**Norwich** Neil R. Storey, 2002      **Changing Representations of Nature and the City** Gabriel N. Gee, Alison Vogelaar, 2018-07-04 The turn of the 1960s 70s characterized by the rapid acceleration of globalization prompted a radical transformation in the perception of urban and natural environments The urban revolution and related prospect of the total urbanisation of the planet in concert with rapid population growth and resource exploitation instigated a surge in environmental awareness and activism One implication of this moment is a growing recognition of the integration and interconnection of natural and urban entities The present collection is an interdisciplinary inquiry into the changing modes of representation of nature in the city beginning from the turn of the 1960s 70s Bringing together a number of different disciplinary approaches including architectural studies and aesthetics heritage studies and economics environmental science and communication the collection reflects upon the changing perception of socio natures in the context of increasing urban expansion and global interconnectedness as they are were manifest in specific representations Using cases studies from around the globe the collection offers a historical and theoretical understanding of a paradigmatic shift whose material and symbolic legacies are still accompanying us in the early 21st century      *1970 Census of Population: United States, Alabama-Mississippi* , 1972      **Census of Population: 1960: Characteristics of the population. pt. **Changes Among Operating Banks and Branches** , Levelling and diffusion in the Cumbrian city dialect of Carlisle Sandra

Jansen,2018-05-14 This book presents a synchronic investigation of variation and change processes in Carlisle English a variety spoken in the far north west of England The dataset is based on sociolinguistic interviews and the variation in the variables Goose Goat and Foot T R and TH is analysed quantitatively in order to detect diffusion and levelling processes as outcomes of dialect contact scenarios in Carlisle Social Change and Continuity Barry Coward,2014-10-14 Barry Coward has revised his wide ranging text which outlines the major social changes that occurred in England in the two hundred years after the Reformation He examines the religious and intellectual changes resulting from revolutionary pressures as well as considering the impact of rapid inflation and population expansion in the later sixteenth and early seventeenth centuries Overall he stresses that social change combined with social continuity to produce a distinctive early modern English society

Multilingualism and Pluricentricity John Hajek,Catrin Norrby,Heinz L. Kretzenbacher,Doris Schüpbach,2023-11-20 This volume explores linguistic diversity and complexity in different urban contexts many of which have never been subject to significant sociolinguistic inquiry A novel mixture of cities of varying size from around the world is studied from megacities to smaller cities on the national periphery All chapters discuss either the multilingualism or the pluricentric aspect of the linguistic diversity in urban areas most focussing on one urban centre The book showcases multiple approaches ranging from a quantitative investigation based partly on census data to qualitative studies flowing for example from extensive

ethnographic work or discourse analysis The diverse theoretical backgrounds and methodological approaches in the individual chapters are complemented by two chapters outlining the current trends and debates in the sociolinguistic research on urban multilingualism and pluricentricity and suggesting some possible directions for future investigations in this field The book thus provides a broad overview of sociolinguistic research of multilingual places and pluricentric languages

*The City's Hinterland* Keith Hoggart, 2016-03-16 Despite the fact that the rural commuter belts of cities are major loci of population change economic growth and dynamic social change within city regions most research tends to ignore this area while focusing on the built up city core However with the current emphasis on the role of rural areas in policy debates it is vital to recognize the importance of the commuter belt By comparing four major European cities in England France Germany and Spain this book offers the first comparative investigation of the dynamism of city rural hinterlands It assesses whether rural areas will become effectively integrated into quality of life improvements as a result of their inter dependencies with cities focusing on the critical arenas of employment change housing and service provision In doing so it investigates how change in these three fields impact on the quality of life and physical environment of rural hinterlands
