Selected Antitrust Cases Irwin M. Stelzer, Howard P. Kitt, 1986 Explains with interesting concrete problems the manner in which economic theory is reflected in antitrust policy The leading decisions covered here have been edited to manageable proportions but retain the original language of the court Only those cases are given that truly represent landmark opinions The author explains the law as it stands now and provides information on the historical development of the attitude of the courts on the various legal economic issues In addition the author also includes dissenting opinions in order to provide a better understanding of the inherent complexities of the economic issues faced by the courts ISBN 0 256 03222 X 18 95

Grossman, 2004-01-01 Why do some cartels fail and others succeed This question has intrigued economists for a hundred years and they have created an extensive body of theory to help explain cartel behaviour This book looks at the experience of actual cartels and challenges their portrayal as found in the existing literature The eleven chapters by leading researchers of industrial organization study real examples of industrial collusion The authors investigate the formation behaviour activity and purpose of cartels and illustrate the intricacies of collusive relationships In the process they question the existing economic theory surrounding the operation of cartels which in practice do not always adhere to the textbook models or to complex game theoretic rules Although much economic research suggests that cartels are doomed to failure the authors find that there are many examples of industries where cartels have succeeded in controlling prices and output over a prolonged period of time The book is a groundbreaking attempt to study empirically a range of cartels throughout the world providing both historical and contemporary examples of collusion to enrich the arguments This book is written for academics policymakers lawyers and economists working in the fields of industrial organization and competition policy **Lexeconics** G.
