

# SCIENCE LESSON PLAN: BRIDGE

NAME: \_\_\_\_\_

DATE: \_\_\_\_\_

## OBJECTIVE

Students will work together to build a freestanding (not connected to anything for stability and without piers/support structures along the span) bridge that is at least -- cm. long. [Distance can be determined based on the materials being used and the age/grade of the students.]

## TESTING

Each group of students should describe their bridge design elements to the class and demonstrate that it is able to stand freely for a specific period of time. You can use blocks or books to create the space that must be crossed or you can use two desks that are a specific distance apart.

**Note:** Since some bridges are likely to fall apart if a load competition is held, it is recommended that photographs are taken of each of the bridges, from a variety of angles.

## MATERIALS

Be creative- choose supplies that are available to you and should be limited on budget. Popular materials for bridge building challenges are:

- Spaghetti noodles and marshmallows
- Newspaper and tape
- Cardboard and tape
- Toothpicks and gumdrops
- Popsicle sticks and glue
- Straws
- Other supplies that can be available include: scissors, meter stick

## REFLECTION

- Did your team build the bridge that was on the original design sheet? If no, what did you need to change?
- Which elements of your final design worked well?
- List materials or tools that you wish you would have had to make the bridge building process more successful.
- If you could change anything that your team did when responding to the challenge it would be: What was the best part of the bridge challenge?

is that each of these sections can be self supporting so their appearance in the text doesn't represent the order in which they must be read. Ideally the reader would engage in the introduction then select the section that addresses the dimension influencing classroom inquiry that is of greatest importance. The only exception to this is section 6 which is a specific form of enactment of classroom inquiry engagement with this section may be best augmented after reading the sections that interest you.
