North American Xb 70 Valkyrie:

North American XB-70 Valkyrie Peter E. Davies, 2018-03-09 Of the many futuristic military aircraft concepts created in the 1950s the North American XB 70 still stands out as the most awe inspiring With its huge white partially folding delta wing its fuselage resembling a striking cobra and its extraordinary performance it was one of the foremost technological achievements of the 20th Century A strategic bomber built to outrun any Soviet fighter jet it could reach Mach 3 with a full nuclear payload as fast as the legendary SR 71 Blackbird but more than three times the size However its role as a nuclear bomber was limited after the introduction of Intercontinental Ballistic Missiles and defence cuts eventually led to the project being scrapped in the mid 1960s The Valkyrie had a brief costly decade of life but it proved the continuing value of developing manned bombers However almost half a century after the XB 70 its predecessor the B 52 continues in service Using full colour artwork and rigorous analysis this is the complete story of the ultimate US Cold War military X plane

Simons, 2014-08-19 A fascinating insight into one of the Cold War s most interesting concept aircraft with new information photographs and first hand accounts Flypast During the 1950s plans were being drawn at North American Aviation in Southern California for an incredible Mach 3 strategic bomber The concept was born as a result of General Curtis LeMay s desire for a heavy bomber with the weapon load and range of the subsonic B 52 and a top speed in excess of the supersonic medium bomber the B 58 Hustler However in April 1961 Defense Secretary McNamara stopped the production go ahead for the B 70 because of rapid cost escalation and the USSR s newfound ability to destroy aircraft at extremely high altitude using either missiles or the new Mig 25 fighter Nevertheless in 1963 plans for the production of three high speed research aircraft were approved and construction proceeded In September 1964 the first Valkyrie now re coded A V 1 took to the air for the first time and in October went supersonic This book is the most detailed description of the design engineering and research that went into this astounding aircraft It is full of unpublished details photographs and firsthand accounts from those closely associated with the project Although never put into full production this giant six engined aircraft became famous for its breakthrough technology and the spectacular images captured on a fatal air to air photo shoot when an observing Starfighter collided with Valkyrie A V 2 which crashed into the Mojave Desert Well illustrated with numerous diagrams and black and white photographs the book provides an interesting insight into one of the so called white elephant

projects of the 1960s Jets Monthly North American XB-70 in Color John M. Campbell,1997-12 The North American XB 70 Valkyrie is one of the most unusual looking aircraft in aviation history and only two were constructed It was originally designed as a Mach 3 high altitude bomber but was later used as a research aircraft This new book by John Campbell is an all color photo study of the XB 70 including production flight tests and the fatal crash of Aircraft 2 Aircraft 1 is now at the U S Air Force Museum at Wright Patterson AFB North American Xb-70a Valkyrie - Warbird Tech Dennis R. Jenkins,Tony Landis,2002-04 The North American XB 70 Valkyrie was an attempt to build the ultimate offensive weapon for the Cold War a heavy bomber capable of flying at Mach 3 and reaching targets deep inside the Soviet Union The aircraft that emerged was one of the most graceful large aircraft ever to fly and one that looked everybit as fast on the ground as it was in the air over 2 000 mph at high altitude It was years ahead of its time But politics and changing requirements ultimately doomed the Valkyrie program to only two aircraft Neither was a true prototype of a weapons system and instead was used to test the concept of such a large aircraft flying so fast The authors have uncovered a great deal of new material on the XB 70 program both on the aircraft as flown and on what the proposed production aircraft would have looked like had they been built Many never before seen photographs and drawings are included in the book Details of the defensive perspective with the politics and economic realities that caused its cancellation The photos in this edition are black and white **North American XB-70A Valkyrie** Dennis R. Jenkins,Tony Landis,2002 This top flight series provides a review of the world's most exciting combat aircraft North American Valkyrie XB-70A Steve Pace,1984 Beskriver udviklingen af det amerikanske bombefly XB 70A herunder prøveflyvningerne Flyet blev opgivet og kom aldrig i operativ drift *Valkyrie* Graham Simons,2011-11-01 During the 1950s at the time Elvis Presley was rocking the world with Hound Dog and the USA was aiming to become the world's only superpower plans were being drawn at North American Aviation in Southern California for an incredible Mach 3 strategic bomber The concept was born as a result of General Curtis LeMay's desire for a heavy bomber with the weapon load and range of the subsonic B 52 and a top speed in excess of the supersonic medium bomber the B 58 Hustler If LeMay's plans came to fruition there would be 250 Valkyries in the air it would be the pinnacle of his quest for the ultimate strategic bomber operated by America's Strategic Air Command The design was a leap into the future that pushed the envelope in terms of exotic materials avionics and power plants However in April 1961 Defense Secretary McNamara stopped the production go ahead for the B 70 because of rapid cost escalation and the USSR's newfound ability to destroy aircraft at extremely high altitude using either missiles or the new Mig 25 fighter Nevertheless in 1963 plans for the production of three high speed research aircraft were approved and construction proceeded In September 1964 the first Valkyrie now re-coded A V 1 took to the air for the first time and in October went supersonic This book is the most detailed description of the design engineering and research that went into this astounding aircraft It is full of unpublished details photographs and firsthand accounts from those closely associated with the project Although never put into full production this giant six engined aircraft

became famous for its breakthrough technology and the spectacular images captured on a fatal air to air photo shoot when an observing Starfighter collided with Valkyrie A V 2 which crashed into the Mojave Desert The loss of the 750 million aircraft and two lives stopped future development although there were several attempts to redesign it as an airliner to compete against the European Concorde

Xb-70 Valkyrie Jeannette Remak, Joseph Ventolo, Jr., 2016-02-17 XB 70 The Return To Valhalla is a look back at the XB 70 Valkyrie and the amazing program that could have should have been However due to politics and a major accident the program was canceled The Return to Valhalla is a revised version of the first book XB 70 The Ride to Valhalla but has been updated with new material and photographs including the permanent move to the new Research and Development hangar at the National Museum of the U S Air Force

North American XB-70 Valkyrie in Pictures Graham M. Simons, 2026-03-30 Flying at 70 000 feet carrying nuclear weapons at Mach 3 for thousands of miles the North American Aviation XB 70 Valkyrie was not merely going to redefine military aviation but the very nature of warfare itself The XB 70 flew so fast and so high it would only appear on radar screens for a fleeting moment making it impossible for enemy controllers to direct their interceptors to the target before it flew out of range When it was first designed in the 1950s the enemy meaning at the time the Soviet Union had no aircraft that could match the XB 70 s capabilities rendering it almost invulnerable But just as the US was developing its technologies so too were the Soviets The introduction of their first surface to air missiles led to the US adopting low level missions to sneak under radar This effectively neutralised the XB 70 s main characteristics and ultimately the programme which had cost the United States a staggering 800 million the equivalent to 8 4 billion in modern terms was cancelled In this book the renowned aviation historian and author Graham M Simons explores the full story of the development of this remarkable supersonic bomber through a unique collection of images He reveals the many challenges that the North American engineers faced particularly with regards to engines and fuel all of which are fully explained As well as the technical and operational characteristics of the XB 70 Mr Simons includes first hand testimony and analyses the accidents and incidents the aircraft were involved in A detailed timetable allows the reader to comprehend the XB 70 s protracted history A beautifully elegant machine just two of the ground breaking XB 70s were produced the first flight taking place on 21 September 1964 In this magnificent full colour book this unique supersonic aircraft can be seen in all its glory
