**Metacognition** Janet Metcalfe, 2013-11-26 This special issue on the psychology of knowing about knowing bridges the parallels between social and cognitive psychology. It further illustrates the benefits of pursuing in depth these connections and the phenomena and implications associated with them. *Handbook of Metacognition in Education* Douglas J. Hacker, John Dunlosky, Arthur C. Graesser, 2009-06-15 Providing comprehensive coverage of the theoretical bases of metacognition and its applications to educational practice, this compendium of focused and in depth discussions from leading scholars in the field represents an intersection of education, cognitive science, and technology. It serves as a gateway to the literature for researchers and practitioners interested in one or more of the wide array of topics included and sets the standard for scholarship for theoretical research and practical applications in this field. The *Handbook of Metacognition in Education* covering Comprehension Strategies, Metacognitive Strategies, Metacomprehension, Writing, Science, and Mathematics, Individual Differences, Self-Regulated Learning, Technology, Tutoring, and Measurement is an essential resource for researchers, faculty, students, curriculum developers, teachers, and others interested in using research and theory on metacognition to guide and inform educational practice.

**Social Metacognition** Pablo Briñol, Kenneth DeMarree, 2012-04-27 Metacognition refers to thinking about our own thinking. It has assumed a prominent role in social judgment because our thoughts about our thoughts can magnify, attenuate, or even reverse the impact of primary cognition. Metacognitive thoughts can also produce changes in thought, feeling, and behavior and thus are critical for a complete understanding of human social behavior. The present volume presents the most important and advanced research areas in social psychology where the role of metacognition has been studied. Specifically, the chapters of this book are organized into four substantive content areas: Attitudes and Decision Making, Self and Identity, Experiential and Interpersonal. Each section consists of several chapters summarizing much of the work done in recent decades on critical topics such as attitude strength, persuasion, bias correction, self-regulation, subjective feelings, embodiment, and prejudice, among others. This book also emphasizes interpersonal aspects of metacognition as they play an essential role in close relationships, groups, consumer and clinical interactions. Each chapter is written by an expert in the field and presents a state-of-the-art view of the many ways metacognition has been examined by social psychologists.

her field through the lens of perceived control and shows how these insights can be applied in practice Handbook of Brand Relationships Deborah J. MacInnis, C. Whan Park, Joseph W.
