

harmonization, Smith notes that, even within federal states, the economic pressures for policy harmonization are not overwhelming. Moreover, and much more speculatively, if free trade produces long-run economic benefits, Canadian governments will actually have the potential to increase their tax effort modestly and to increase public expenditures or tighten environmental regulations.

Turning to federal institutions, Brown offers a detailed historical examination of the evolution of the provincial role in international trade negotiations and the resolution of trade disputes. He traces the growing importance of the provinces in trade matters and draws our attention to both the costs and benefits of the privileged role provinces now play in trade matters. Provincial technical expertise and familiarity with local economic interests are important ingredients in the development of a common Canadian position in these negotiations. At the same time, the absence of a formal framework for intergovernmental decision-making on occasion constrains the ability of negotiators either to develop or to enforce policy.

Simeon concludes the volume by suggesting that globalization is an important source of contemporary political tensions in Canada. The interaction of globalization and a regionally-specialized economy may accentuate provincial differences and disparities. This differential provincial impact of globalization makes it more difficult for the national government to formulate a coherent response which addresses the variety of circumstances faced by provincial economies. The accelerating trend towards provincial integration into global and North American markets may also threaten the political linkages formed through the Canadian economic union.

The preoccupation with federalism, while a strength of the collection, also is an important limitation. Little sustained attention is paid to other variables which affect the response of nations to global economic change, such as the structure of in-

dustry and labour. Without this attention it is difficult to evaluate the relative importance of our federal structures to our ability to adapt to economic change. Nonetheless, this volume offers a valuable contribution to our understanding of globalization's impact on Canada.

North American Patterns of Growth and Development: The Continental Context

by W.T. Easterbrook. Edited with an introduction by Ian Parker. Toronto, University of Toronto Press, 1990. Pp.xxvii,272. \$35.00.

This volume brings together for the first time perspectives on North American economic history developed by the late Professor Easterbrook in a remarkable series of articles published during the 1940s and 1950s. His *Canadian Economic History* (co-authored with Hugh Aitken in 1956 and still in print) and lectures delivered at the University of Toronto from 1947 until 1977 conveyed Easterbrook's distinctive insights to many thousands of students. The current monograph develops ideas in greater detail and integrates insights developed over a long and productive career.

Easterbrook's vision of long-term and comparative history emphasizes types and sources of uncertainty, its impact on the climate of enterprise, and the nature of entrepreneurial response. In his lecturing and writing Easterbrook attempted to elaborate a 'big picture' of economic persistence and change. Not surprisingly, the principal contribution of this volume lies in its heuristic interpretation of long-term and comparative economic history, a genre now enjoying a modest renaissance.

Informed readers will detect echoes of structuralist/dependency ideology and of the writings of Harold Innis, Frank Knight,
