Los Mayas De La Gruta De Loltun Yucatan:

Los mayas de la gruta de Loltún, Yucatán Ernesto González Licón, George F. Andrews, 1986 *Los mayas de la gruta de Loltún, Yucatán, a través de sus materiales arqueológicos* Ernesto González Licón, 1986 *Los mayas de la gruta de Loltún, Yucatán, a través de sus materiales arqueológicos* Ernesto González Licón, 1986 Exploring the Mesoamerican Subterranean Realm James E. Brady, Cristina Verdugo, 2025-09-01 Exploring the Mesoamerican Subterranean Realm brings together recent work and interpretations on the use of underground cavities by Mesoamerican pre-Columbian cultures demonstrating their invaluable cultural purpose. Case studies from across the region investigate the ways in which these highly charged points in the sacred landscape were the focus of countless political and religious activities. The volume expands the study of caves to focus on the broader realm of subterranean space, introducing the concept of the constructed subterranean—a space in which the Maya deliberately created sacred landmarks through excavation. Chapters critically examine chultuns previously thought to be subterranean storage chambers and sascaberas previously considered mines, demonstrating that the traditional archaeological models are deeply flawed. A wealth of data on both features is used to envision a new sacred landscape filled with thousands of subterranean sacred landmarks. Natural caves are also examined: a survey conducted around the ancient site of Yaxchilan considers the obvious importance of large stalagmites set up in the site core as monuments. Long-distance pilgrimages to these caves fundamentally reevaluate the nature of pilgrimage and reveal an economic and political importance that structured settlement and activities around the pilgrimage sites. Finally, evidence is analyzed to show that the human bones recovered from Midnight Terror Cave, Belize, were the result of human sacrifice. Dealing equally with the archaeology of both natural and constructed subterranean spaces, Exploring the Mesoamerican Subterranean Realm challenges preconceived notions of these spaces and their meanings, dramatically shifting the field's focus and extending the understanding of the critical importance of this dark side of archaeology. Ice Age Cave Faunas of North America Blaine W. Schubert, Jim I. Mead, Russell William Graham, Denver Museum of Nature and Science, 2003-11-10 This book gathers the findings of a number of studies on North American cave paleontology. Although not intended to be all-inclusive, Ice Age Cave Faunas of North America contains contributions that range from overviews of the significance of cave fossils to reports about new localities and studies of specific vertebrate groups. These essays describe how cave remains record the evolutionary patterns of organisms and their biogeography; how they can help reconstruct past ecosystems and climatic fluctuations; how they provide an important record of the evolution of modern ecosystems; and even how some of these caves contain traces of human activity. The book's eclectic nature should appeal to students, professional and amateur paleontologists, biologists, geologists, speleologists, and cavers. The contributors are Ticul Alvarez, Joaquin Arroyo Cabrales, Christopher J. Bell, Larry L. Coats, Jennifer Glennon, Wulf Gose, Frederick Grady, Russell Wm. Graham, Timothy H. Heaton, Carmen J. Jans, Langel Ernest L. Lundelius Jr., H. Gregory McDonald, Jim I. Mead, Oscar J. Polaco, Blaine W. Schubert.

Preclassic Origins of the Lowland Maya Debra S. Walker, 2023-04-15 Pre Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya summarizes archaeological researchers' current views on the adoption and first use of pottery across the Maya lowlands Covering the early Middle Preclassic period when communities began using and producing pottery for the first time roughly 1000-600 BC through to the establishment of a recognizably Maya tradition termed the Mamom ceramic sphere about 600-300 BC the book demonstrates that the adoption was broadly contemporary with variation in how the new technology was adapted locally Analyzing ceramics found at sites in Belize, Petén, Guatemala and Mexico the contributors provide evidence that the pre Mamom expansion of pottery resulted from increased dependence on maize agriculture exploitation of limestone caprock and greater reliance on a preexisting system of long distance exchange The chapters describe the individual experiences of new potting communities at various sites across the region They are supplemented by appendixes presenting key chronological data as well as the principal types and varieties of pre Mamom ceramic complexes across the various spheres Xe Eb, Swasey, Cunil and Ek A significant amount of new material has been excavated in the last decade changing what is known about the early Middle Preclassic period and making Pre Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya a first read of the early ceramic prehistory of the Maya lowlands It will be a valuable resource for students and scholars interested in the archaeology of the Maya lowlands Mesoamerican social complexity and ceramic technology Contributors E Wyllys Andrews V, Jaime Awe, George J. Pathways to Complexity M. Kathryn Brown, George J. Bey III, 2021-04-27 Pathways to Complexity synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture In this volume prominent Maya scholars argue that the development of social religious and economic complexity began during the Middle Preclassic period 1000 300 B C hundreds of years earlier than previously thought Contributors reveal that villages were present in parts of the lowlands by 1000 B C challenging the prevailing models estimating when civilization took root in the area Combining recent discoveries from the northern lowlands an area often neglected in other volumes and the southern lowlands the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period They show that communities evolved in different ways due to influences such as geographical location ceramic exchange shell ornament production agricultural strategy religious ritual ideology and social rankings These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period Presenting exciting work on a dynamic and poorly understood time period Pathways to Complexity demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation Contributors M Kathryn Brown Dr George Bey III Tara Bond Freeman Fernando Robles Castellanos Tomas Gallareta Negron E Wyllys Andrews V Anthony Andrews David S Anderson Lauren Sullivan Jaime J Awe James F Garber Mary Jane Acu a William Saturno Bobbi Hohmann Terry Powis Paul Healy Richard Hansen Donald W Forsyth David Freidel Barbara Arroyo Richard E W Adams A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase
