## **North Star Over My Shoulder A Flying Life:**

*North Star over My Shoulder* Bob Buck, 2002-05-04 It is rare to find one person whose life embodies the history of an industry the way Bob Buck's life encompasses the history of commercial aviation in America Buck first flew in the 1920s inspired by the exploits of Charles Lindbergh In 1930 at age sixteen he flew solo from coast to coast breaking the junior transcontinental speed record In 1936 he flew nonstop from Burbank California to Columbus Ohio in a 90 horsepower Monocoupe to establish a world distance record for light airplanes He joined Transcontinental and Western Air T when he retired thirty seven years later he had made more than 2 000 Atlantic crossings and his role had progressed from such tasks as retracting a DC 2's landing gear with a cockpit based hand pump to command of a wide body 747 Buck's experiences go back to a time when flying was something glamorous He flew with and learned from some true pioneers of aviation the courageous pilots who created the airmail service during flying's infancy At the behest of his employer Howard Hughes Buck spent three months flying with Tyrone Power on a trip to South America Africa and Europe He flew the New York Paris Cairo route in the days when flight plans called for lengthy stopovers and enjoyed all that those romantic places had to offer He took part in a flight that circled the globe sideways from pole to pole He advised TWA's president on the shift to jet planes a world expert on weather and flight Buck used a B 17G to chase thunderstorms worldwide as part of a TWA Air Force research project during World War II for which he was awarded the Air Medal as a civilian by President Truman In *North Star over My Shoulder* Bob Buck tells of a life spent up and over the clouds and of the wonderful places and marvelous people who have been a part of that life He captures the feel taste and smell of flying's greatest era how the people lived what they did and felt and what it was really like to be a part of the world as it grew smaller and smaller He relates stories from his innumerable visits to Paris the city he loves more than any other echoing Gertrude Stein's view that America is my country and Paris is my home town and from his trips to the Middle East including flights to Israel before and after it became a state A terrific storyteller and a fascinating man Bob Buck has turned his well lived life into a delightful memoir for anyone who remembers when there really was something special in the air

Hallion,2010 **God Knows All Your Names** Paul N. Herbert,2009 People with only a slight interest in history will enjoy these fascinating short and easy to understand stories Serious history buffs will like these lesser known episodes not the stories we ve heard a million times For example try to find anyone who knows about the attempted slave insurrection in Fairfax County Virginia With Mary Lincoln s spending habits who knew that Abraham Lincoln actually saved an enormous percentage of his presidential salary A slave honored in Virginia with a monument the history of Lee Highway which opened with great fanfare in 1923 as a 3 000 mile road from Washington DC to San Diego a story about the Little River Turnpike the second oldest turnpike in America built partly by slaves and captured Hessian soldiers You ll read about two Civil War ships that collided in the Potomac River Victims included wounded soldiers wives and one soldier s six year old son You ll read a great account of the massive Civil War corruption You ll learn about the disastrous condition of the treasury sound familiar during the Revolutionary War The government tried everything including a lottery to get the country afloat in a sea of red ink But the most fascinating story may be about the Revolutionary War soldier who faked his own desertion to defect to the enemy with the highly secretive mission of going behind enemy lines to capture and return for trial the worst traitor in American history Benedict Arnold Bet you never heard of this story There are many other stories in this eclectic heavily researched manuscript There s a story about the Christmas Truce in World War One about long forgotten holidays in Virginia about the retrocession which sent an area of Washington back to Virginia in 1846 and about the impeachment of a Supreme Court justice it happened only once And more **Our Robots, Ourselves** David A. Mindell,2015-10-13 An essential book it is required reading as we seriously engage one of the most important debates of our time Sherry Turkle author of Reclaiming Conversation The Power of Talk in a Digital Age From drones to Mars rovers an exploration of the most innovative use of robots today and a provocative argument for the crucial role of humans in our increasingly technological future In Our Robots Ourselves David Mindell offers a fascinating behind the scenes look at the cutting edge of robotics today debunking commonly held myths and exploring the rapidly changing relationships between humans and machines Drawing on firsthand experience extensive interviews and the latest research from MIT and elsewhere Mindell takes us to extreme environments high atmosphere deep ocean and outer space to reveal where the most advanced robotics already exist In these environments scientists use robots to discover new information about ancient civilizations to map some of the world s largest geological features and even to commute to Mars to conduct daily experiments But these tools of air sea and space also forecast the dangers ethical quandaries and unintended consequences of a future in which robotics and automation suffuse our everyday lives Mindell argues that the stark lines we ve drawn between human and not

human manual and automated aren't helpful for understanding our relationship with robotics Brilliantly researched and accessibly written *Our Robots Ourselves* clarifies misconceptions about the autonomous robot offering instead a hopeful message about what he calls rich human presence at the center of the technological landscape we are now creating *Air & Space Smithsonian*, 2002     **Library Journal**, 2002     **Soaring**, 2005     **The World at My Feet** Meryl Getline, 2004 Not long ago young women with mile high dreams were limited to flying the skies only as passengers or flight attendants But aviation has always progressed because of the dreams of its pioneers Meryl Getline is one of those pioneers She dreamed of being a pilot She was never content to merely ride the plane she wanted to fly it too Certain that she had the right stuff Meryl decided at a time when there was little or no opportunity for women that she was going to be a captain for a major airline Facing monumental challenges and against near impossible odds Meryl succeeded at her goal Publisher description     *The Publishers Weekly*, 2002     *Aviation Week & Space Technology*, 2002     **NASA's Contributions to Aeronautics** Richard Hallion, 2010 Two volume collection of case studies on aspects of NACA NASA research by noted engineers airmen historians museum curators journalists and independent scholars Explores various aspects of how NACA NASA research took aeronautics from the subsonic to the hypersonic era publisher description     **Talking Book Topics**, 2004     **Cassette Books** Library of Congress. Manasek, 2005 Dartmouth College boasts one of the largest collections of old scientific instruments in North America they range from precision machines that represented the most advanced technology of their day to homemade devices produced by faculty and students This book examines approximately 150 items from this remarkable collection to offer insights into the teaching of science and the conduct of scientific research at a leading educational institution Though the instruments are beautifully photographed and presented the authors do not treat them as isolated objects rather they stress the historical and social circumstances of the instruments creation and use The instruments are grouped by function emphasizing their roles in the scientific enterprise and they are often presented with supporting documentation such as bills of sale that shed light on how they were produced and consumed The photographs often focus on details of their operation and parts giving a dynamic rather than static sense of the objects A substantial introductory essay places the collection in context while the descriptions of the instruments stress their design function and use This beautiful book showcases an extraordinary collection and situates the objects in terms of the prevailing scientific and educational practices of their day
