Message Effects Research Sally Ann Jackson, 1992-05-15 Messages such as ads speeches news stories school curricula or even remarks made in a conversation have distinct properties or effects The study of these effects and their reporting as generalized claims is a primary task of communication research In this fascinating and controversial new work Sally Jackson critiques the methodology behind such claims and lays the groundwork for a methodological alternative Central to this is the notion that methodology must be tailored to the special characteristics of a field s objects of study To shape the methodology she argues it is necessary to examine the kinds of claims the researcher wishes to make and the threats to validity that affect such claims

Russell Neuman, 2016-06-06 The Digital Difference examines how the transition from the industrial era media of one way publishing and broadcasting to the two way digital era of online search and social media has affected the dynamics of public life In the digital age fundamental beliefs about privacy and identity are subject to change as is the formal legal basis of freedom of expression Will it be possible to maintain a vibrant and open marketplace of ideas In W Russell Neuman s analysis the marketplace metaphor does not signal that money buys influence but rather just the opposite that the digital commons must be open to all ideas so that the most powerful ideas win public attention on their merits rather than on the taken for granted authority of their authorship Well documented methodical provocative and clear The Digital Difference deserves a prominent place in communication seminars and graduate courses in research methods because of its reorientation of media effects research and its application to media policy making John P Ferr Journalism and Mass Communication Quarterly
