**1250-1650** Anne M. Scott,2016-03-09 For a number of years scholars who are concerned with issues of poverty and the poor have turned away from the study of charity and poor relief in order to search for a view of the life of the poor from the point of view of the poor themselves Great studies have been conducted using a variety of records resulting in seminal works that have enriched our understanding of pauper experiences and the influence and impact of poverty on societies If we return our gaze to charity with the benefit of those studies questions approaches sources and findings what might we see differently about how charity was experienced as a concept and in practice at both community and personal levels In this collection contributors explore the experience of charity towards the poor considering it in spiritual intellectual emotional personal social cultural and material terms The approach is a comparative one across different time periods nations and faiths Contributors pay particular attention to the way faith inflected charity in the different national environments of England and France as Catholicism and Calvinism became outlawed and or minority faith positions in these respective nations They ask how different faith and beliefs defined or shaped the act of charity and explore whether these changed over time even within one faith The sources used to answer such questions go beyond the textual as contributors analyse a range of additional sources that include the visual aural and material *The Conservation Movement in Norfolk* Susanna Wade Martins,2015

histories of the three Blackwells reinforce the importance of kinship and the development of the early modern state centred in an increasingly global London and illustrate the ownership of the memory of the civil wars facilitated by their kin links to Cromwell and John Lambert architect of Cromwell's Protectorate by those who fought against Charles I Suitable for specialists in the area and students taking courses on early modern English European and American history as well as those with a more general interest in the period

*Experiences of Poverty in Late Medieval and Early Modern England and France* Anne M. Scott, 2016-04-15 Exploring a range of poverty experiences socioeconomic moral and spiritual this collection presents new research by a distinguished group of scholars working in the medieval and early modern periods Collectively they explore both the assumptions and strategies of those in authority dealing with poverty and the ways in which the poor themselves tried to contribute to exploit avoid or challenge the systems for dealing with their situation The studies demonstrate that poverty was by no means a simple phenomenon It varied according to gender age and geographical location and the way it was depicted in speech writing and visual images could as much affect how the poor experienced their poverty as how others saw and judged them Using new sources and adopting new approaches to known sources the authors share insights into the management and the self management of the poor and search out aspects of the experience of poverty worthy of note from which can be traced lasting influences on the continuing understanding and experience of poverty in pre modern Europe

*Cities Divided* John Miller, 2007-03-29 The religious and political history of late seventeenth and early eighteenth century England is typically written in terms of conflict and division This was the period when party conflict exacerbated by religious enmities became a normal part of English life Rather than denying the importance of partisan divisions this book reveals how civic celebration designed as an expression of unity and amity was often used for partisan purposes reaching a peak in the 1710s The animosities were most marked in elections which were often corrupt and drunken and sometimes very violent But division and conflict were not universal Many towns avoided electoral contests not because they were in the pocket of a great aristocrat but as a matter of deliberate policy Despite occasional disorder urban government rarely broke down and even violent elections ended with bruises rather than fatalities Professor Miller suggests an explanation for this in the nature of urban governance While the formal structures of town government were profoundly undemocratic vacancies on corporations were most often filled by co option there was much participation consultation and negotiation in the lower levels of government In addition corporation members lived in close proximity to and did business with their fellow townspeople and needed to meet their expectations These expectations might have been modest they wanted streets to be reasonably clean and kept in adequate repair sewage and rubbish to be removed law and order maintained and the deserving poor relieved But they were the things that made daily life tolerable and for many they mattered more than politics

Political Space in Pre-industrial Europe Beat Kümin, 2016-04-22 Social and cultural studies are experiencing a spatial turn Micro sites localities empires as well as virtual or imaginary spaces attract

increasing attention In most of these works space emerges as a social construct rather than a mere container This collection examines the potential and limitations of spatial approaches for the political history of pre industrial Europe Adopting a broad definition of political the volume concentrates on two key questions Where did political exchange take place How did spatial dimensions affect political life in different periods and contexts Taken together the essays demonstrate that pre modern Europeans made use of a much wider range of political sites than is usually assumed not just palaces town halls and courtrooms but common fields as well as back rooms of provincial inns and that spatial dimensions provided key variables in political life both in terms of territorial ambitions and practical governance and in the more abstract forms of patronage networks representations of power and the emerging public sphere As such this book offers a timely and critical engagement with the spatial turn from a political perspective Focusing on the distinct constitutional environments of England and the Holy Roman Empire one associated with early centralization and strong parliamentary powers the other with political fragmentation and absolutist tendencies it bridges the common gaps between late medieval and early modern studies and those between historians and scholars from other disciplines Preface commentary and a sketch of research perspectives discuss the wider implications of the essays findings and reflect upon the value of spatial approaches for political history as a whole

Fields, Fens and Felonies Gregory J Durston, 2016-12-09 A new work on Crime and Punishment in East Anglia and elsewhere during the eighteenth century It was a time of highwaymen footpads and desperate petty offenders draconian penalties extremes of wealth and poverty corruption and rough and emerging forms of justice The contents include justices of the peace policing crimes courts and judges as well as such matters as summary trial and disposal jury trial execution and reprieve a variety of offences including murder and other homicides violence and sexual offences smuggling poaching property crimes riots and disturbances The book also looks at the various hierarchies that existed whether social legal judicial religious military or otherwise so as to exert a variety of social controls at a time of relative lawlessness A fascinating and statistically absorbing account of crimes responses and penal outcomes of the era Neither a micro history in the context of a parish hundred or small town nor national account but a more unusual criminal justice history of a major English region with its own correlation with London and the rest of England in addition to its local differences and quirks

The Magical Imagination Karl Bell, 2012-02-23 This innovative history of popular magical mentalities in nineteenth century England explores the dynamic ways in which the magical imagination helped people to adjust to urban life Previous studies of modern popular magical practices and supernatural beliefs have largely neglected the urban experience Karl Bell however shows that the magical imagination was a key cultural resource which granted an empowering sense of plebeian agency in the nineteenth century urban environment Rather than portraying magical beliefs and practices as a mere enclave of anachronistic tradition and the fantastical as simply an escapist refuge from the real he reveals magic s adaptive and transformative qualities and the ways in which it helped ordinary people navigate adapt to and resist aspects of modern

urbanization Drawing on perspectives from cultural anthropology sociology folklore and urban studies this is a major contribution to our understanding of modern popular magic and the lived experience of modernization and urbanization

**Africans in East Anglia, 1467-1833** Richard Maguire, 2021 What were the lives of Africans in provincial England like during the early modern period How where and when did they arrive in rural counties How were they perceived by their contemporaries This book examines the population of Africans in Norfolk and Suffolk from 1467 the date of the first documented reference to an African in the region to 1833 when Parliament voted to abolish slavery in the British Empire It uncovers the complexity of these Africans historical experience considering the interaction of local custom class structure tradition memory and the gradual impact of the Atlantic slaving economy Richard C Maguire proposes that the initial regional response to arriving Africans during the fifteenth and sixteenth centuries was not defined exclusively by ideas relating to skin colour but rather by local understandings of religious status class position ideas about freedom and bondage and immediate local circumstances Arriving Africans were able to join the region's working population through baptism marriage parenthood and work This manner of response to Africans was challenged as local merchants and gentry begin doing business with the slaving economy from the mid seventeenth century onwards Although the racialised ideas underpinning Atlantic slavery changed the social circumstances of Africans in the region the book suggests that they did not completely displace older more inclusive ideas in working communities

### **Regions and Designed Landscapes in Georgian England**

Sarah Spooner, 2015-06-26 Garden design evolved hugely during the Georgian period as symbols of wealth and stature the landed aristocracy had been using gardens for decades Yet during the eighteenth century society began to homogenise and the urban elite also started demanding landscapes that would reflect their positions The gardens of the aristocracy and the gentry were different in appearance use and meaning despite broad similarities in form Underlying this was the importance of place of the landscape itself and its raw material Contemporaries often referred to the need to consult the genius of the place when creating a new designed landscape as the place where the garden was located was critical in determining its appearance Genius loci soil type topography water supply all influenced landscape design in this period The approach taken in this book blends landscape and garden history to make new insights into landscape and design in the eighteenth century Spooner's own research presents little known sites alongside those which are more well known and explores the complexity of the story of landscape design in the Georgian period which is usually oversimplified and reduced to the story of a few great men
