## **Merchants And Capitalists:**

**Creating A World Economy** Alan K. Smith, 2019-04-02 This is an exploration in world history that examines complex and intriguing questions concerning the origins of the first truly global economy centered in Europe which served in turn as a solid basis for the later emergence of the modern world system Professor Smith first examines the remarkable progress achieved by many cultures around the world achievements that for some time far exceeded anything then found in Europe The study then probes beyond traditionalism as a sufficient explanation of the inability of these societies to maintain the economic momentum that had begun so auspiciously and carefully examines the experience of European societies by way of comparison finding that remarkably similar processes tended to unfold at first regions of Europe that made the earliest gains in material progress were like other parts of the world unable to sustain these advances Still in some parts of Europe particularly the Netherlands and England a new alignment of social forces was yielding the social system that would eventually evolve into capitalism This breakthrough allowed for continued dynamic material progress particularly for the English Able to establish an unprecedented commercial dominance in vast reaches of the world the British found themselves at the hub of a new world economy much more complex than any earlier intercultural commercial system The book delineates the systemic roles assumed by the various regions of the world and by European merchant capital and explains the tensions within this system that ensured its continued dynamism and eventual transformation into the current world economic system Creating a World Economy combines an epic sweep with a mastery of historical detail and is sure to stimulate discussion among sociologists and historians interested in questions of a global nature

**Peasants, Landlords and Merchant Capitalists** Peter Kriedte, 1983

**The Merchants' Capital** Scott P. Marler, 2013-04-29 This study examines the crucial role of merchants in the rise and decline of New Orleans during the nineteenth century

**Fruits of Merchant Capital** Elizabeth Fox-Genovese, Eugene D. Genovese, 1983

**Merchants and Capitalists** David M. Gordon, 1985

**Capitalism and Politics in Russia** Thomas C. Owen, 2008-12-18 This monograph based largely on memoirs diaries archival documents and other primary sources represents a comprehensive social history of the Moscow merchants in the period between 1855 and 1905 The author first examines the essential aspects of traditional merchant culture in the early nineteenth century He then discusses the emergence of capitalist manufacturers and traders a group who implemented modern business techniques in the 1840s without however adopting the political liberalism of the western bourgeoisie Committed to economic modernisation as a means of redressing Russia's humiliation in the Crimean War these merchants cooperated with sympathetic intellectuals in railroad management banking journalism and the struggle to gain tariff protection The study concludes with an analysis of the bourgeois class consciousness that resulted from the Moscow commercial industrial leaders conflicts with both the tsarist government and the militant labour movement during the Revolution of 1905 Owen contributes to discussions about the distinctive features of Russian social and economic

development in the final years of the Russian Empire      **Peasants, Landlords and Merchants Capitalists** Peter Kriedte,1983-09-08      A Companion To Marx's Capital, Volume 2 David Harvey,2013-12-17 The biggest financial crisis since the Great Depression shows no sign of coming to a close and Marx s work remains key in understanding the cycles that lead to recession For nearly forty years David Harvey has written and lectured on Capital becoming one of the world s most foremost Marx scholars Based on his recent lectures and following the success of his companion to the first volume of Capital Harvey turns his attention to Volume 2 aiming to bring his depth of learning to a broader audience guiding first time readers through a fascinating and hitherto neglected text Whereas Volume 1 focuses on production Volume 2 looks at how the circuits of capital the buying and selling of goods realize value This is a must read for everyone concerned to acquire a fuller understanding of Marx s political economy      Digital Transformation in Islamic Finance Yasushi Suzuki,Mohammad Dulal Miah,2022-12-30 The ongoing digital transformation is shaping the Islamic mode of financial intermediation and the impact on the faith based financial mode has been multifaceted This has raised a host of interesting questions what is the degree of penetration of Islamic finance in the fintech industry Are Islamic financial institutions IFIs or banks ready to embrace fintech Is fintech an enabler or barrier to achieve the intended purpose of Islamic finance Will technology narrow the division between Islamic and conventional finance in the future These are existential questions for Islamic finance and the book endeavors to examine the impact of financial technology on the industry The book assesses various fintech business models and how they could be a threat or an opportunity It also examines whether fintech provides IFIs an edge to serve clients following the Shariah norms and how the adoption of fintech in the Islamic mode is required for meeting the maqasid Al Shariah The book discusses applicability of fintech like blockchain digital currency big data and AI to different branches of Islamic finance This book will interest students analysts policymakers and regulators who are working on Islamic finance financial economics Islamic economics and development finance      **The Trading World of the Tamil Merchant** Kanakalatha Mukund,1999 The book focuses on the changes in the trading world of the Tamil merchants in the southern Coromandel region with the arrival of European trading companies and the concomitant creation of European port enclaves and the rapid expansion of demand for Coromandel cotton textiles The author uses impressive range of original sources literary inscriptional and archival to cover a long period of history beginning with the maritime trade in the Sangam period to argue that the merchants evolved over the centuries into a distinct class of merchant capitalists with a conscious perception of their identity as an economic and social class      Capitalism and Migration Nestor Rodriguez,2023-01-01 This book explores the role of capital and labor migration in the expansion of the capitalist world system It presents comprehensive case studies on various historical periods of hegemony recognized by world system theory the Dutch hegemony 1625 1675 British hegemony 1815 1873 and US hegemony 1945 1970 Moreover the book identifies an earlier period of economic dominance in Western Europe when merchant bankers from Florence dominated the regional wool trade in the early

thirteenth century In these four intervals of dominance i e from the medieval period to the late twentieth century capital and labor migration formed the basis of capitalist development in the hegemonic core states as well as in peripheral regions under their economic and political influence In turn the book analyzes the migration patterns associated with the rise of hegemony from the perspectives of class relations between employers and workers technological advances at the workplace economic cycles and state policies on labor migration It concludes with a projection that heightened migration will continue to characterize the capitalist world system especially as many poor and displaced populations in peripheral regions resort to migration for survival Accordingly it appeals to scholars in the fields of politics sociology history anthropology and economics who are interested in globalization and world system analysis      **Miners and Merchants in Bourbon Mexico 1763-1810**

D. A. Brading,1971-05-02 The aim of this study is to define that distinctive blend of enlightened despotism and entrepreneurial talent which created Bourbon Mexico The period 1763 1810 was a crucial and distinctive stage in the colonial history of Mexico Jose de G lvez the dynamic minister of the Indies transformed the system of government and restructured the economy The ensuing golden age far from being the culmination of two hundred years of steady development sprang rather from a profound regeneration of the New World s Hispanic society The chief success of G lvez s policy was the unprecedented mining boom which made Mexico the world s chief silver producer It was this silver boom which largely financed the revival of the political and economic power of the Spanish monarchy and in Mexico itself created a new aristocracy of merchant capitalists and silver millionaires      *Capital* Karl Marx,1909      **Socializing Capital** William G. Roy,1999-07-01 Ever since Adolph Berle and Gardiner Means wrote their classic 1932 analysis of the American corporation The Modern Corporation and Private Property social scientists have been intrigued and challenged by the evolution of this crucial part of American social and economic life Here William Roy conducts a historical inquiry into the rise of the large publicly traded American corporation Departing from the received wisdom which sees the big vertically integrated corporation as the result of technological development and market growth that required greater efficiency in larger scale firms Roy focuses on political social and institutional processes governed by the dynamics of power The author shows how the corporation started as a quasi public device used by governments to create and administer public services like turnpikes and canals and then how it germinated within a system of stock markets brokerage houses and investment banks into a mechanism for the organization of railroads Finally and most particularly he analyzes its flowering into the realm of manufacturing when at the turn of this century many of the same giants that still dominate the American economic landscape were created Thus the corporation altered manufacturing entities so that they were each owned by many people instead of by single individuals as had previously been the case      *A Brief History of Commercial Capitalism* Jairus Banaji,2020-07-07 The rise of capitalism to global dominance is still largely associated by both laypeople and Marxist historians with the industrial capitalism that made its decisive breakthrough in 18th century Britain Jairus Banaji s new work reaches back

centuries and traverses vast distances to argue that this leap was preceded by a long era of distinct commercial capitalism which reorganised labor and production on a world scale to a degree hitherto rarely appreciated. Rather than a picture centred solely on Europe we enter a diverse and vibrant world. Banaji reveals the cantons of Muslim merchants trading in Guangzhou since the eighth century, the 3 000 European traders recorded in Alexandria in 1216, the Genoese, Venetians and Spanish Jews battling for commercial dominance of Constantinople and later Istanbul. We are left with a rich and global portrait of a world constantly in motion, tied together and increasingly dominated by a pre industrial capitalism. The rise of Europe to world domination in this view has nothing to do with any unique genius but rather a distinct fusion of commercial capitalism with state power.

*A World Safe for Capitalism* Cyrus Veese, 2002. A World Safe for Capitalism unravels a little known incident: a Wall Street corporation's takeover of the foreign debt, national railroad and national bank of the Dominican Republic in the 1890s. Working with the republic's tyrannical president, the American firm tried to turn self-sufficient peasants into cash crop farmers with disastrous results. By 1904 the company's narrow pursuit of profit clashed with Theodore Roosevelt's goal of making the United States a great power, thus triggering a sweeping new policy: the Roosevelt Corollary to the Monroe Doctrine. Praised by *Diplomatic History* as a model of globe-trotting multi-archival research, this exciting history covers events in New York, Washington, Santo Domingo, Brussels and London.

**The American Road to Capitalism** Charles Post, 2011-03-21. This book synthesizes Marxian theory with the existing historical literature to produce a new analysis of the origins of capitalism in the US and the social roots of the US Civil War.

*The Economic Institutions of Capitalism* Oliver E. Williamson, 1985. This long-awaited sequel to the modern classic *Markets and Hierarchies* develops and extends Williamson's innovative use of transaction cost economics as an approach to studying economic organization by applying it to work and labor as well as the corporation itself. In addition, Williamson explores its growing implications for public policy, including its potential influence on antitrust and merger guidelines, labor policy and SEC and public utility regulations.

*The Birth of Capitalism* Henry Heller, 2011-08-04. In the light of the deepening crisis of capitalism and continued non-Western capitalist accumulation, Henry Heller re-examines the debates surrounding the transition from feudalism to capitalism in Europe and elsewhere. Focusing on arguments about the origin, nature and sustainability of capitalism, Heller offers a new reading of the historical evidence and a critical interrogation of the transition debate. He advances the idea that capitalism must be understood as a political as well as an economic entity. This book breathes new life into the scholarship, taking issue with the excessively economic approach of Robert Brenner, which has gained increasing support over the last ten years. It concludes that the future of capitalism is more threatened than ever before. The new insights in this book make it essential reading for engaged students and scholars of political economy and history.
