Seeking An Alliance:

Seeking an Alliance , **A Theory of Foreign Policy** Glenn Palmer,T. Clifton Morgan,2011-10-30 This book presents a general explanation of how states develop their foreign policy The theory stands in contrast to most approaches which assume that states want to maximize security by assuming that states pursue two things or goods through their foreign policy change and maintenance States in other words try both to change aspects of the international status quo that they don't like and maintain those aspects they do like A state's ability to do so is largely a function of its relative capability and since national capability is finite a state must make trade offs between policies designed to achieve change or maintenance Glenn Palmer and Clifton Morgan apply their theory to cases ranging from American foreign policy since World War II to Chinese foreign policy since 1949 to the Suez Canal Crisis The many implications bear upon specific policies such as conflict initiation foreign aid allocation military spending and alliance formation Particularly useful are the implications for foreign policy substitutability The authors also undertake statistical analyses of a wide range of behaviors and these generally support the theory A Theory of Foreign Policy represents a major advance over traditional analyses of international relations Not only do its empirical implications speak to a broader range of policies but more importantly the book illuminates the trade offs decision makers face in selecting among policies to maximize utility given a state's goals **Flattering Alliances** Peter Lindström,Svante Norrhem,2015-01-01 Taking a fresh look at the history of diplomacy this book looks at the fight for hegemony between France and Austria after the Peace of Westphalia 1648 showing how their clashes dragged the Scandinavian kingdoms into European top level politics and forced them to take part in the play constantly negotiating risks and profits Historians Peter Lindström and Svante Norrhem discuss how the Great Powers were binding allies to their side and how the Scandinavian countries and their political elites responded Many of the diplomatic strategies were solidified through family alliances patronage and economic politics something quite different from what is expected from today's diplomatic neutralities **America's Entangling Alliances** Jason W. Davidson,2020-11-02 America's Entangling Alliances challenges the belief that the US resists international alliances By documenting thirty four alliances categorized as defense pacts military coalitions or security partnerships Davidson finds that the US demand for allies is best explained by looking at variance in its relative power and the threats it has faced Alliance Brand Mark Darby,2006-07-11 As pressure continues to build on organisations to achieve more with less partnering offers tremendous promise as a strategic solution However up to 70% of such initiatives fail to meet their objectives In this book alliance expert Mark Darby argues that in the age of the extended enterprise firms must display a positive reputation and hard results from their alliances in order to attract the best partners and stand out from the growing crowd of potential allies Building on this he introduces the Alliance Brand concept explores its critical success factors and shows in detail how to apply it in your organisation Darby's straightforward advice and comprehensive maps and tools will guide you on the journey to fulfilling the promise of partnering The results are higher

revenues and reduced alliance failure rates along with lower costs and fewer risks Alliance brands also have more satisfied staff and partners and a transparent audit friendly process to satisfy increasing governance concerns This leads to sustainable alliance success and ultimately partner of choice status in your chosen industries and markets That s a compelling return on investment That s an Alliance Brand **Managing Network Resources** Ranjay Gulati,2007-03-15 Today s firms are increasingly embedded in networks of alliances that influence their behavior and performance Ranjay Gulati examines the network resources that arise from these ties how successful firms manage these and how they influence strategy access to resources and perceptions of a firm s legitimacy Chiefs of Industry Hazel Petrie,2013-10-01 Drawing on a wide range of sources in both English and Maori this study explores the entrepreneurial activity of New Zealand s indigenous Maori in the early colonial period Focusing on the two industries coastal shipping and flourmilling where Maori were spectacularly successful in the 1840s and 1850s this title examines how such a society was able to develop capital intensive investments and harness tribal ownership quickly and effectively to render commercial advantages A discussion of the sudden decline in the golden age of Maori enterprise from changing market conditions to land alienation is also included

Arguing about Alliances Paul Poast,2019-11-15 Why do some attempts to conclude alliance treaties end in failure From the inability of European powers to form an alliance that would stop Hitler in the 1930s to the present inability of Ukraine to join NATO states frequently attempt but fail to form alliance treaties In *Arguing about Alliances* Paul Poast sheds new light on the purpose of alliance treaties by recognizing that such treaties come from negotiations and that negotiations can end in failure In a book that bridges Stephen Walt s *Origins of Alliance* and Glenn Snyder s *Alliance Politics* two classic works on alliances Poast identifies two conditions that result in non agreement major incompatibilities in the internal war plans of the participants and attractive alternatives to a negotiated agreement for various parties to the negotiations As a result *Arguing about Alliances* focuses on a group of states largely ignored by scholars states that have attempted to form alliance treaties but failed Poast suggests that to explain the outcomes of negotiations specifically how they can end without agreement we must pay particular attention to the wartime planning and coordinating functions of alliance treaties Through his exploration of the outcomes of negotiations from European alliance negotiations between 1815 and 1945 Poast offers a typology of alliance treaty negotiations and establishes what conditions are most likely to stymie the attempt to formalize recognition of common national interests

Why Terrorist Groups Form International Alliances Tricia Bacon,2018-04-04 Terrorist groups with a shared enemy or ideology have ample reason to work together even if they are primarily pursuing different causes Although partnering with another terrorist organization has the potential to bolster operational effectiveness efficiency and prestige international alliances may expose partners to infiltration security breaches or additional counterterrorism attention Alliances between such organizations which are suspicious and secretive by nature must also overcome significant barriers to trust the exposure to risk must be balanced by the promise of increased lethality resiliency and longevity In *Why Terrorist Groups Form International Alliances*

Tricia Bacon argues that although it may seem natural for terrorist groups to ally groups actually face substantial hurdles when attempting to ally and when alliances do form they are not evenly distributed across pairs. Instead she demonstrates that when terrorist groups seek allies to obtain new skills, knowledge or capacities for resource acquisition and mobilization, only a few groups have the ability to provide needed training, safe haven infrastructure or cachet. Consequently, these select few emerge as preferable partners and become hubs around which other groups cluster. According to Bacon, shared enemies and common ideologies do not cause alliances to form but create affinity to bind partners and guide partner selection. Bacon examines partnerships formed by the Popular Front for the Liberation of Palestine, Al Qaida and Egyptian jihadist groups among others in a series of case studies spanning the dawn of international terrorism in the 1960s to the present. Why Terrorist Groups Form International Alliances advances our understanding of the motivations of terrorist alliances and offers insights useful to counterterrorism efforts to disrupt these dangerous relationships.

Vladimir Putin A Geostrategic Russian Icon A Eurasian Continent A Russian Superpower A Charismatic World Leader Goeran B.

Johansson, 2019-06-06 This is the third book in the series about Vladimir Putin which describes in detail the last two years in Russia's ongoing strategy to work with China within the BRICS and the SCO to deprive the United States its global leading role in the ongoing process of creating a multipolar world with multiple centers of power. The text is based on various international sources with touches of the author's own analysis and the reader gets an entirely different and more nuanced picture of the dramatic situation in the world than the established media conveys. We get to follow all the way from the drama with Boeing MH17 over Ukraine in 2014, the Islamic State, Russian, Chinese and American military development and the crisis in the South China Sea, Sweden and finally the dramatic developments in the United States in connection with presidential elections. This part is also included in the trilogy published in Lulu.

The Chancelleries of Europe Alan Palmer, 2013-12-19 In the author's own words this is a book about chaps and maps More formally *The Chancelleries of Europe* is a study of traditional diplomacy at its peak of influence in the nineteenth century and the first years of the twentieth At the Congress of Vienna in 1814-15 the five Great Powers Austria Britain France Prussia and Russia established a system of international intercourse that safeguarded the world from major war for exactly a hundred years The successive crises that challenged this supranational system the unification of Italy and Germany the scramble for colonies in Africa and for trade concessions in Asia the decline of the Ottoman Empire and the emergence of Japan are well known Less attention has been given to the way the system functioned and to changes imposed on its character by the spread of speedier communications It is these gaps in our understanding of the international politics of the century that the author seeks to fill The book therefore studies the clashes of personality between crowned heads of the old empires and between rival statesmen and ambassadors seeking advancement It compares the growth of personnel and specialist departments in the various foreign ministries assesses the impact of domestic politics on external affairs the power of the pressure groups like the British China Association and the Russian Far Eastern Committee the proto spin fed to favoured newspapers and in contrast the growing unease of press and public at hidden negotiations and the concealment of diplomatic expedients and alliances But the book also notes changes in the way diplomacy was conducted in the wake of technological inventions such as the semaphore towers of the early years and the electric telegraph and undersea cables of the second half of the century Moments of high drama skulduggery and bathos prove that the reading of diplomatic history is not the dull dreary drudge many abhorred in their schooldays

Decision Making in Behavioral Strategy T. K. Das, 2016-11-01 Behavioral strategy continues to attract increasing research interest within the broader field of strategic management Research in behavioral strategy has clear scope for development in tandem with such traditional streams of strategy research that involve economics markets resources and technology The key roles of psychology organizational behavior and behavioral decision making in the theory and practice of strategy have yet to be comprehensively grasped Given that strategic thinking and strategic decision making are importantly concerned with human cognition human decisions and human behavior it makes eminent sense to bring some balance in the strategy field by complementing the extant emphasis on the objective economics based view with substantive attention to the subjective individual oriented perspective This calls for more focused inquiries into the role and nature of the individual strategy actors and their cognitions and behaviors in the strategy research enterprise For the purposes of this book series behavioral strategy would be broadly construed as covering all aspects of the role of the strategy maker in the entire strategy field The scholarship relating to behavioral strategy is widely believed to be dispersed in diverse literatures These existing

contributions that relate to behavioral strategy within the overall field of strategy has been known and perhaps valued by most scholars all along but were not adequately appreciated or brought together as a coherent sub field or as a distinct perspective of strategy This book series on Research in Behavioral Strategy will cover the essential progress made thus far in this admittedly fragmented literature and elaborate upon fruitful streams of scholarship More importantly the book series will focus on providing a robust and comprehensive forum for the growing scholarship in behavioral strategy In particular the volumes in the series will cover new views of interdisciplinary theoretical frameworks and models dealing with all behavioral aspects significant practical problems of strategy formulation implementation and evaluation and emerging areas of inquiry The series will also include comprehensive empirical studies of selected segments of business economic industrial government and non profit activities with potential for wider application of behavioral strategy Through the ongoing release of focused topical titles this book series will seek to disseminate theoretical insights and practical management information that will enable interested professionals to gain a rigorous and comprehensive understanding of the subject of behavioral strategy Decision Making in Behavioral Strategy contains contributions by leading scholars in the field of behavioral strategy research The 10 chapters in this volume cover a number of significant issues relating to the decision making processes practices and perspectives in the field of behavioral strategy covering diverse topics such as failures in acquisitions entrepreneurs under ambiguity metacognition neural correlates of emotion knowledge flows behavioral responses business modeling and alliance capability The chapters include empirical as well as conceptual treatments of the selected topics and collectively present a wide ranging review of the noteworthy research perspectives on decision making in behavioral strategy

The Scourge of War Paul Diehl, 2010-03-25 J David Singer s legendary Correlates of War project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so

called democratic peace Editor Paul F Diehl has now convened some of the world s foremost international conflict analysis specialists to reassess COW s contribution to our understanding of global conflict Each chapter takes one of COW s pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer s important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign
