

6 Bibliography

From the very beginning of a research project, you should be careful to note all details of articles gathered. LitServer, a free program designed specifically for keeping track of references, can be downloaded from the philosophical faculty of the University of Düsseldorf. References filed in this system may be copied easily into MS Word. Alternatively, a simple Word table or a system of cards may be used. Find the system which is best for you.

The bibliography should contain ALL references included in the paper. References not included in the text in any form should NOT be included in the bibliography.

The key to a good bibliography is consistency. Choose a particular convention and stick to this. If you wish to include a full-stop after the date of publication, make sure you do this consistently; alternatively if you wish to put a comma after the date, do this in all cases.

Bibliographical conventions:

What follows is one possible format which you may use for your bibliography. It follows linguistic conventions. The researchers' surnames are given first, followed by the initials of the researchers' first names. After the names follows the year. Titles of edited books, monographs and journals are given in italics. Details of the publishing house follows those of the place of publication. Take note of all commas, full-stops and formatting details (e.g. use of italics, etc.)

{eds.} is used when there is more than one editor; and {ed.} where there is only one editor. In German the abbreviation used is {Hrsg.} for {Herausgeber}.

* If a number of articles from a particular edited volume are included in the bibliography, there is no need to list the edited volume each time; instead the edited volume itself should be listed once and each reference from the volume in the following short format:
