Course Description: This course will focus on the areas of process management and supply chain management. Within Process Management (PPM) we will focus on: (a) designing relationships between processes, inventory, order time, and throughput; (b) scheduling and planning process capacity; (c) monitoring process quality; (d) Supply Chain Management (SCM) and its extension (a time area of computer representation efficiently process capacity utilization); (e) how various financial and legal issues in a supply chain can be maintained using inventory model.

Course Objectives: This course is an introduction to Operations Management (OM), which focuses on the design and control of production systems within both production and service oriented organizations. Specifically, this course seeks to: (a) introduce students to the basic concepts of OM; (b) acquaint students with terminology in the area; and (c) prepare students to some operations modeling tools used in manufacturing OM.

Textbook (optional): Managing Supply with Demand – An Introduction to Operations Management, 4th Edition, Chase and Garibay
McGraw-Hill 2018

Classroom: A new package will be available in Target Center across from campus.

First or last semester? This is both options. The new package is required and necessary.

Equipment/Software Requirements: A laptop computer with college computing students pre-installed with a current copy of Microsoft Office 2019 or later.

Course Materials: will be a materials management office area. A new package is available at Target copy and includes a number of cases that will be discussed. Case studies will cover various combinations of questions for the various materials areas and students will have participation in the class discussion for each case. OM will ultimately be that management participants will be for the future of the entire organization.
