*Not in Front of the Servants* Frank Victor Dawes, 1974      **Domestic Service and the Formation of European Identity** Antoinette Fauve-Chamoux, 2004 Before the Servant Project began its activities on the initiative of the editor of this book the long term history of domestic service was still in its beginning stage This volume is the first wide ranging attempt to determine the role of domestic workers both in past and present times Domestic service was of major importance in the multi secular process of urbanization and socio economic development of European societies Today domestic workers mainly women represent an important component of international labour migrations to Western countries Instead of disappearing as expected for a long time paid domestic work is currently experiencing a kind of resurgence The contributions assembled in this volume analyze the situation of domestic workers and contribute to improve knowledge concerning their individual characteristics gender ethnic group religion origin motivation and cultural identity relationship with their own families and those of the employers Further topics are connections with the home country and place of destination legal status rights and duties in order to understand the current globalization of domestic work      **Servants and Paternalism in the Works of Maria Edgeworth and Elizabeth Gaskell** Julie Nash, 2017-11-30 Writing during periods of dramatic social change Maria Edgeworth and Elizabeth Gaskell were both attracted to the idea of radical societal transformation at the same time that their writings express nostalgia for a traditional paternalistic ruling class The author shows how this tension is played out especially through the characters of servants in short fiction and novels such as Edgeworth's *Castle Rackrent* *Belinda* and *Helen* and Gaskell's *North and South* and *Cranford* Servant characters the author contends enable these writers to give voice to the contradictions inherent in the popular paternalistic philosophy of their times because the situation of domestic servitude itself embodies such inconsistencies Servants whose labor was essential to the economic and social function of eighteenth and nineteenth century British society made up the largest category of workers in England by the nineteenth century and yet were expected to be socially invisible At the same time they lived in the same houses as their masters and mistresses and were privy to the most intimate details of their lives Both Edgeworth and Gaskell created servant characters who challenge the social hierarchy thus exposing the potential for dehumanization and corruption inherent in the paternalistic philosophy the author's study opens up important avenues for future scholars of women's fiction in the nineteenth century      **Not in Front of the Servants** Frank Victor Dawes, 1989      **Not in Front of the Servants** Frank Victor Dawes, 2005 This book details the lives of the servants in large British houses during the 19th and the 20th centuries Over 250 former domestic servants contributed their reminiscences and anecdotes of life in service      **The Servant's Hand** Bruce Robbins, 1993 A work of innovative literary and cultural history *The Servant's Hand* examines the representation of servants in nineteenth century British fiction Wandering in the margins of these texts that are not about them servants are visible only as anachronistic appendages to their masters and as functions of traditional narrative form Yet their persistence

Robbins argues signals more than the absence of the ordinary people they are taken to represent Robbins's argument offers a new and distinctive approach to the literary analysis of class while it also bodies forth a revisionist counterpolitics to the realist tradition from Homer to Virginia Woolf Originally published in 1986 Columbia University Press *The Servant's Hand* is appearing for the first time in paperback

**Perspectives on Welsh Industrial History** Louise Miskell, 2019-12-15 This volume tells a story of Welsh industrial history different from the one traditionally dominated by the coal and iron communities of Victorian and Edwardian Wales. Extending the chronological scope from the early eighteenth to the late twentieth century and encompassing a wider range of industries, the contributors combine studies of the internal organisation of workplace and production with outward facing perspectives of Welsh industry in the context of the global economy. The volume offers important new insights into the companies, the employers, the markets and the money behind some of the key sectors of the Welsh economy from coal to copper and from steel to manufacturing and challenges us to reconsider what we think of as constituting industry in Wales.
