Tianying Zang,2011-12-16 This book is a study of D H Lawrences view of nature his ecological consciousness contributes to his unique place within modern aesthetics An affinity has been examined between Lawrences ideology of man nature relationship and the classic oriental philosophies concerning nature particularly the ancient Taoism In Lawrences novels and essays one finds that virtually all aspects of his religious vision are anticipated in Eastern literature His almighty Holy Ghost for example who is responsible for the sacred underlying unity is named Brahman by Hindus Dharmakaya by Buddhists and Tao by Taoists His duality with its stress on the dynamic balance between complementary life principles is fully worked out in the Yin Yang philosophy of Taoism Nature Law and Policy in Europe Andrew L. R. Jackson,2023-04-26 This volume considers current and future challenges for nature law and policy in Europe Following the Fitness Check evaluation of the Birds and Habitats Directives in 2017 the EU adopted an Action Plan for nature people and the economy to rapidly improve

the Directives implementation and accelerate progress towards the EU's biodiversity targets for 2020. More recently the EU has adopted a Biodiversity Strategy for 2030 and proposed an EU Nature Restoration Law. This book makes a timely contribution by examining the current state of play in light of recent and historical developments as well as the post 2020 nature law and policy landscape. While evidence suggests that Natura 2000 and the Habitats and Birds Directives have delivered conservation benefits for wildlife in Europe, biodiversity loss continues apace. The book reviews the requirements for an effective international nature conservation system with reference to the Birds and Habitats Directives. It examines regulatory regimes, current legal issues in the fields of site protection and species protection, the protection of areas outside Natura 2000, recent developments in the EU and the UK including the implications of Brexit, agriculture and nature conservation, litigation, science and access to justice. Written by leading experts in the field from a range of stakeholder groups, the volume draws on diverse experiences as well as providing interdisciplinary perspectives. This volume will be essential reading for students, scholars, practitioners, NGOs and policy makers interested in European environmental policy and law, including for example lawyers, ecologists, environmental scientists, political scientists, natural resource managers, planners and civil servants.

Bruce Hull,2006-05 Review In this work R Bruce Hull argues that environmentalism will never achieve its goals unless it sheds its fundamentalist logic The movement is too bound up in polarizing ideologies that pit humans against nature conservation against development and government regulation against economic growth Only when we acknowledge the infinite perspectives on how people should relate to nature will we forge

solutions that are respectful to both humanity and the environment Infinite Nature opens doors so that nature can be seen from the scientific understandings proffered by anthropology evolution and ecology to the promise of environmental responsibility offered by technology and economics to the designs of nature envisioned in philosophy art law and religion Along the way Hull helps us find the common ground created out of many natures the place where sustainable and thriving communities are possible BOOK JACKET Women Writing Nature Barbara Cook, 2007-12-14 Since Silent Spring was published in 1962 the number of texts about the natural world written by women has grown exponentially The essays in Women Writing Nature A Feminist View argue that women writing in the 20th century are utilizing the historical connection of women and the natural world in diverse ways For centuries women have been associated with nature but many feminists have sought to distance themselves from the natural world because of dominant cultural representations which reflect women as controlled by powerful natural forces and confined to domestic spaces However in the spirit of Rachel Carson some writers have begun to invoke nature for feminist purposes or have used nature as an agent of resistance This collection considers women's writings about the natural world in light of recent and current feminist and ecofeminist theory and finds a variety of approaches and perspectives both by the scholars and by the authors discussed culminating with the voices of two women activist and scientist Joan Maloof and Irish poet Rosemarie Rowley who both write about the natural world from a feminist perspective
