Sei Gegrubt Und Lebe:

Building Socialism Curtis Swope, 2017-11-16 *Building Socialism* reveals how East German writers' engagement with the rapidly changing built environment from the mid 1950s to the early 1970s constitutes an untold story about the emergence of literary experimentation in the post War period. It breaks new ground by exploring the centrality of architecture to a mid century modernist literature in dialogue with multiple literary and left wing theoretical traditions and in tune with international assessments of modernist architecture and urban planning. Design and construction were a central part of politics and everyday life in East Germany during this time as buildings old and new were asked to bear heavy ideological and social burdens. In their novels, stories and plays Heiner Müller, Christa Wolf, Günter Kunert, Volker Braun, Günter de Bruyn and Brigitte Reimann responded to enormous new factory complexes, experimental new towns, the demolition of Berlin's tenements and the propagation of a pared down modernist aesthetic in interior design. Writers' representation of the design, construction and use of architecture formed part of a turn to modernist literary devices including montage, metaphor and shifting narrative perspectives. East Germany's literary architecture also represents a sophisticated theoretical reflection on the intractable problems of East Germany's socialist modernity, including the alliance between state socialism and technological modernization, competing commitments to working class self organization and the power of specialist planners and designers, and the attempt to create an alternative to fascism.

Glossolalia Deceased Andrei Bely, 2003 Andrei Bely was one of the most prolific poets, novelists and theoreticians among the Russian Symbolists. Engaged throughout his life with the essence of language, his thoughts and findings emerge repeatedly in his essays and novels. None of his writings on the subject, however, are as remarkable and multi faceted as this. *Poem about Sound* *Glossolalia* is a complex examination of philology, philosophy, esoterica and poetry, all in search of the relationship between sound and sense. It reverberates with sound associations and transcends all boundaries of language, discipline and tradition. It is simultaneously a treatise on the origins of language and the world's creation through the movements of sounds. Bely reenacts through the mouth the cosmology of Rudolf Steiner. Bely's work in its bold attempt to invoke the living word remains one of the most far reaching poetic experiments of the twentieth Century, and this edition offers his fascinating text for the first time in both an English and a German translation, along with the original Russian version and an in depth commentary by Thomas R. Beyer. Illustrated.
