Gandhi's hunger strike caused millions of Hindus and Muslims in India to cease their fighting. As a practical guide, Randi Fredricks Ph.D. provides detailed information on the different types of fasting, where people fast, the physiological process of fasting, and the contraindications and criticisms of fasting. Using existing literature and original research, Dr. Fredricks focuses on the transformative characteristics of fasting in the contexts of psychology, medicine, and spirituality. The relationship between fasting and transpersonal psychology is examined with a focus on peak experiences, self-realization, and other exceptional human experiences. Dr. Fredricks demonstrates how fasting can be profoundly therapeutic, create global paradigm shifts, and provide personal mystical phenomena.
