Lorenzo in Taos Mabel Dodge Luhan, 2007 Lorenzo in Taos is written loosely in the form of letters to and from D H Lawrence Frieda Lawrence Robinson Jeffers and Luhan The book is a highly personal and most informative account of an intense relationship with a great writer **Up in the Air** Greg J. Bamber, Jody Hoffer Gittel, Thomas A. Kochan, Andrew Von Nordenflycht, 2013-07-15 And you thought the passengers were mad Airline employees are fed up too with pay cuts increased workloads and management s miserly ways which leave workers to explain to often enraged passengers why flying has become such a miserable experience New York Times December 22 2007 When both an industry s workers and its customers report high and rising frustration with the way they are being treated something is fundamentally wrong In response to these conditions many of the world s airlines have made ever deeper cuts in services and their workforces Is it too much to expect airlines or any other enterprise to provide a fair return to investors high quality reliable service to their customers and good

jobs for their employees Measured against these three expectations the airline industry is failing In the first five years of the twenty first century alone U S airlines lost a total of 30 billion while shedding 100 000 jobs forcing the remaining workers to give up over 15 billion in wages and benefits Combined with plummeting employee morale shortages of air traffic controllers and increased congestion and flight delays a total collapse of the industry may be coming Is this state of affairs inevitable Or is it possible to design a more sustainable less volatile industry that better balances the objectives of customers investors employees and the wider society Does deregulation imply total abrogation of government s responsibility to oversee an industry showing the clear signs of deterioration and increasing risk of a pending crisis Greg J Bamber Jody Hoffer Gittel Thomas A Kochan and Andrew von Nordenflycht explore such questions in a well informed and engaging way using a mix of quantitative evidence and qualitative studies of airlines from North America Asia Australia and Europe Up in the Air provides clear and realistic strategies for achieving a better more equitable balance among the interests of customers employees and shareholders Specifically the authors recommend that firms learn from the innovations of companies like Southwest and Continental Airlines in order to build a positive workplace culture that fosters coordination and commitment to high quality service labor relations policies that avoid long drawn out conflicts in negotiating new agreements and business strategies that can sustain investor employee and customer support through the ups and downs of business cycles

Florence and Its Church in the Age of Dante George W. Dameron, 2013-05-27 By the early fourteenth century the city of Florence had emerged as an economic power in Tuscany surpassing even Siena which had previously been the banking center of the region In the space of fifty years during the lifetime of Dante Alighieri 1265 1321 Florence had transformed itself from a political and economic backwater scarcely keeping pace with its Tuscan neighbors to one of the richest and most influential places on the continent While many historians have focused on the role of the city s bankers and merchants in achieving these rapid transformations in Florence and Its Church in the Age of Dante George W Dameron emphasizes the place of ecclesiastical institutions communities and religious traditions While by no means the only factors to explain Florentine ascension no account of this period is complete without considering the contributions of the institutional church In Florence economic realities and spiritual yearnings intersected in mysterious ways A busy grain market on a site where a church once stood for instance remained a sacred place where many gathered to sing and pray before a painted image of the Virgin Mary as well as to conduct business At the same time religious communities contributed directly to the economic development of the diocese in the areas of food production fiscal affairs and urban development while they also provided institutional leadership and spiritual guidance during a time of profound uncertainty Addressing such issues as systems of patronage and jurisdictional rights Dameron portrays the working of the rural and urban church in all of its complexity Florence and Its Church in the Age of Dante fills a major gap in scholarship and will be of particular interest to medievalists church historians and Italianists

Masters of Mathematics Robert A. Nowlan, 2017-05-13

The original title for this work was *Mathematical Literacy: What Is It and Why You Need It* The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It's not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics
