kirkham, Sarah A. Lichtman, 2021-03-11 Covering everything from Hollywood films to Soviet cinema London's queer spaces to spaceships horror architecture and action scenes Screen Interiors presents an array of innovative perspectives on film design Essays address questions related to interiors and objects in film and television from the early 1900s up until the present day Authors explore how interior film design can facilitate action and amplify tensions how rooms are employed as structural devices and how designed spaces can contribute to the construction of identities Case studies look at disjunctions between interior and exterior design and the inter relationship of production design and narrative With a lens on class sexuality and identity across a range of films including *Twilight of a Woman's Soul* 1913 *The Servant* 1963 *Caravaggio* 1986 and *Passengers* 2016 and illustrated with film stills throughout Screen Interiors showcases an array of methodological approaches for the study of film and design history

Image and Territory Jennifer Burwell, Monique Tschofen, 2007 In a culture that often understands formal experimentation or theoretical argument to be antithetical to pleasure Atom Egoyan has nevertheless consistently appealed to wide audiences around the world If films like *The Adjuster* *Calendar Exotica* and *The Sweet Hereafter* have ensured him international cult status as one of the most revered of all contemporary directors Egoyan's forays into installation art and opera have provided evidence of his versatility and confirmed his talents Throughout his career Atom Egoyan has shown himself to possess the rarest kind of singularity As Jonathan Romney puts it Egoyan's preoccupations and tropes have been so consistent that he's practically created his own genre³ 1995:8 Hrag Vartanian adds 2Egoyanesque has become a word to film aficionados commonly understood to mean a cinematic moment that examines sexuality technology and alienation in the modern world³ 2004 For this singularity Egoyan is widely hailed as a true auteur someone carrying on the legacy of the European art house traditions of Bergman Godard and Truffaut Certainly his work bears a most recognizable signature there is no confusing an Egoyan work with anyone else's Like his art house predecessors Egoyan clearly intends that his work be as Dudley Andrew puts it 2read rather than consumed ³ that is viewed meditatively reflected upon and discussed 2000:24 And indeed in this world in which filmmaking has become commonplace where as Egoyan has said 2what used to be a rarified activity is now available to anyone with a digital camera and a computer³ 2001b:18 he intends through much of his work to recall an earlier image culture in which artists had an ability to produce something that gained its power precisely through its rarity

Cinema Off Screen Chenshu Zhou, 2021-07-06 At a time when what it means to watch movies keeps changing this book offers a case study that rethinks the institutional ideological and cultural role of film exhibition demonstrating that film exhibition can produce

meaning in itself apart from the films being shown Cinema Off Screen advances the idea that cinema takes place off screen as much as on screen by exploring film exhibition in China from the founding of the People's Republic in 1949 to the end of the Cold War in the early 1990s Drawing on original archival research interviews and audience recollections Cinema Off Screen decenters the filmic text and offers a study of institutional operations and lived experiences Chenshu Zhou details how the screening space media technology and the human body mediate encounters with cinema in ways that have not been fully recognized opening new conceptual avenues for rethinking the ever changing institution of cinema

Photoferroelectrics Vladimir M. Fridkin, 2012-12-06 Since Valasek's discovery of the ferroelectric properties of Rochelle salt nearly 60 years ago ferroelectricity has been regarded as one of the traditional branches of dielectric physics It has had important applications in lattice dynamics quantum electronics and nonlinear optics The study of electron processes in ferroelectrics was begun with VUL's investigations of the ferroelectric properties of barium titanate 1 1 Intrinsic and extrinsic optical absorption band structure conductivity and photoconductivity carrier mobility and transport mechanisms were examined in this compound and in other perovskite ferroelectric semiconductors An important discovery was that of the highly photosensitive photoconducting ferroelectrics of type AVB_{1-x}VI_x e.g. SbSI by MERZ et al in 1962 1 2 3 A large number of ferroelectric semiconductors some photosensitive some not are now known including broad band materials e.g. lithium niobate lithium tantalate barium and strontium niobate and type A B I compounds BI and narrow band semiconductors e.g. type A_{1-x}VB_x compounds A series of improper ferroelectric semiconductors and photosensitive ferroelastics have been discovered of which Sb_{0.5}I is an example 7 Owing to the uncertainty of their band structure the difficulty in determining the nature of the levels the complexity of alloying and their generally low mobility values ferroelectrics are rarely of interest regarded as nonlinear semiconductors The most fruitful approach has been the study of the influence of electrons especially nonequilibrium electrons and electron excitations on phase transitions and ferroelectric properties A large group of phenomena have recently been discovered and investigated
