Merchant Enterprise In Britain From The Industrial Revolution To World War I:

Merchant Enterprise in Britain Stanley Chapman, 1992 Studies of the British Industrial Revolution and of the Victorian period of economic and social development have until very recently concentrated on British industries and industrial regions while commerce and finance and particularly that of London have been substantially neglected This has distorted our view of the process of change since financial services and much trade continued to be centred on the metropolis and the south east region never lost its position at the top of the national league of wealth

British Entrepreneurship in Poland Sarah Dietz, 2016-03-09 Drawing upon an impressive range of international sources this book explores the late nineteenth century partnership between Bradford worsted manufacturers the Briggs brothers and the German merchant Ernst Posselt and their subsequent foreign direct investment in a modern factory and workers community at Marki near Warsaw in Poland Protectionism and increasing foreign competition are discussed among many complex economic pressures on British industry as likely catalysts for this enterprise and the general historiography of the Polish lands is explored to reveal a climate of extraordinary opportunity for well capitalised foreign industrialists in this period British Polish and German press and archival documents as well as Russian police and factory inspectors reports reveal the everyday experience of Polish factory workers and British consular correspondence provides fascinating insight into the machinations of the entrepreneurs and Warsaw s cosmopolitan business community Through the development and domination of market and raw materials sources this venture is shown to have monopolised worsted manufacture in the Russian Empire using state of the art technology to create and modern marketing techniques to promote its product range and evolving image Marki was described in 1886 as a second edition of Saltaire and latterly as the Polish Bournville or Port Sunlight thus aspects of British and Polish social history are compared to assess the efficacy of introducing the model community concept in combination with a radical employment policy to less industrially developed Poland The experiences of an expatriate community of skilled Yorkshire foremen and their instrumentality in diffusing British industrial technology throughout the Russian Empire are described Against a backdrop of political instability and social upheaval which dramatically impacted on business behaviour after 1905 and particularly during the interwar period of

The Foundations of Worldwide Economic Integration Christof Dejung, Niels P. Petersson, 2013-01-07 Discusses worldwide economic integration between 1850 and 1930 challenging the popular description of the period after 1918 as one of deglobalisation

Commerce and Culture Robert Lee, 2016-05-23 Considerable attention has recently been focused on the importance of social networks and business culture in reducing transaction costs both in the pre industrial period and during the nineteenth century This book brings together twelve original contributions by scholars in the United Kingdom continental Europe and North America which represent important and innovative research on this topic They cover two broad themes First the role of business culture in determining commercial success in particular the importance of familial religious ethnic and associational connections in the working

lives of merchants and the impact of business practices on family life Second the wider institutional and political framework for business operations in particular the relationship between the political economy of trade and the cultural world of merchants in an era of transition from personal to corporate structures These key themes are developed in three separate sections each with four contributions They focus in turn on the role of culture in building and preserving businesses the interplay between institutions networks and power in determining commercial success or failure and the significance of faith and the family in influencing business strategies and the direction of merchant enterprise The wider historiographical context of the individual contributions is discussed in an extended introductory chapter which sets out the overall agenda of the book and provides a broader comparative framework for analysing the specific issues covered in each of the three sections Taken together the collection offers an important addition to the available literature in this field and will attract a wide readership amongst business cultural maritime economic social and urban historians as well as historical anthropologists sociologists and other social scientists whose research embraces a longer term perspective

A Brief History of Commercial Capitalism Jairus Banaji, 2020-07-07 The rise of capitalism to global dominance is still largely associated by both laypeople and Marxist historians with the industrial capitalism that made its decisive breakthrough in 18th century Britain Jairus Banaji's new work reaches back centuries and traverses vast distances to argue that this leap was preceded by a long era of distinct commercial capitalism which reorganised labor and production on a world scale to a degree hitherto rarely appreciated Rather than a picture centred solely on Europe we enter a diverse and vibrant world Banaji reveals the cantons of Muslim merchants trading in Guangzhou since the eighth century the 3 000 European traders recorded in Alexandria in 1216 the Genoese Venetians and Spanish Jews battling for commercial dominance of Constantinople and later Istanbul We are left with a rich and global portrait of a world constantly in motion tied together and increasingly dominated by a pre industrial capitalism The rise of Europe to world domination in this view has nothing to do with any unique genius but rather a distinct fusion of commercial capitalism with state power Empire of Cotton Sven Beckert, 2014-12-02 The epic story of the rise and fall of the empire of cotton its centrality to the world economy and its making and remaking of global capitalism Cotton is so ubiquitous as to be almost invisible yet understanding its history is key to understanding the origins of modern capitalism Sven Beckert's rich fascinating book tells the story of how in a remarkably brief period European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry combining imperial expansion and slave labor with new machines and wage workers to change the world Here is the story of how beginning well before the advent of machine production in the 1780s these men captured ancient trades and skills in Asia and combined them with the expropriation of lands in the Americas and the enslavement of African workers to crucially reshape the disparate realms of cotton that had existed for millennia and how industrial capitalism gave birth to an empire and how this force transformed the world The empire of cotton was from the beginning a fulcrum of constant global struggle

between slaves and planters merchants and statesmen workers and factory owners Beckert makes clear how these forces ushered in the world of modern capitalism including the vast wealth and disturbing inequalities that are with us today The result is a book as unsettling as it is enlightening a book that brilliantly weaves together the story of cotton with how the present global world came to exist

A Mad, Bad, and Dangerous People? Boyd Hilton, 2006-02-16 This was a transformative period in English history In 1783 the country was at one of the lowest points in its fortunes having just lost its American colonies in warfare By 1846 it was once more a great imperial nation as well as the world's strongest power and dominant economy having benefited from what has sometimes if misleadingly been called the first industrial revolution In the meantime it survived a decade of invasion fears and emerged victorious from more than twenty years of war to the death against Napoleonic France But if Britain's external fortunes were in the ascendant the situation at home remained fraught with peril The country's population was growing at a rate not experienced by any comparable former society and its manufacturing towns especially were mushrooming into filthy disease ridden gin sodden hell holes in turn provoking the phantasmagoria of a mad bad and dangerous people It is no wonder that these years should have experienced the most prolonged period of social unrest since the seventeenth century or that the elite should have been in constant fear of a French style revolution in England The governing classes responded to these new challenges and by the mid nineteenth century the seeds of a settled two party system and of a more socially interventionist state were both in evidence though it would have been far too soon to say at that stage whether those seeds would take permanent root Another consequence of these tensions was the intellectual engagement with society as for example in the Romantic Movement a literary phenomenon that brought English culture to the forefront of European attention for the first time At the same time the country experienced the great religious revival loosely described under the heading evangelicalism Slowly but surely the raffish and rakish style of eighteenth century society having reached a peak in the Regency then succumbed to the new norms of respectability popularly known as Victorianism

International Bibliography of Business History Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians

A History of Water Rights at Common Law Joshua Getzler, 2004 This volume describes how the courts created rights for land owners and users

competing to appropriate water for factories town supply drainage and transport It covers the period from early times to the late nineteenth century illustrating the changing common law of property and tort and throwing new light on the growth of the economy and the social and legal dimensions of technological innovation

Imperial Odessa: Peoples, Spaces, Identities Evrydiki Sifneos, 2017-09-25 Imperial Odessa Peoples Spaces Identities is a book about a cosmopolitan city written by a cosmopolitan scholar with a literary flair Evrydiki Sifneos conceives Odessa as more of a fin de si cle east Mediterranean port metropolis than as a provincial port city of the Russian Empire in the nineteenth century due to two of its principal characteristics its function as a hub of international trade and travel and the multi ethnic character of its inhabitants The book unfolds around two interpenetrating axes The first one introduces a new peripatetic approach that discovers the space of the city and the other the one that has given it its dynamic is the socio economic transformations that germinated within the political changes

Russian Overseas Commerce with Great Britain During the Reign of Catherine II Herbert H. Kaplan, 1995 Finally Kaplan persuasively argues that Britain s military supremacy crucially depended on its receiving an uninterrupted supply of Russian manufactured and natural resources

Breaking Into the Monopoly Yukihsa Kumagai, 2012-11-08 In Breaking into the Monopoly Yukihsa Kumagai examines how the commercial pressure groups of Glasgow Liverpool and Manchester organised campaigns to end the British East India Company s monopoly from 1812 1813 and 1829 1833

The British in Argentina David Rock, 2018-11-29 Drawing on largely unexplored nineteenth and twentieth century sources this book offers an in depth study of Britain s presence in Argentina Its subjects include the nineteenth century rise of British trade merchants and explorers of investment and railways and of British imperialism Spanning the period from the Napoleonic Wars until the end of the twentieth century it provides a comprehensive history of the unique British community in Argentina Later sections examine the decline of British influence in Argentina from World War I into the early 1950s Finally the book traces links between British multinationals and the political breakdown in Argentina of the 1970s and early 1980s leading into dictatorship and the Falklands War Combining economic social and political history this extensive volume offers new insights into both the historical development of Argentina and of British interests overseas

Migrant City Panikos Panayi, 2020-04-07 The first history of London to show how immigrants have built shaped and made a great success of the capital city London is now a global financial and multicultural hub in which over three hundred languages are spoken But the history of London has always been a history of immigration Panikos Panayi explores the rich and vibrant story of London from its founding two millennia ago by Roman invaders to Jewish and German immigrants in the Victorian period to the Windrush generation invited from Caribbean countries in the twentieth century Panayi shows how migration has been fundamental to London s economic social political and cultural development Migrant City sheds light on the various ways in which newcomers have shaped London life acting as cheap labour contributing to the success of its financial sector its curry houses and its football clubs London s economy has long been driven by migrants from

earlier continental financiers and more recent European Union citizens Without immigration fueled by globalization Panayi argues London would not have become the world city it is today

The Crucible of Revolutionary and Napoleonic Warfare and European Transitions to Modern Economic Growth, 2021-12-13 Historiographically this book rests on the fact that European transitions to modern economic growth were obstructed and promoted by the Revolution in France and 15 years of geopolitical conflict sustained by Napoleon in order to establish French Hegemony over the states and economies of Britain France Germany the Netherlands Italy Spain Portugal and overseas commerce The chapters reveal that their authors concerns to analyse both the nature and significance of connections between geopolitical and economic forces lend coherence to a collaborative endeavour utilising comparative methods to address a mega question What might be plausibly concluded about the economic costs and the benefits of this protracted conjuncture of Revolutionary and Napoleonic Warfare Contributors are Patrick Karl O'Brien Loïc Charles Guillaume Daudin Silvia Marzagalli Marjolein t Hart Johan Joor Mark Dincecco Giovanni Federico Leandro Prados de la Escosura Carlos Santiago Caballero Cristina Moreira Jaime Reis Rita Martins de Sousa and Peter M Solar

Fuelling Empire Karl Ittmann, 2025-05-26 Beginning in the late nineteenth century British companies used the resources of empire to create an imperial oil industry that controlled 20% of global oil reserves by 1939 and allowed for the movement of capital and labor between regions and companies The imperial oil complex encompassed colonies Burma and Trinidad and dependent states Iraq and Iraq In both the imperial state used its political and military power to support British oil interests The oil complex drew on the resources of empire but also bolstered it with profits and tax revenues while a global set of oil sites supplied the British military and civilian consumers British companies built an infrastructure of oil production that gave them quasi state power in oil regions while connecting these areas to global and imperial networks of communication and transportation Fueling Empire highlights the significance of Britain to the development of the global oil industry It demonstrates the ways in which the global histories of oil and empire are inextricably interlinked The imperial oil complex relied on a racially stratified hierarchy of labour where white supervisors managed indigenous and migrant workers The harsh conditions of work and low pay fuelled labour conflicts that resonated with emerging colonial nationalist movements that sought to limit the power of oil companies Despite robust private and state security operations the imperial oil complex faced greater insecurity before World War II While the imperial oil complex survived the war in the postwar era decolonization and Britain's financial weakness led to its decline

British Cotton Textiles: Maturity and Decline David Higgins, Steven Toms, 2018-11-09 This book examines the decline of the cotton textiles industry which defined Britain as an industrial nation from its peak in the late nineteenth century to the state of the industry at the end of the twentieth century Focusing on the owners and managers of cotton businesses the authors examine how they mobilised financial resources their attitudes to industry structure and technology and their responses to the challenges posed by global markets The origins of the problems which forced the industry into decline are not found in any

apparent loss of competitiveness during the long nineteenth century but rather in the disastrous refloating after the First World War. As a consequence of these speculations, rationalisation and restructuring became more difficult at the time when they were most needed and government intervention led to a series of partial solutions to what became a process of protracted decline. In the post 1945 period, the authors show how government policy encouraged capital withdrawal rather than encouraging the investment needed for restructuring. The examples of corporate success since the Second World War, such as David Alliance and his Viyella Group, exploited government policy, access to capital markets and closer relationships with retailers but were ultimately unable to respond effectively to international competition and the challenges of globalisation. The chapters in this book were originally published in *Business History and Accounting Business and Financial History*. *Indian Business in the Twentieth Century* Swapnesh K. Masrani, Carlo J. Morelli, Amiya K. Bagchi, 2022-09-29. This book uses a combination of business history and political economy to chart the development of Indian business organisation from independence in 1947 through to the twenty-first century. The Indian economy has undergone a dramatic transformation to become one of the leading global economies of the twenty-first century. After ending colonisation and gaining independence in 1947, the economy moved from a reliance on the export of raw materials to an era of state-promoted development followed by an era of liberalisation and integration in the world economy by the close of the twentieth century. This book looks at traditional industries such as textiles to industries of the second and third industrial revolution ranging from chemicals and oils to telecommunications. This book highlights how Indian businesses proved capable of importing both new managerial ideas and organisational developments while adapting them to the specific domestic context. The case studies underline the use of human resource management in the post-colonial Indianisation of foreign-owned multinationals and the rise of new business organisation and management training in the development of Indian multinational organisations such as Tata Sons. The chapters in this book were originally published as a special issue of *Business History*.

Entrepreneurship in the Age of Empire Sarah Dietz, 2020-12-30. Exploring the interplay of politics and commerce in one of the most dynamic periods of British history, this book traces the fortunes of the India and Eastern Trading Company Limited, established in 1906 to finance a jute plantation in Assam, north-east India. In a watershed period for commercial culture as family capitalism and industrial economics gave way to a predominance of speculative investment and the marketing of ideas, analysis of this London-registered company and its international management forms a lens through which to view the broader socio-political and economic environment of the late Victorian period to the interwar. Mapping the eclectic bonds that created a network of association between a multinational cast of merchants, company promoters, mining engineers, politicians and industrialists reveals the multiplicity of strands which coalesced to create one share company. By examining their responses to the opportunities created by colonialism, to enabling legislations and set-backs to competition and collaboration, internationalism versus rising nationalism, an important era in British history is examined from an entirely

fresh perspective The history of the India and Eastern Trading Company Limited is a tale of cloaked agendas of land speculation under the guise of colonial agriculture of German and Russian interests embedded in British empire prospects which exposes the intrigues of some of the most infamous imperialists of the era figures who were the subject of intense academic scrutiny throughout the twentieth century and remain at the forefront of impassioned debate in the twenty first

City Bankers, 1890-1914 Youssef Cassis, 1994-09-15 City Bankers 1890 1914 is a major contribution to a controversial area of economic history and to the debate about the nature of British society in the late Victorian and Edwardian eras It provides a detailed analysis of the banking community of London between 1890 and 1914 when the City of London was the undisputed financial centre of the world
