North Of Reliance:

The Bay of Bengal Pilot Great Britain. Hydrographic Department, 1887 **China - Neighboring Asian Countries Relations** Li Xiangyang, 2013-03-01 China has a myriad and diverse range of neighbours who are significant in their own right but are also of global importance Asia accounts for 25% of global GDP This book evaluates the potential for both co operation and conflict within the Asian region Border problems and historical problems are still plaguing countries in the region and are affecting the relations between them China and India have not yet resolved their land frontier issues Furthermore China has maritime disputes with Japan South Korea Vietnam and the Philippines The historical issues among China Japan and South Korea make the cooperation between them lack a basis of political mutual trust Therefore although there are close trade contacts among these countries China Japan and South Korea have not reached any FTA In South Asia because of long term India Pakistan conflicts South Asia s Association for Regional Cooperation SAARC has been useless and is unable to effectively promote regional economic cooperation which is a factor in pushing India to develop towards the East These unstable factors have not only hindered the formation of long term institutional arrangements on economic and trade cooperation within the region but have also caused various unexpected events to disrupt existing cooperation Throughout this book economic data and analysis is provided which gives an insight into the trade and financial links that bind this region together Written by experts in China it gives a fascinating view of China s approach to its neighbours China is assuming a more important role on the world stage but it is important to not forget the key role it plays in its own neighbourhood

Enterprise and Welfare Reform in Communist Asia Peter Ferdinand, Martin Gainsborough, 2004-08-02 Featuring a wide geographical scope this collection of essays surveys enterprise and welfare reforms in all the remaining four Asian communist states China Vietnam Laos and North Korea Since the collapse of the Soviet Union they can no longer place major reliance upon assistance from other fraternal states and have to devise their own strategies for survival All have shown a trend towards greater reliance on market forces though in different ways and to varying degrees Enterprise management has to adapt to this In some of them entrepreneurs have become politically and socially acceptable They may even begin to set trends for social evolution Yet since state enterprises used to be responsible for all welfare payments to employees and their families management reforms cannot be separated from those of welfare arrangements Reducing an enterprise s non commercial obligations for the sake of greater market efficiency is bound to affect welfare provision It also reopens the role of official trade unions How these regimes cope with these conflicting pressures are vital factors in their long term viability
