Northern Isles Orkney And Shetland:

The Northern Isles Alexander Fenton, 1997 The Northern Isles stand at a crossroads of North Atlantic Europe subject to the competing influences of Scandinavia and Scotland Sandy Fenton's detailed study of the material culture of Orkney and Shetland is combined with thorough linguistic analysis and is based on years of study and sifting of a mass of detail Much of the material is new based on extensive research by the author on manuscript and other written sources and on knowledge freely imparted by many local inhabitants It illuminates the complexity of numerous interlocking factors draws a picture of a fascinating and varied existence and reveals the past not as a static tableau but a process of continuous change This book recreates the physical environment in which the people lived their crops and livestock the harvest of the sea their houses the food they ate These things dominated their lives and form the background which is the key to understanding the character of these fascinating islands This major work has earned its place as a key contribution to European ethnology and won the Dag Stromback Award of the Royal Gustav Academy Sweden

A Norse Settlement in the Outer Hebrides Niall Sharples, 2019-12-19 The settlement at Bornais in the Western Isles of Scotland is one of the largest rural settlements known from the Norse period in Britain It spans the period from the fifth to the fifteenth century AD when the Atlantic seaboard was subject to drastic changes The islands were systematically ravaged by Viking raiders and then colonised by Norse settlers In the following centuries the islanders were central to the emergence of the Kingdom of Man and the Isles played a crucial role in the development of the Lordship of the Isles and were finally assimilated into the Kingdom of Scotland This volume explores the stratigraphic sequence uncovered by the excavation of Bornais mounds 2 and 2A The excavation of mound 2 revealed a sequence of high status buildings that span the Norse occupation of the settlement One of these houses constructed at the end of the eleventh century AD was a well preserved bow walled longhouse and the careful excavation and detailed recording of the floor layers has revealed a wealth of finds that provides invaluable insight into the activities taking place in this building The final house in this sequence is very different in form and use and clearly indicates the increasing Scottish influence on the region at the beginning of the thirteenth century The excavation of mound 2A provides an insight into the less prestigious areas of the settlement and contributes a significant amount of evidence on the settlement economy The area was initially cultivated before it became a settlement local and throughout its life a focus on agricultural activities such as grain drying and processing appears to have been important In the thirteenth century the mound was occupied by a craftsman who produced composite combs gaming pieces and simple tools The evidence presented in this volume makes a major contribution to the understanding of Norse Scotland and the colonisation of the North Atlantic in a period of dramatic transformations World Englishes Volumes I-III Set Tometto Hopkins, Kendall Decker, John McKenny, 2013-02-14 World Englishes is a twelve volume series presenting a comprehensive detailed survey of English as it is spoken all over the world The volumes are organised into four groups covering Britain Europe America Africa and Asia and celebrate English in all its diversity The chapters contain maps facts and figures and a detailed description about English as it is spoken in each region and are an invaluable library resource for undergraduates postgraduates and academics interested in the diversity of the English language **The Northern and Western Isles in the Viking World** Alexander Fenton, Hermann Pálsson, 1984 Om Orkney og Shetlands ernes F r ernes og Island *The Lesser-Known Varieties of English* Daniel Schreier, Peter Trudgill, Edgar W. Schneider, Jeffrey P. Williams, 2010-03-04 This is the first ever volume to compile sociolinguistic and historical information on lesser known and relatively ignored native varieties of English around the world Exploring areas as diverse as the Pacific South America the South Atlantic and West Africa it shows how these varieties are as much part of the big picture as major varieties and that their analysis is essential for addressing some truly important issues in linguistic theory such as dialect obsolescence and death language birth dialect typology and genetic classification patterns of diffusion and transplantation and contact induced

language change It also shows how close interwoven fields such as social history contact linguistics and variationist sociolinguistics are in accounting for their formation and maintenance providing a thorough description of the lesser known varieties of English and their relevance for language spread and change , **British Consciousness and Identity**

Brendan Bradshaw, Peter Roberts, 2003-12-18 The historical resonances of the concept of Britain for the communities of the Atlantic Archipelago in the early modern period are explored here in terms of the ideological demands made upon it Various and competing concepts of Britishness are examined from the Henrician legislation which united Wales with England and which created the kingdom of Ireland to the Act of Union of the realms of England and Scotland The chequered history of the consciousness of Britain as a polity which embraced the united kingdoms is discussed in relation to the distinctive national identities of the constituent countries and the question of the impact of Britain on English policy making under the Tudor Stuart and the first Hanoverian monarchs is addressed The puzzling resistance of the Irish to assimilation in contrast to the docility of the Welsh and eventually of the Scots is also explored **Negotiating the North** Sarah Semple, Alexandra

Sanmark, Frode Iversen, Natascha Mehler, 2020-06-11 This book brings together the cumulative results of a three year project focused on the assemblies and administrative systems of Scandinavia Britain and the North Atlantic islands in the 1st and 2nd millennia AD In this volume we integrate a wide range of historical cartographic archaeological field based and onomastic data pertaining to early medieval and medieval administrative practices geographies and places of assembly in Norway Sweden Denmark Iceland the Faroe Islands Scotland and eastern England This transnational perspective has enabled a new understanding of the development of power structures in early medieval northern Europe and the maturation of these systems in later centuries under royal control In a series of richly illustrated chapters we explore the emergence and development of mechanisms for consensus We begin with a historiographical exploration of assembly research that sets the intellectual agenda for the chapters that follow We then examine the emergence and development of the thing in Scandinavia and its export to the lands colonised by the Norse We consider more broadly how assembly practices may have developed at a local level yet played a significant role in the consolidation and at times regulation of elite power structures Presenting a fresh perspective on the agency and power of the thing and cognate types of local and regional assembly this

interdisciplinary volume provides an invaluable in depth insight into the people places laws and consensual structures that shaped the early medieval and medieval kingdoms of northern Europe **Embers of the Hands** Eleanor

Barracough, 2025-01-07 A New York Times Editors Choice A brilliantly written brilliantly conceived Tom Holland history of the Viking Age from mighty leaders to rebellious teenagers told through their runes and ruins games and combs trash and treasure In imagining a Viking a certain image springs to mind a barbaric warrior leaping ashore from a longboat and ready to terrorize the hapless local population of a northern European town Yet while such characters define our imagination of the Viking Age today they were in the minority Instead in the time stopping soils water and ice of the North Eleanor Barracough

excavates a preserved lost world one that reimagines a misunderstood society By examining artifacts of the past remnants of wooden gaming boards elegant antler combs doodles by imaginative children and bored teenagers and runes that reveal hidden loves furious curses and drunken spouses summoned home from the pub Barraclough illuminates life in the medieval Nordic world as not just a world of rampaging warriors but as full of globally networked people with recognizable concerns This is the history of all the people children enslaved people seers artisans travelers writers who inhabited the medieval Nordic world Encompassing not just Norway Denmark and Sweden but also Iceland Greenland the British Isles Continental Europe and Russia this is a history of a Viking Age filled with real people of different ages genders and ethnicities as told through the traces that they left behind Embers of the hands is a poetic kenning from the Viking Age that referred to gold But no less precious are the embers that Barraclough blows back to life in this book those of ordinary lives long past
