Metaphors And Action Schemes Some Themes In Intellectual History:

Metaphors and Action Schemes Robert L. Schwarz, 1997 All our abstract ideas are based on metaphors and action schemes Jean Piaget did voluminous research on how thought develops in children through assimilation of action schemes George Lakoff and Mark Johnson have done pioneering work on metaphors and action schemes in everyday thinking This book builds on those foundations looking at the role played by metaphors and action schemes in the history of ideas The author begins his argument by taking a critical look at the philosophy of metaphor from Aristotle to the present While he sees metaphor as simply conceiving one thing in terms of another he points out that this is an inexhaustible process because the context in which the process takes place is always changing Change opens up new possibilities of similarity Thus the metaphor is an open door into a space of infinite possibilities

Metaphor and the Dynamics of Knowledge Sabine Maassen, Peter Weingart, 2013-01-11 This book opens up a new route to the study of knowledge dynamics and the sociology of knowledge The focus is on the role of metaphors as powerful catalysts and the book dissects their role in the construction of theories of knowledge It is of vital interest to social and cognitive scientists alike

Transparency and Critical Theory Jorge I. Valdovinos, 2022-02-26 This book takes an interdisciplinary approach to the critique of contemporary ideology offering an innovative genealogy of one of its most fundamental discursive manoeuvres the ideological effacement of mediation Providing a comprehensive historical revision of media from the Greeks to the Internet this book identifies several critical junctures at which the tension between visibility and invisibility has overlapped with conceptions of neutrality a tension best incarnated in today's use of the word transparency Then it traces this term's evolving semantic constellation through a variety of intellectual discourses exposing it as a key operator in the revaluation of ideals sensibilities and modalities of perception that lie at the core of our contemporary attention based economy

Rubens and the Eloquence of Drawing Catherine H. Lusheck, 2017-08-07 Rubens and the Eloquence of Drawing re-examines the early graphic practice of the preeminent northern Baroque painter Peter Paul Rubens Flemish 1577-1640 in light of early modern traditions of eloquence particularly as promoted in the late sixteenth and early seventeenth century Flemish Neostoic circles of philologist Justus Lipsius 1547-1606 Focusing on the roles that rhetorical and pedagogical considerations played in the artist's approach to disegno during and following his formative Roman period 1600-08 this volume highlights Rubens's high ambitions for the intimate medium of drawing as a primary site for generating meaningful and original ideas for his larger artistic enterprise As in the Lipsian realm of writing personal letters the humanist activity then described as a cognate activity to the practice of drawing a Senecan approach to eclecticism a commitment to emulation and an Aristotelian concern for joining form to content all played important roles Two chapter-long studies of individual drawings serve to demonstrate the relevance of these interdisciplinary rhetorical concerns to Rubens's early practice of drawing Focusing on Rubens's *Medea Fleeing with Her Dead Children* Los Angeles Getty Museum and *Kneeling Man* Rotterdam Museum Boijmans Van Beuningen these close

looking case studies demonstrate Rubens's commitments to creating new models of eloquent drawing and to highlighting his own status as an inimitable maker. Demonstrating the force and quality of Rubens's intellect in the medium then most associated with the closest ideas of the artist, such designs were arguably created as more robust pedagogical and preparatory models that could help strengthen art itself for a new and often troubled age.

American Book Publishing Record, 1997 **Bibliographic Index**, 1997 **Literatur und Wissen** Ralf Klausnitzer, 2012-06-11 Was wissen literarische Texte? Wie gelangt dieses Wissen in Literatur? Können literarische Werke eine Quelle von Wissen sein? Welche Rolle spielen wissenschaftliche Erkenntnisse bei der Verfassung von Romanen, Gedichten oder Dramen? Und wie lassen sich die von literarischen Texten implizierten, thematisierten oder problematisierten Wissensbestände identifizieren und beschreiben, verstehen und interpretieren? Wenige Problemfelder der textinterpretierenden Disziplinen wurden in den letzten Jahren so intensiv und kontrovers verhandelt wie die Beziehungen zwischen Literatur und Wissen. Das vorliegende Studienbuch will zentrale Zugänge dokumentieren, fruchtbare Modelle vorstellen und exemplarische Varianten des Wechselverhältnisses von Literatur und Wissensordnungen analysieren. Ein Glossar erlaubt die rasche Konsultation zentraler Begriffe, eine umfassende Bibliographie erleichtert die weiterführende Beschäftigung mit dem Thema. In der Verbindung von Dokumentation, systematischer Modellierung und historischer Exemplifikation eignet sich das Studienbuch als instruktive Einführung in ein Themenfeld, das in den Literatur- und Kulturwissenschaften bereits jetzt eine wichtige Rolle spielt und in Zukunft weiter an Bedeutung gewinnen wird.

Forthcoming Books Rose Arny, 1997-04 **Books in Print**, 1991 Whitaker's Books in Print, 1998 *The Unity of Knowledge and Action* Warren G. Frisina, 2012-02-01 Building upon insights from the sixteenth century Neo-Confucian Wang Yang-ming, the American pragmatist John Dewey, and the process philosopher Alfred North Whitehead, this book argues that knowledge is best understood as a form of action. Many of the most puzzling philosophic problems in the modern era can be traced to our tendency to assume that knowledge is separate from action. Letting go of the sharp knowledge-action distinction, however, makes possible a more coherent theory of knowledge that is more adaptive to the way we experience one another, the world, and ourselves. By responding directly to problems raised by contemporary thinkers like Charles Taylor, Donald Davidson, Richard Rorty, Daniel Dennett, Mark Johnson, George Lakoff, and Robert Neville, this book maps out a strategy for making progress in the contemporary quest for a nonrepresentational theory of knowledge.

Governing the Child in the New Millennium Kenneth Hultqvist, Gunilla Dahlberg, 2013-01-11 The contributors and editors of this volume begin from the assumption that the changes wrought by globalization compel us to reflect upon the status of the child and childhood at the end of the 20th century. Their essays consider what techniques and technologies are used to govern the child, what role the family plays, what is global and what is

culturally specific in the changes and how the subject is constructed and construed

What Reason Promises Wendy Doniger, Peter Galison, Susan Neiman, 2016-06-20 This collection demonstrates the range of approaches that some of the leading scholars of our day take to basic questions at the intersection of the natural and human worlds The essays focus on three interlocking categories Reason stakes a bigger territory than the enclosed yard of universal rules Nature expands over a far larger region than an eternal category of the natural And history refuses to be confined to claims of an unencumbered truth of how things happened

[Engagements with Close Reading](#) Annette Federico, 2015-10-08 What should we do with a literary work Is it best to become immersed in a novel or poem or is our job to objectively dissect it Should we consult literature as a source of knowledge or wisdom or keenly interrogate its designs upon us Do we excavate the text as an historical artifact or surrender to its aesthetic qualities Balancing foundational topics with new developments Engagements with Close Reading offers an accessible introduction to how prominent critics have approached the task of literary reading This book will help students
