North Carolina Architecture Of The Old South:

Architecture of the Old South Mills Lane, 1996 Architecture of the Old South Colonial Federal and its companion volume Architecture of the Old South Greek Revival Romantic are the climax of some twenty years of exploration research and writing Buildings are three dimensional history books that reflect the comings and goings successes and failures aspirations and follies of real people Virginia was the oldest most populous and richest colony in the South with early architecture of unsurpassed elegance and variety Maryland thanks to an early start and the successful cultivation of tobacco produced colonial architecture second only to Virginia and South Carolina the rich rice colony Meanwhile North Carolina with treacherous coasts poor harbors and shallow rivers was slow to prosper and remained isolated Georgia the last and poorest of the English colonies struggled from insecurity and near collapse till the 1760 s and like North Carolina remained sparsely settled poor and undeveloped till after the Revolution Louisiana the former colony of France continued to be dominated by French culture French language and French laws long after it was sold to the United States in 1803 In the 1760 s Virginians and Carolinians moving into the uplands and already pressing against the mountains began exploring Tennessee and Kentucky After the Revolution this wave of transcontinental migration was renewed not only to Tennessee and Kentucky but also to northeastern and coastal Georgia and leapfrogging lands in the Mississippi Territory still occupied by the Indians to the banks of the lower Mississippi river Georgia and North Carolina enjoyed their greatest prosperity during the heyday of the Greek Revival Mississippi and Alabama the two states carved from the historic Mississippi Territory were settled by a third wave of immigration in the 1830 s that produced a surprising variety and quality of buildings in the relatively brief period before the Civil War These books try to explore Southern architecture beyond the cliches The great buildings of the Old South were created by outsiders and newcomers especially New Englanders whose contributions to Southern society and culture have been long underestimated Thus these historic buildings show how the South participated far more fully in the mainstream of American life before the Civil War than has been generally appreciated Architecture of the Old South Mills Lane, 1993 From early colonial times to the onset of the Civil War the finest examples of antebellum architecture in the South are revealed in glorious photographs and a scholarly text This handsome volume is the culmination of a distinguished series that has explored the historic buildings of the Old South The fruit of fifteen years of travel and research Architecture of the Old South surveys the most beautiful and historic buildings of the region and illustrates them with color photographs old prints and drawings The authoritative and sometimes amusing text documents a surprising conclusion that most of the great buildings of the Old South were created by Yankee builders and that the South participated more fully in the mainstream of American life before the Civil War than has been fully appreciated Indeed the illustrations and text of Architecture of the Old South though presenting famous shrines explore the unexpected by ways of Southern architecture and history The great buildings of great cities Baltimore Charleston Savannah and New Orleans and plantations

and country houses of the gentry are well represented But here also can be found a wealth of the unfamiliar frontier cabins eccentric houses built by gentlemen amateurs grand designs of professional designers from England and Europe When the Architecture of the Old South series was begun in 1981 the New York Times praised the first of these volumes as dignified and handsome with engaging texts that strike a neat balance between architectural scholarship and social history Mills Lane a native Georgian who was educated at Harvard boasts that he is a Yankee above the waist and a Southerner below the waist He has brought to his subject an affection and familiarity with the South balanced by a wider perspective As publisher of The Beehive Press located in a house facing one of Savannah s verdant squares Lane has produced more than fifty books about the cultural and social history of Georgia and the South In an age that seems to spin bigger and faster Lane was honored with a 1993 commendation by Dartmouth College Library for his clear vision patient scholarly investigation and persistent progress As author Mills Lane has written eight previous volumes in the Architecture of the Old South series state by state surveys of Maryland Virginia Kentucky Tennessee North Carolina South Carolina Georgia Mississippi Alabama and Louisiana 250 illustrations Architecture of the Old South Mills Lane,1989

Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury,2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane s is a continuing not negated legacy in architecture *Lost Plantations of the South* Marc R. Matrana,2009-01-01 The great majority of the South s plantation homes have been destroyed over time and many have long been forgotten In *Lost Plantations of the South* Marc R Matrana weaves together photographs diaries and letters architectural renderings and other rare documents to tell the story of sixty of these vanquished estates and the people who once called them home From plantations that were destroyed by natural disaster such as Alabama s Forks of Cypress to those that were intentionally demolished such as Seven Oaks in Louisiana and Mount Brilliant in Kentucky Matrana resurrects these lost mansions Including plantations throughout the South as well as border states Matrana carefully tracks the

histories of each from the earliest days of construction to the often contentious struggles to preserve these irreplaceable historic treasures *Lost Plantations of the South* explores the root causes of demise and provides understanding and insight on how lessons learned in these sad losses can help prevent future preservation crises Capturing the voices of masters and mistresses alongside those of slaves and featuring more than one hundred elegant archival illustrations this book explores the powerful and complex histories of these cardinal homes across the South

The Photographic Legacy of Frances Benjamin Johnston Maria Elizabeth Ausherman, 2022-08-15 One of the first women to work in an emerging field dominated by men Frances Benjamin Johnston 1864 1952 achieved acclaim in the late nineteenth century as an accomplished photographer Her career spanned nearly seventy years during which she became respected for her portraiture artistic studies photojournalism and garden and architectural photography She was instrumental in defining the medium and inspiring women to train in and appreciate photography Though the socially well connected Johnston was popular among prestigious celebrities of the day she worked as the official White House photographer for five administrations it is her monumental nine state survey of southern American architecture that stands as her most significant contribution to the history and development of photography both as art and as documentary Drawing upon Johnston's original papers and photographs from the Library of Congress Maria Ausherman's examination of this extraordinary photographer's career shows both the early origins of her style and vision and her attempts to change society through her art

Architecture and Town Planning in Colonial North America James D. Kornwolf, Georgiana Wallis Kornwolf, 2002 Incorporating more than 3 000 illustrations Kornwolf's work conveys the full range of the colonial encounter with the continent's geography from the high forms of architecture through formal landscape design and town planning From these pages emerge the fine arts of environmental design an understanding of the political and economic events that helped to determine settlement in North America an appreciation of the various architectural and landscape forms that the settlers created and an awareness of the diversity of the continent's geography and its peoples Considering the humblest buildings along with the mansions of the wealthy and powerful public buildings forts and churches Kornwolf captures the true dynamism and diversity of colonial communities their rivalries and frictions their outlooks and attitudes as they extended their hold on the land

The U.S. South and Europe Cornelis A. van Minnen, Manfred Berg, 2013-11-28 The U S South is a distinctive political and cultural force not only in the eyes of Americans but also in the estimation of many Europeans The region played a distinctive role as a major agricultural center and the source of much of the wealth in early America but it has also served as a catalyst for the nation's only civil war and later as a battleground in violent civil rights conflicts Once considered isolated and benighted by the international community the South has recently

evoked considerable interest among popular audiences and academic observers on both sides of the Atlantic In The U S South and Europe editors Cornelis A van Minnen and Manfred Berg have assembled contributions that interpret a number of political cultural and religious aspects of the transatlantic relationship during the nineteenth and twentieth centuries The contributors discuss a variety of subjects including European colonization travel accounts of southerners visiting Europe and the experiences of German immigrants who settled in the South The collection also examines slavery foreign recognition of the Confederacy as a sovereign government the lynching of African Americans and Italian immigrants and transatlantic religious fundamentalism Finally it addresses international perceptions of the Jim Crow South and the civil rights movement as a framework for understanding race relations in the United Kingdom after World War II Featuring contributions from leading scholars based in the United States and Europe this illuminating volume explores the South from an international perspective and offers a new context from which to consider the region s history The South Builds Edward

Waugh,Elizabeth Waugh,1960 This is a brilliant demonstration in text and picture of the fact that the South is responding to its industrial revolution with a contemporary architecture that may in time recapture the graciousness that had been lost by the beginning of this century in the sterile repetition of old forms The body of the book is a carefully chosen selection of modern southern architecture Originally published in 1960 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value **The Architecture of Jens Fredrick Larson** Rod Miller,2024-08-19 After serving with

the Canadian Artillery and becoming an ace with the Royal Flying Corps American Jens Fredrick Larson settled into architecture At age 28 he began work at Dartmouth As his reputation grew he would go on to work with myriad clients and more than thirty five colleges and universities in America and elsewhere including Colby College Bucknell College Wake Forest University the City University of Paris the University of New Brunswick and the Institute for Advanced Study Princeton This text explores the history of Larson and his career with a look at his major projects and the challenges faced late in his career when a nascent Modernism denigrated and misunderstood the meaning and value of the Georgian style

The Refinement of America Richard Lyman Bushman,2011-09-21 This lively and authoritative volume makes clear that the quest for taste and manners in America has been essential to the serious pursuit of a democratic culture Spanning the material world from mansions and silverware to etiquette books city planning and sentimental novels Richard L Bushman shows how a set of values originating in aristocratic court culture gradually permeated almost every stratum of American society and served to prevent the hardening of class consciousness A work of immense and richly nuanced learning The Refinement of America newly illuminates every facet of both our artifacts and our values *The Growth of the American Thought* Merle Eugene Curti, Hailed as a pioneer achievement upon its original publi cation and awarded the Pulitzer Prize

in history in 1944 *The Growth of American Thought* has won appreciative reviews and earned the highest regard among historians of the national experience With his elaboration of the complex interrelationships between the growth of American thought and the whole American social milieu Curti creates not only an intellectual history but a social history of American thought

Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural technics and the codes that regulate it The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment By providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book

Source Book of American Architecture G.E. Kidder Smith, 2000-09 This comprehensive and insightful illustrated survey of 500 of America's most distinguished buildings provides a unique overview of the thousand year architectural development of the United States It examines our nation's architecture from its earliest days to the present ranging from cliff dwellings in Mesa Verde to Frank Lloyd Wright's Robie House in Chicago to James Ingo Freed's Holocaust Museum in Washington Indispensable in any library it also serves as a general introduction to American architecture or as a splendid guide for tourists

Beyond the Architect's Eye Mary N. Woods, 2013-12-11 Typical architectural photography freezes buildings in an ideal moment and rarely captures what photographer Berenice Abbott called the medium's power to depict how the past jostled the present In *Beyond the Architect's Eye* Mary N Woods expands on this range of images through a rich analysis that commingles art amateur and documentary photography genres usually not considered architectural but that often take the built environment as their subject Woods explores how photographers used their built environment to capture the disparate American landscapes prior to World War II when urban and rural areas grew further apart in the face of skyscrapers massive industrialization and profound cultural shifts Central to this study is the work of Alfred Stieglitz Frances Benjamin Johnston and Marion Post Wolcott but Woods weaves a wider narrative that also includes Alice Austen Gertrude Kasebier Berenice Abbott Margaret Bourke White Helen Levitt Lisette Model Louise Dahl Wolfe Morgan and Marvin Smith Eudora Welty Samuel Gottscho Walker Evans Max Waldman and others In such disparate places as New York City the rural South and the burgeoning metropolis of Miami these unconventional architectural photographers observed buildings as deeply connected to their context Whereas Stieglitz captured New York as the quintessential modern urban landscape in the period the South was its opposite a land supposedly frozen in the past Yet just as this myth of the Old

South crystallized in photographs like Johnston's a New South shaped by popular culture and modern industry arose Miami embodied both of these visions In Wolcott's work agricultural fields where stoop labor persisted were juxtaposed with Art Deco hotels a popular modernism of the machine age that remade Miami Beach into a miniaturized Manhattan on the beach Beyond the Architect's Eye is a groundbreaking study that melds histories of American art cities and architecture with visual studies of landscape photography and cultural geography *The Georgia Catalog, Historic American Buildings Survey* John Linley, 1982 From the elegant townhouses of Savannah to the towering hotel and office complexes of Atlanta the state of Georgia has a distinguished architectural tradition No other work documents this rich heritage as comprehensively as *The Georgia Catalog* Prepared under the auspices of the Historic American Buildings Survey this carefully researched and beautifully illustrated volume will be an invaluable resource for architects preservationists historians and those who own the historic houses or who simply are interested in Georgia's architectural legacy The book is in two parts The first is a history of and guide to the architecture of the state John Linley begins his survey with the remains of prehistoric civilization and the architecture of the first European settlers He traces the development of a native architecture in the state the flowering of the Greek Revival style the functional architecture of commerce and industry and the energy and imagination of urban architecture in the late twentieth century The text reflects the author's interest in the rationale and logic that produced the architecture and in the lessons that the past has for the present and the future He also emphasizes the influence of climate ecology landscape and city planning on both historic and contemporary architecture The second section of *The Georgia Catalog* is a complete updated listing of nearly four hundred sites in the Historic American Buildings Survey Each entry gives the precise location of the site a brief description of the structure the date of construction and the name of the architect if known changes in name structure or location of the building its present condition any facts of historical significance and the number and dates of drawings photographs and data sheets in the HABS collection at the Library of Congress To add to its value as a guide the volume also includes a glossary of architectural terms and a list of Georgia properties that are included in the National Register of Historic Places have been designated National Landmarks or are part of the Historic American Engineering Record
