the Victorian Interpretation of Racial Conflict James Belich, 2015-02-16 First published in 1986 James Belich's groundbreaking book and the television series based upon it transformed New Zealanders' understanding of New Zealand's great civil war struggles between Maori and Pakeha in the 19th century. Revealing the enormous tactical and military skill of Maori and the inability of the Victorian interpretation of racial conflict to acknowledge those qualities, Belich's account of the New Zealand Wars offered a very different picture from the one previously given in historical works. This bestselling classic of New Zealand history and Belich's larger argument about the impact of historical interpretation resonates today.

Historical Dictionary of the Discovery and Exploration of the Pacific Islands Max Quanchi, John Robson, 2005-10-18 The South Seas as this region used to be called conjured up images of adventure, belles and savages, romance and fabulous fortunes, but the long voyages of discovery and exploration of the vast Pacific Ocean were really an exercise in amazing logistics, navigation, hard grit, shipwreck and pure luck. The motivations were scientific and geographic but at the same time nationalistic and materialistic. A series on global exploration and discovery would not be complete without this book by Quanchi and Robson. It is ambitious and informative and includes the familiar names of Laperouse, Bougainville, Cook and Dampier as well as the intriguing stories of the Bounty, Mutiny, scurvy and the mysterious Northwest Passage, Terra Australis, Ignatia and Davis Land. There are entries on first contacts, ships, navigational instruments, mapping and botany. The scene is carefully set in the introduction, the chronology spans several centuries and the extensive bibliography offers a guide to further reading. There are more than just dry facts in this book. It has a whiff of salt air, the clash of empires, cross-cultural beach encounters and personal adventure. **Source Book for Social Origins** William Isaac Thomas (ed), 1909

International Relations and Heritage Rodrigo Christofolletti, Maria Leonor Botelho, 2021-08-30 Patchwork in times of plurality encompasses the multitude of actions as a revealing symbol of ethos, actors, organisms and manifestations of preservation and dialogue frontiers. This plural metaphor, almost like a patchwork, aggregates and yet segregates, conforms but disfigures and boosts the meanings which represent this new field that international relations have been recently crossing. Just like the mirror metaphor that reflects everything to all and sometimes intervenes in distortions, the patchwork analogy allowed the book to take responsibility for the disclosure of preservation actions on a global scale. The book has a pioneering role insofar as it is the only publication with such characteristics, concerns and coverage. The work studies the interconnection between cultural properties and international relations by understanding them as a mosaic before the bridges that intertwine people and borders. The main goal of this work is to illustrate in what way intergovernmental relations have been privileging heritage and culture as acting fields for its broader needs. Therefore, the book addresses topics related to the international agenda, focusing on its less debated themes. Two examples of these undervalued matters are the link between actors' preservationist actions and the universe of world cultural heritage. The book also pursues a critical dialogue between interdisciplinary fields that narrow heritage frontiers in search to contribute with a spectrum of academic

perspectives and inter national study cases To serve distinct economic social or political purposes institutionalized heritage embodied by different values becomes instrumentalized in a top down direction In a development frame when we perceive culture as indispensable to human life the past is transformed into exchange currency Through the creation of alternative fields of action usually in a bottom up logic the present builds new heritage connections Digital heritage s preservation dissemination and appreciation have been representing these same nets
