illuminating read for visual novices experts and all in betweeners **Picture World** Rachel Teukolsky, 2020-08-16 The modern media world came into being in the nineteenth century when machines were harnessed to produce texts and images in unprecedented numbers In the visual realm new industrial techniques generated a deluge of affordable pictorial items mass printed photographs posters cartoons and illustrations These alluring objects of the Victorian parlor were miniaturized spectacles that served as portals onto phantasmagoric versions of the world Although new kinds of pictures transformed everyday life these ephemeral items have received remarkably little scholarly attention *Picture World* shines a welcome new light onto these critically neglected yet fascinating visual objects They serve as entryways into the nineteenth century's key aesthetic concepts Each chapter pairs a new type of picture with a foundational keyword in Victorian aesthetics a familiar term reconceived through the lens of new media Character appears differently when considered with caricature in the new comics and cartoons appearing in the mass press in the 1830s likewise the book approaches realism through pictorial journalism illustration via illustrated Bibles sensation through carte de visite portrait photographs the picturesque by way of stereoscopic views and decadence through advertising posters *Picture World* studies the aesthetic effects of the nineteenth century's media revolution it uses the relics of a previous era's cultural life to interrogate the Victorian world's most deeply held values arriving at insights still relevant in our own media age *SAGE Visual Methods* Jason Hughes, 2012-07-23 In contemporary Western societies the visual domain has come to assume a hitherto unprecedented cultural centrality Daily life is replete with a potentially endless stream of images and other visual messages from the electronic and paper based billboards of the street to the TV and Internet feeds of the home The visual has become imbued with a symbolic potency a signifying power that seemingly eclipses that of all other sensory data The central aim of this four volume collection is to explore key approaches to visual research methods and to consider some of the core principles issues debates and controversies surrounding the use of visual techniques in relation to three key enterprises 1 documentation and representation 2 interpretation and classification and 3 elicitation and collaboration Volume One Principles Issues Debates and Controversies in Visual Research serves as a theoretical backdrop to the field as a whole It introduces core epistemological ethical and methodological debates that effectively cut across the four volume collection as a whole Volume Two Documentation and Representation illustrates approaches to visual documentation and representation from classical documentaries to contemporary state of the art modes of visual anthropology and ethnography Volume Three Interpretation and Classification examines core debates surrounding and approaches to visual analysis Volume Four Elicitation and Collaboration explores participative approaches to visual inquiry **Theorizing Images** Žarko Paić, 2016-04-26 This book uncovers an underlying dispute over the role images play in contemporary society and consequently over their values and purposes Two decades after the concepts of the pictorial and the iconic turn changed our vernacular involvement with regard to images it has become clear that it was not only a newly discovered social political or sexual construction of the visual field

that brought turbulence into disciplinary knowledge but that images have their own pictorial logic with powers exceeding those that are purely iconic or visually discernible. Instead of underscoring previously defined concepts of the picture, the contributors to this book view visual studies and Bildwissenschaft merely as a place for the theory of images, making a case for the hotly debated topic of their powers and weaknesses on the one hand and of their respective theories on the other. Therefore, as the title indicates, this book theorizes images but it does not present a theory of images because visual studies cannot lead to a unified theory of images unless a unified ontology of images can be agreed upon first. Although that would be a different task altogether, all the contributions in this book, in different ways and at different paces, by theorizing images in their aesthetic, historical, media and technological guises, pave the way for the future of visual culture and for the image science that will make this future more comprehensible.

Constitutional Semiotics Martin Belov, 2022-06-30 This book offers an outline of the foundations of a theory of constitutional semiotics. It provides a systematic account of the concept of constitutional semiotics and its role in the representation and signification of meaning in constitution, constitutional law and constitutionalism. The book explores the constitutional signification of meaning that is stretched between rational entrenchment and constitutional imagination. It provides a critical assessment of the rationalist entrapment of constitutional modernity and justifies the need to turn to shadow constitutionalisms: textual, symbolic, imaginary and visual constitutionalism. The book puts forward innovative incentives for constitutional analysis based on constitutional semiotics as a paradigm for representation of meaning in rational, textual, symbolic, imaginary and visual constitutionalism. The book focuses on the textual, imaginative and visual discourse of constitutionalism which is built upon collective constitutional imaginaries and on the peculiar normativity of constitutional geometry and constitutional mythology as borderline phenomena entrenched in rational, textual, symbolic, imaginary and visual constitutionalism. The book analyses concepts such as constitutional text and texture, authoritative constitutional narratives and authoritative constitutional narrators, constitutional semiotic community, constitutional utopia, constitutional taboo, normative ideology and normative ideas, constitutional myth and mythology, constitutional symbolism, constitutional code and constitutional geometric form. It explores the textual entrenchment of constitutionalism and its repercussions for representation and signification of meaning.

On Video Games Soraya Murray, 2017-10-30 Today, over half of all American households own a dedicated game console and gaming industry profits trump those of the film industry worldwide. In this book, Soraya Murray moves past the technical discussions of games and offers a fresh and incisive look at their cultural dimensions. She critically explores blockbusters like *The Last of Us*, *Metal Gear Solid*, *Spec Ops*, *The Line*, *Tomb Raider* and *Assassin's Creed* to show how they are deeply entangled with American ideological positions and contemporary political, cultural and economic conflicts. As quintessential forms of visual material in the twenty-first century, mainstream games both mirror and spur larger societal fears, hopes and dreams and even address complex struggles for recognition. This book examines both their elaborately constructed characters and densely layered worlds whose

social and environmental landscapes reflect ideas about gender race globalisation and urban life In this emerging field of study Murray provides novel theoretical approaches to discussing games and playable media as culture Demonstrating that games are at the frontline of power relations she reimagines how we see them and more importantly how we understand them

Sociology of the Visual Sphere Regev Nathansohn, Dennis Zuev, 2013 This collection of original articles deals with two intertwined general questions what is the visual sphere and what are the means by which we can study it sociologically These questions serve as the logic for dividing the book into two sections the first Visualizing the Social Sociologizing the Visual focuses on the meanings of the visual sphere and the second New Methodologies for Sociological Investigations of the Visual explores various sociological research methods to getting a better understanding of the visual

sphere We approach the visual sphere sociologically because we regard it as one of the layers of the social world It is where humans produce use and engage with the visual in their creation and interpretation of meanings Under the two large inquiries into the what and the how of the sociology of the visual sphere a subset of more focused questions is being posed what social processes and hierarchies make up the visual sphere How various domains of visual politics and visibility are being related or being presented as such What are the relations between sites and sights in the visual research What techniques help visual researcher to increase sensorial awareness of the research site How do imaginaries of competing political agents interact in different global contexts and create unique locally specific visual spheres What constitutes competing interpretations of visual signs The dwelling on these questions brings here eleven scholars from eight countries to share their research experience from variety of contexts and sites utilizing a range of sociological theories from semiotics to post structuralism

Youth Identities, Localities, and Visual Material Culture Kristen Ali Eglinton, 2012-10-05 This invaluable addition to Springer's Explorations of Educational Purpose series is a revelatory ethnographic account of the visual material culture of contemporary youths in North America The author's detailed study follows apparently dissimilar groups black and Latino in a New York City after school club and white and Indigenous in a small Canadian community as they inflect their nascent identities with a sophisticated sense of visual material culture in today's globalized world It provides detailed proof of how much ethnography can add to what we know about young people's development in addition to its potential as a model to explore new and significant avenues in pedagogy Supported by a wealth of ethnographic evidence the analysis tracks its subjects' responses to strikingly diverse material ranging from autobiographical accounts by rap artists to the built environment It shows how young people from the world's cultural epicenter just like their counterparts in the sub Arctic construct racial geographic and gender identities in ways that are subtly responsive to what they see around them blending localized characteristics with more widely shared visual references that are now universally accessible through the Web The work makes a persuasive case that youthful engagement with visual material culture is a relational and productive activity that is simultaneously local and global at once constrained and enhanced by geography and possesses a potent and life affirming authenticity Densely interwoven with young people's perspectives the author's account sets out an innovative and interdisciplinary conceptual framework affording fresh insights into how today's youth assimilate what they perceive to be significant Supported by a wealth of ethnographic evidence the analysis tracks its subjects' responses to strikingly diverse material ranging from autobiographical accounts by rap artists to the built environment It shows how young people from the world's cultural epicenter just like their counterparts in the sub Arctic construct racial geographic and gender identities in ways that are subtly responsive to what they see around them blending localized characteristics with more widely shared visual references that are now universally accessible through the Web The work makes a persuasive case that youthful engagement with visual material culture is a relational and productive activity that is simultaneously local and global at once

constrained and enhanced by geography and possesses a potent and life affirming authenticity. Densely interwoven with young people's perspectives, the author's account sets out an innovative and interdisciplinary conceptual framework affording fresh insights into how today's youth assimilate what they perceive to be significant. Supported by a wealth of ethnographic evidence, the analysis tracks its subjects' responses to strikingly diverse material ranging from autobiographical accounts by rap artists to the built environment. It shows how young people from the world's cultural epicenter, just like their counterparts in the sub-Arctic, construct racial, geographic, and gender identities in ways that are subtly responsive to what they see around them, blending localized characteristics with more widely shared visual references that are now universally accessible through the Web. The work makes a persuasive case that youthful engagement with visual material culture is a relational and productive activity that is simultaneously local and global, at once constrained and enhanced by geography and possesses a potent and life affirming authenticity. Densely interwoven with young people's perspectives, the author's account sets out an innovative and interdisciplinary conceptual framework affording fresh insights into how today's youth assimilate what they perceive to be significant.

Imagery in the 21st Century Oliver Grau, 2011-07-29. Scholars from science, art, and humanities explore the meaning of our new image worlds and offer new strategies for visual analysis. We are surrounded by images as never before: on Flickr, Facebook, and YouTube; on thousands of television channels; in digital games and virtual worlds; in media art and science. Without new efforts to visualize complex ideas, structures, and systems, today's information explosion would be unmanageable. The digital image represents endless options for manipulation; images seem capable of changing interactively or even autonomously. This volume offers systematic and interdisciplinary reflections on these new image worlds and new analytical approaches to the visual. **Imagery in the 21st Century** examines this revolution in various fields, with researchers from the natural sciences and the humanities meeting to achieve a deeper understanding of the meaning and impact of the image in our time. The contributors explore and discuss new critical terms of multidisciplinary scope, from database economy to the dramaturgy of hypermedia, from visualizations in neuroscience to the image in bio art. They consider the power of the image in the development of human consciousness, pursue new definitions of visual phenomena, and examine new tools for image research and visual analysis.

The Bible in Photography Sheona Beaumont, 2024-01-25. Sheona Beaumont addresses the untold story of biblical subjects in photography. She argues that stories, characters, and symbols from the Bible are found to pervade photographic practices and ideas across the worlds of advertising and reportage, the book and the gallery, in theoretical discourse and in the words of photographers themselves. Beaumont engages interpretative tools from biblical reception studies, art history, and visual culture criticism in order to present four terms for describing photography's latent spirituality: the index, the icon, the tableau, and the vision. Throughout her journey, she includes lively discussion of selected fine art photography dealing with the Bible in surprising ways, from images by William Henry Fox Talbot in the 19th century to David Mach in the 21st. Far from telling a secular story,

photography and the conditions of its representations are exposed in theological depth Beaumont skillfully interweaves discussion of the images and theology arguing for the dynamic and potent voice of the Bible in photography and enriching visual culture criticism with a renewed religious understanding
