## **Secure Passage At Sea:**

*Secure Passage at Sea* Ray S. Cline, William M. Carpenter, 1993-06 This is the report of the Seventh International Conference on the Security of Sea Lines of Communication in the Western Pacific and Indian Oceans co sponsored by the United States Global Strategy Council and SRI International This conference stressed the erosion of the communist system and the need for cooperation among sea going nations in the changing unpredictable and perhaps even more dangerous world The papers presented cover many areas from the strategic trends in the world situation to piracy to command and control and represent the views of individuals from nations as diverse as Japan Indonesia the Philippines New Zealand and the Republic of China on Taiwan All emphasized the diplomatic problems of maintaining freedom of the seas especially as trading relationships become more and more essential for worldwide economic stability and national security Originally published in 1991

Environmental Security in Watersheds: The Sea of Azov Viktor Lagutov, 2011-10-23 Watersheds supplying crucial ecosystem services to humans seem to be a logical territorial unit to integrate societal benefits and environmental needs in order to evaluate the sustainability of natural resource use patterns Based on this belief the book is an attempt to initiate a comprehensive environmental security assessment in the basin of the Azov Sea shared by Russia and Ukraine Though the region provides a variety of essential services and plays a strategic role in national and international development plans it has been excluded from most regional environmental discussions At the same time there is an alarming degradation rate of basin freshwater ecosystems that has occurred due to overutilization of certain prioritized services e g transportation The collapse of neglected services e g fishery and freshwater supply poses serious threats to the national economies as well as the local population and to mitigate these threats priority in water management should be given to securing sustainability of the regional freshwater ecosystems In addition to the review of the current status of Azov ecosystem services the authors analyze likely future availability and challenges The relevant experience derived from basin management of the Black Sea and other similar basins is also discussed

Maritime Security in the South China Sea Dr Shicun Wu, Professor Keyuan Zou, 2013-03-28 Maritime security is of vital importance to the South China Sea a critical sea route for maritime transport of East Asian countries including China The adjacent countries have rendered overlapping territorial and or maritime claims in the South China Sea which complicate the situation of maintaining maritime security and developing regional cooperation there This book focuses on contemporary maritime security in the South China Sea as well as its connected sea area the Straits of Malacca and Singapore It identifies and examines selected security issues concerning the safety of navigation crackdown on transnational crimes including sea piracy and maritime terrorism and conflict prevention and resolution In the context of non traditional security issues such as maritime environmental security and search and rescue at sea are included The book explores ways and means of international cooperation in dealing with these maritime security issues

**Maritime Security and the Law of the Sea** Natalie Klein, 2012-10-04 Maritime Security

and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats. It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea. The discussion sets out the rules regulating passage of military vessels and military activities at sea, law enforcement activities across the different maritime zones, information sharing and intelligence gathering as well as armed conflict and naval warfare. In doing so, this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism, weapons of mass destruction, piracy, drug trafficking, environmental damage and illegal fishing. While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea, there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats. This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use. More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed.

*Geopolitics and Maritime Security* Frank Bekkers, Patrick Bolder, Esther Chavannes, Willem Oosterveld, Rob de Wijk, Jan Frederik Braun, 2019-06-28. This report contains the results from a research project aimed at identifying new capabilities for the future Royal Netherlands Navy RNLN. With the type of naval operations and tasks for the period up to 2030-35, largely enduring the current regional power projection profile of the Royal Netherlands Navy RNLN, must be strengthened and renewed. We envisage the core of the future naval force to remain a versatile mix of surface and sub-surface combatants, shipborne helicopters and unmanned systems for intelligence purposes and extended force projection, modern amphibious forces and long range land attack capability to counter Anti Access and Area Denial (A2AD) threats. All main vessels should be ocean-going, able to navigate the main operating theaters in the European seas and the Caribbean under all conditions. But even while we expect that naval operations and tasks as well as the overall force profile of the RNLN will evolve rather than drastically change, the RNLN must substantially innovate but not beyond recognition its personnel, materiel, doctrines and processes, organization and structures.

*Japan's Sea Lane Security* Euan Graham, 2005-11-16. This is the first major English language study to explore the broad and longstanding connections between Japan's national security and the safety of its sea lanes. Tracing issues from pre and post 1945 eras, the book explores how Japan's concerns with sea lane protection have developed across such diverse fields as military strategy, diplomacy, trade policy, energy security and law enforcement. Drawing upon case study material and primary research including interviews with officials and security analysts, the book presents a chronological analysis of Japan's sea lane security. While Japan's security policies have recently undergone relatively rapid change, a historical treatment of sea lane security issues reveals long-term continuity in security policymakers' perceptions and responses regarding Japan's defence.

and foreign policy Revealing a neglected but important aspect of Japan's military and economic security the book investigates why officials and analysts continue to portray the defence of Japan's sea lanes as a matter of life and death Taiwan's Maritime Security Martin Edmonds, Michael M. Tsai, 2005-06-27 The relationship between Taiwan and the People's Republic of China is regarded as a very serious potential source of conflict in East Asia especially now that the questions of Hong Kong and Macau have been settled and increased democratisation in Taiwan is seen as a threat by mainland China This book which brings together leading international scholars of maritime security and also strategic thinkers from within Taiwan itself examines a wide range of questions concerning Taiwan's perception of the naval threat from mainland China and how Taiwan's navy and naval strategic thinking is responding including discussions of the strength of Taiwan's naval forces mainland China's claims and ambitions in the South China Sea and the controversial question of Theatre Missile Defence Offshore Oil and Gas Installations Security Mikhail Kashubsky, 2015-12-16 Oil and natural gas which today account for over 60% of the world's energy supply are often produced by offshore platforms One third of all oil and gas comes from the offshore sector However offshore oil and gas installations are generally considered intrinsically vulnerable to deliberate attacks The changing security landscape and concerns about the threats of terrorism and piracy to offshore oil and gas installations are major issues for energy companies and governments worldwide But how common are attacks on offshore oil and gas installations Who attacks offshore installations Why are they attacked How are they attacked How is their security regulated at the international level How has the oil industry responded This timely and first of its kind publication answers these questions and examines the protection and security of offshore oil and gas installations from a global industry wide and company level perspective Looking at attacks on offshore installations that occurred throughout history of the offshore petroleum industry it examines the different types of security threats facing offshore installations the factors that make offshore installations attractive targets the nature of attacks and the potentially devastating impacts that can result from attacks on these important facilities It then examines the international legal framework state practice and international oil and gas industry responses that aim to address this vital problem Crucially the book includes a comprehensive dataset of attacks and security incidents involving offshore oil and gas installations entitled the Offshore Installations Attack Dataset OIAD This is an indispensable reference work for oil and gas industry professionals company security officers policy makers maritime lawyers and academics worldwide **Ocean Politics in Southeast Asia** Peter Polomka, The task of avoiding in the oceans the last frontier of our planet the claims and rivalries that have caused endless conflict on land has thrust the ocean issues increasingly into the forefront of international affairs This book examines aspects of the interrelationship of diverse interests in the seas of Southeast Asia while suggesting scope for cooperative developments that might not only benefit the region but also have wider application in the emerging multipolar world *Blackstone's International Law Documents* Malcolm David Evans, 2013-08-08 This title has been updated to take account of developments in the field of
