A Critical Edition of Caroline Norton's Love in "The World" Ross Nelson, Marie Mulvey-Roberts, 2023-10-10 Caroline Norton's forgotten novel which has remained unpublished until now tells of the perils of courtship facing a naive young girl Alixe who has been launched onto the London social season Her encounters with both a worthy and an undesirable suitor open an intriguing window onto the fashionable society of the 1820s in which Love in the World takes place In placing her heroine in these predicaments Norton was able to draw upon her own experiences of the bon ton as the time in which the novel is set coincides with her first ball in March 1826 when she burst upon the scene with all her beauty and brilliance later recalling I came out to find all London at my feet She believed that London could be as callous as the metropolitan social scene might prove treacherous and in alerting the reader to the dangers of fashionable society she makes ample use of her own observations as a debutante at her first London season In a highly readable and coherent narrative with an indeterminate ending which throws a spotlight onto her life and times the plot of Love in the World initially follows a pattern broadly representative of her own experience before developing in unexpected and surprising ways

Shakespeare's adolescents Victoria Sparey, 2024-04-09 Shakespeare's adolescents examines the varied representation of adolescent characters in Shakespeare's plays Using early modern medical knowledge and an understanding of contemporary theatrical practices the book unpacks complexities that surrounded the cultural and theatrical representations of signs associated with an individual's physical maturation Each chapter explores the implications of different signs of puberty in verbal cues facial adornments vocal traits and body sizes to illuminate how Shakespeare presents vibrant adolescent selves and stories By analysing female and male puberty together in its discussion of adolescence Shakespeare's adolescents provides fresh insight into the age based symmetry of early modern adolescent identities The book uses the adolescent's state of transformation to illuminate how the unfixed nature of adolescence was valued in early modern culture and through Shakespeare's celebrated characters and actors

Occultism in a Global Perspective Henrik Bogdan, Gordan Djurdjevic, 2014-09-11 The study of the ideas and practices associated with occultism is a rapidly growing branch of contemporary scholarship However most research has focused on English and French speaking areas and has not addressed the wider spread and significance of occultism

Occultism in a Global Perspective presents a broad international overview Essays range across the German magical order of the Fraternitas Saturni esoteric Satanism in Denmark sexual magic in Colombia and the reception of occultism in modern Turkey India and the former Yugoslavia As any other form of cultural practice the occult is not isolated from its social discursive religious and political environment By studying occultism in its global context the book offers insights into the reciprocal relationships that colour and shape regional occultism

Female Beauty Systems Christine Adams, Tracy Adams, 2015-09-04 Female beauty systems everywhere are complex integrating markers of class status power and sexuality to perform the fundamental function of sorting individuals into categories of more or less desirable Heirs to the tradition of courtly love modern western female beauty systems tend to share the norm of man as pursuer woman as pursued having developed around the trope of the madly desiring poet or knight supplicating his aloof and lovely lady for her favor The apparent longevity of the courtly love tradition raises the question of whether the way in which it structures male desire in reaction to female beauty is part of a universal tendency an evolutionary adaptation despite clear evidence that female beauty systems are also in fact socially constructed and reflect enormous ambivalence about the power and performance of beauty Although modern western female beauty systems are routinely demystified and contested today the purveyors of culture that support them institutional intellectual artistic commercial and popular continue as they always have to construe women as objects of male desire Still within this basic structure the systems have varied greatly across time and space with women using beauty as a form of social capital in widely differing ways Moreover as individuals have begun to experience their bodies as malleable and endlessly transformable rather than unruly and unyielding many have begun to experience beauty less as a given and more as a project The nine essays collected here examine a number of different Western female beauty systems over the centuries considering how women have complied with contributed to profited or suffered from and resisted them

Biographical Misrepresentations of British

Women Writers Brenda Ayres, 2017-11-08 This book is an investigation of the biases contradictions errors ambiguities gaps and historical contexts in biographies of controversial British women who published during the long nineteenth century many of them left unchecked and perpetuated from publication to publication Fourteen scholars analyze the agenda problems and strengths of biographical material highlighting the flaws deficiencies and influences that have distorted the portraits of women such as Lady Mary Wortley Montagu Mary Wollstonecraft Mary Hays Sydney Owenson Letitia Elizabeth Landon Felicia Hemans Elizabeth Barrett Browning Caroline Norton Elizabeth Gaskell Charlotte Bront Lady Florence Dixie George Eliot and Edith Simcox Through exposing distortions this fascinating study demonstrates that biographies are often more about the biographer than they are about the biographee and that they are products of the time in which they are written

By the Numbers Jessica Marie Otis, 2024 During the sixteenth and seventeenth centuries English numerical practices underwent a complex transformation with wide ranging impacts on English society At the beginning of the early modern period English men and women believed that God had made humans universally numerate although numbers were not central to their everyday lives Over the next two centuries rising literacy rates and the increasing availability of printed books revolutionized modes of arithmetical practice and education Ordinary English people began to use numbers and quantification to explain abstract phenomena as diverse as the relativity of time the probability of chance events and the constitution of human populations These changes reflected their participation in broader early modern European cultural and intellectual developments such as the Reformation and the Scientific Revolution By the eighteenth century English men and women still believed they lived in a world made by God but it was also a world made and made understandable by numbers
