Metaphor And Iconicity:

Metaphor and Iconicity M. Hiraga, 2004-12-10 Metaphor and Iconicity attempts to clarify the interplay of metaphor and iconicity in the creation and interpretation of spoken and written texts from a cognitive perspective There are various degrees in which metaphor and iconicity manifest themselves ranging from sound symbolism and parallelism in poetic discourse to word order inflectional forms and other grammatical structures in ordinary discourse The book makes unique contributions to the study of the relationship of form and meaning

Metaphor and Iconicity Masako K. Hiraga, Joanna Radwańska Williams, 1994

Language from the Body Sarah F. Taub, 2001-02-26 What is the role of meaning in linguistic theory Generative linguists have severely limited the influence of meaning claiming that language is not affected by other cognitive processes and that semantics does not influence linguistic form Conversely cognitivist and functionalist linguists believe that meaning pervades and motivates all levels of linguistic structure This dispute can be resolved conclusively by evidence from signed languages Signed languages are full of iconic linguistic items words inflections and even syntactic constructions with structural similarities between their physical form and their referents form Iconic items can have concrete meanings and also abstract meanings through conceptual metaphors Language from the Body rebuts the generativist linguistic theories which separate form and meaning and asserts that iconicity can only be described in a cognitivist framework where meaning can influence form

Dimensions of Iconicity Angelika Zirker, Matthias Bauer, Olga Fischer, Christina Ljungberg, 2017-09-08 This volume addresses five different Dimensions of Iconicity While some contributions examine the phonic dimensions of iconicity that are based on empirical diachronic and theoretical work others explore the function of similarity from a cognitive point of view The section on multimodal dimensions takes into account philosophical linguistic and literary perspectives in order to analyse for example the diagrammatic interplay of written texts and images Contributions on performative dimensions of iconicity focus on Buddhist mantras Hollywood films and the dynamics of rhetorical structures in Shakespeare Last but not least the volume also addresses new ways of considering iconicity including notational iconicity the interplay of iconicity ambiguity interpretability and the iconicity of literary analysis from a formal semanticist point of view

Methods in Cognitive Linguistics Monica Gonzalez-Marquez, 2007 Methods in Cognitive Linguistics is an introduction to empirical methodology for language researchers Intended as a handbook to exploring the empirical dimension of the theoretical questions raised by Cognitive Linguistics the volume presents guidelines for employing methods from a variety of intersecting disciplines laying out different ways of gathering empirical evidence

The book is divided into five sections. Methods and Motivations provides the reader with the preliminary background in scientific methodology and statistics. The sections on Corpus and Discourse Analysis and Sign Language and Gesture describe different ways of investigating usage data. Behavioral Research describes methods for exploring mental representation simulation semantics child language development and the relationships between space and language and eye movements and cognition. Lastly Neural Approaches introduces the reader to ERP research and to the computational modeling of language.

Iconic Investigations Lars Elleström, Olga Fischer, Christina Ljungberg, 2013-03-28. The contributions to Iconic Investigations deal with linguistic or literary aspects of language. While some studies analyze the cognitive structures of language, others pay close attention to the sounds of spoken language and the visual characteristics of written language. In addition, this volume also contains studies of media types such as music and visual images that are integrated into the overall project to deepen the understanding of iconicity, the creation of meaning by way of similarity relations. Iconicity is a fundamental but relatively unexplored part of signification in language and other media types. During the last decades, the study of iconicity has emerged as a vital research area with far-reaching interdisciplinary scope, and the volume should be of interest for students and researchers interested in scholarly fields such as semiotics, cognitive linguistics, conceptual metaphor studies, poetry, intermediality and multimodality.

The Poetics of Ekphrasis Maria-Eirini Panagiotidou, 2022-11-25. This book provides a stylistic and cognitive poetic account of ekphrastic poetry, poetry whose subject matter is predominantly artworks and images, examining the linguistic processes through which works of art can become literary objects. The author sheds light on the workings of ekphrasis at a textual level while also considering the cognitive and psychological effects of reading ekphrastic poems, developing cognitive and stylistic analytical frameworks grounded on the four principles that govern ekphrasis: representation, narrativization, transposition and collaboration. This book will be of interest to academics and practitioners in various fields, including literary critics, art critics, rhetoricians, poets, visual artists and stylisticians.

The Routledge Handbook of Metaphor and Language Elena Semino, Zsófia Demjén, 2016-11-03. The Routledge Handbook of Language and Metaphor provides a comprehensive overview of the state of the art interdisciplinary research on metaphor and language and maps out future directions of research and practice in a variety of contexts in this field.

Metaphor and Gesture Alan Cienki, Cornelia Müller, 2008-06-04. This volume is the first to offer an overview on metaphor and gesture, a new multi-disciplinary area of research. Scholars of metaphor have been paying increasing attention to spontaneous gestures with speech, meanwhile researchers in gesture studies have been focussing on the abstract ideas which receive physical representation through metaphors when speakers gesture. This book presents a snapshot of the state of the art in these converging fields, offering research papers as well as commentaries from multiple perspectives. In addition to conceptual metaphor theory, it includes different theoretical approaches to semiotics, and the methods used range from controlled experimentation to cognitive ethnography to lexical semantic analysis. The use of metaphor in gesture is shown to

reflect idiosyncracies of thought in the moment of speaking as well as structural cultural and interactional patterns The series of commentaries discusses the potential importance of studying metaphor and gesture from the perspectives of such fields as anthropology cognitive linguistics conversation analysis psychology and semiotics Visual language Wendy Sandler, Marianne Gullberg, Carol Padden, 2019-11-04 Traditionally research on human language has taken speech and written language as the only domains of investigation However there is now a wealth of empirical studies documenting visual aspects of language ranging from rich studies of sign languages which are self contained visual language systems to the field of gesture studies which examines speech associated gestures facial expressions and other bodily movements related to communicative expressions But despite this large body of work sign language and gestures are rarely treated together in theoretical discussions This volume aims to remedy that by considering both types of visual language jointly in order to transcend artificial theoretical divides and to arrive at a comprehensive account of the human language faculty This collection seeks to pave the way for an inherently multimodal view of language in which visible actions of the body play a crucial role The 19 papers in this volume address four broad and overlapping topics 1 the multimodal nature of language 2 multimodal representation of meaning 3 multimodal and multichannel prosody and 4 acquisition and development of visual language in children and adults Linguistic Semiotics Mingyu Wang, 2020-02-25 This is the first book of its kind that explains the basic concepts theoretical foundations and systematic research of linguistic semiotics so as to establish a well founded framework for linguistic semiotics as an independent discipline While examining the major claims of different schools of semiotics it also addresses 12 central issues concerning linguistic semiotics and outlines semiotic studies in China focusing on the multiple research areas and accomplishments In addition to illustrations and tables the book offers an Index of References in Linguistic Semiotics consisting of 1 063 entries including monographs journal papers conference proceedings etc in Chinese English and Russian Japanese Psycholinguistics Joseph F. Kess, Tadao Miyamoto, 1994-12-01 This classified and annotated research bibliography is meant to serve as an introduction to the rich field of Japanese psycholinguistics by providing an exhaustive inventory of what has been done in or about Japanese in a psycholinguistic sense Thus this volume captures the tradition of psycholinguistic research currently being pursued in Japan its history and development over the past thirty years and its current directions and research themes as well as international research in modern psycholinguistics which targets the Japanese language as the focal point of empirical procedures or deductive analysis in psychology linguistics psycholinguistics and cognitive science The bibliography supports a broad view of psycholinguistics acknowledging that psycholinguistic research in how natural language is learned produced comprehended stored and recalled now reaches beyond its traditional roots in the two disciplines of psychology and linguistics The interested scholar will thus find entries from the traditional core of psycholinguistic research on natural language as well as entries from related areas which have either influence or been influenced by psycholinguistic work on Japanese Every article

text and edited volume listed in the bibliography is available through normal library channels and is thus accessible to the scholar interested in what psycholinguistic research has been done in or on the Japanese language in Japan and internationally The annotations for each entry have been especially written for this bibliographic inventory and with the linguist psychologist and psycholinguist specifically in mind The authors intention is to maximize the usefulness of such an inventory by preparing annotations for the interested reader who wishes to know not only what the article contains but where it fits in the research tradition

Cognitive Poetics Geert Brône, Jeroen Vandaele, 2009 For more than two decades now cognitive science has been making overtures to literature and literary studies Only recently however cognitive linguistics and poetics seem to be moving towards a more serious and reciprocal type of interdisciplinarity In coupling cognitive linguistics and poetics cognitive poetics aim to offer cognitive readings of literary texts and formulate specific hypotheses concerning the relationship between aesthetic meaning effects and patterns in the cognitive construal and processing of literary texts One of the basic assumptions of the endeavour is that some of the key topics in poetics such as the construction of text worlds characterization narrative perspective distancing discourse etc may be fruitfully approached by applying cognitive linguistic concepts and insights such as embodied cognition metaphor mental spaces iconicity construction grammar figure ground alignment etc in an attempt to support enrich or adjust traditional poetic analysis Conversely the tradition of poetics may support frame or call into question insights from cognitive linguistics In order to capture the goals gains and gaps of this rapidly growing interdisciplinary field of research this volume brings together some of the key players and critics of cognitive poetics The eleven chapters are grouped into four major sections each dealing with central concerns of the field i the cognitive mechanisms discursive means and mental products related to narrativity Semino Herman Culpeper ii the different incarnations of the concept of figure in cognitive poetics Freeman Steen Tsur iii the procedures that are meant to express or create discursive attitudes like humour irony or distance in general Antonopoulou and Nikiforidou Dancygier and Vandaele Giora et al and iv a critical assessment of the current state of affairs in cognitive poetics and more specifically the incorporation of insights from cognitive linguistics as only one of the contributing fields in the interdisciplinary conglomerate of cognitive science Louwerse and Van Peer Sternberg The ensuing dialogue between cognitive and literary partners as well as between advocates and opponents is promoted through the use of short response articles included after ten chapters of the volume Geert Brône Katholieke Universiteit Leuven Belgium Jeroen Vandaele University of Oslo Norway

From Sign to Signing Wolfgang G. Müller, Olga Fischer, 2003 This volume a sequel to *Form Miming Meaning* 1999 and *The Motivated Sign* 2001 offers a selection of papers given at the Third International Symposium on Iconicity in Language and Literature Jena 2001 The studies collected here present a number of new departures Special consideration is given to the way non linguistic visual and auditory signs such as gestures and bird sounds are represented in language and more specifically in signed language and how such signs influence semantic conceptualization Other studies

examine more closely how visual signs and representations of time and space are incorporated or reflected in literary language in fiction as well as experimental poetry A further new approach concerns intermedial iconicity which emerges in art when its medium is changed or another medium is imitated A more abstract diagrammatic type of iconicity is again investigated with reference to both language and literature some essays focus on the device of reduplication isomorphic tendencies in word formation and on creative iconic patterns in syntax while others explore numerical design in Dante and geometrical patterning in Dylan Thomas A number of theoretically oriented papers pursue post Peircean approaches such as the application of reader response theory and of systems theory to iconicity **Metaphor in American Sign Language**

Phyllis Perrin Wilcox,2000 As she explains If the iconic influence that surrounds metaphor is set aside the results will be greater understanding and interpretations that are less opaque *Iconographic Exegesis and Third Isaiah* Izaak Joziás Hulster,2009 Although scholars employ pictorial material in biblical exegesis the question of how images from the Ancient Near East can contribute to a better understanding of the Bible has been left unanswered This is the first monograph to outline a historical method for iconographic exegesis The methodological study includes both responses to important theoretical questions such as What is an image and What is culture and an interdisciplinary exploration of issues of history art history archaeology and cultural anthropology The three stage method proposed is embedded in hermeneutical and exegetical reflections The application of iconographical exegesis to the interpretation of metaphors is also considered In demonstrating the method and its application Izaak J de Hulster focuses on Third Isaiah and develops three iconographical exegetical studies on yad in Isaiah 56 5 light in Isaiah 60 and grape processing in Isaiah 63 Sign Language Research

Sixty Years Later: Current and Future Perspectives Valentina Cuccio,Erin Wilkinson,Brigitte Garcia,Adam Schembri,Erin Moriarty,Sabina Fontana,2022-11-14 **The Metaphor Compass** Marianna Bolognesi,Ana Werkmann Horvat,2022-12-30 The Metaphor Compass Directions for Metaphor Research in Language Cognition Communication and Creativity provides a roadmap to navigate the recent findings and cutting edge research conducted around the world on metaphor focusing on the following four themes Metaphor and Linguistic Diversity Metaphor and Cognition Metaphor and Communication and Metaphor and Creativity The research presented in this book employs a variety of empirical methods ranging from neuroimaging to corpus analyses and from behavioral experimentation to computational modeling Divided into four parts it offers an array of pedagogical material including activities at the ends of the chapters to help the reader to consolidate the notions discussed in the chapter This is a useful resource for students researchers and scholars of linguistics communication anthropology psychology and cognitive science looking to learn about figurative language and creativity

Enjoying the Tune of Phrase: An Emotional Symphony within **Metaphor And Iconicity**

In a world eaten by screens and the ceaseless chatter of instant communication, the melodic splendor and mental symphony produced by the published word usually fade in to the backdrop, eclipsed by the persistent noise and disruptions that permeate our lives. But, situated within the pages of **Metaphor And Iconicity** a charming literary prize brimming with raw thoughts, lies an immersive symphony waiting to be embraced. Constructed by a masterful composer of language, that charming masterpiece conducts readers on a mental trip, well unraveling the concealed melodies and profound affect resonating within each carefully constructed phrase. Within the depths of this poignant assessment, we can examine the book's central harmonies, analyze their enthralling publishing design, and submit ourselves to the profound resonance that echoes in the depths of readers' souls.
