China's New Underclass Xinying Hu, 2013-07-03. This book examines the implications of China's economic reforms for domestic work and domestic workers. The author examines the factors that give rise to paid domestic work in a socialist economy and goes on to look at the need for social protection of domestic workers within cities in contemporary China. Using a socialist feminist approach, the book investigates how China's economic restructuring has deliberately crafted a domestic service sector from the top down. Through the analysis of the situation of paid domestic labour, it demonstrates how the changes in socialist ideology under a market economy have justified the state's support for paid domestic labour, the large role of the state in these ideological changes, and how domestic labour is related to economic changes and the market economy itself. The book argues that state's economic reforms have changed gender and class relations in Chinese society. Based on interviews with domestic workers, their employers, their social advocates, and government officials, this book examines the economic and social security of domestic workers and provides information about their precarious working conditions that could be improved through public policy. It also explores women's agency and activism and the current role of

NGOs and trade unions in labour protection

International Trade and Neoliberal Globalism Paul Bowles, Ray Broomhill, Teresa Gutiérrez-Haces, Stephen McBride, 2013-05-13 International trade must be analysed within the historical context within which it occurs Behind the statistics on trade flows lie power structures class interests and international hierarchies These change over time and how countries respond to them has critical implications for their citizens as well being In this book the history of trade in Australia Canada and Mexico is analysed Trade agreements are analysed in detail to explore the new forms that dependence and subordination have taken Arguing that the free trade agreements are significantly biased in favour of the United States the contributors analyse how each of the three countries are being subject to specific forms of re peripheralisation and examine possible alternatives for a progressive future based on an integration in the global economy which enhances rather than limits democracy and social justice By providing an historical and critical account of trade policy in the three countries the book provides a welcome antidote to the ahistorical accounts of free trade supporters

Inequality and the Fading of Redistributive Politics Keith Banting, John Myles, 2013-09 All advanced democracies have faced the pressures of globalization technological change and new family forms which have generated higher levels of inequality in market incomes But countries have responded differently reflecting differences in their domestic politics The politics of who gets what and why is at the core of this volume the first to examine this question in an explicitly Canadian context In *Inequality and the Fading of Redistributive Politics* leading political scientists sociologists and economists point to the failure of public policy to contain surging income inequality Government programs are no longer offsetting the growth in inequality generated by the market and Canadian society has become more unequal The redistributive state is fading due to powerful forces that have reshaped the politics of social policy including global economic pressures ideological change shifts in the influence of business and labour changes in the party system and the decline of equality seeking civil society organizations On one side the organizations that speak for the economic interests of lower income Canadians mobilizing resources expertise and attention on their behalf have been weakened On the other side changes in the distribution of power within our political institutions have made concerted action to tackle inequality more difficult This volume demonstrates conclusively that action and inaction policy change and policy drift are at the heart of growing inequality in Canada Governments have not responded energetically to the evidence and their indifference calls into question Canada's record as a kinder gentler nation

The Canadian Labour Movement Craig Heron, Charles Smith, 2020-06-01 In *The Canadian Labour Movement* historian Craig Heron and political scientist Charles Smith tell the story of Canada s workers from the midnineteenth century through to today painting a vivid picture of key developments such as the birth of craft unionism the breakthroughs of the fifties and sixties and the setbacks of the early twenty first century The fourth edition of this book has been completely updated with a substantial new chapter that covers the period from the great recession of 2008 through to 2020 In this chapter Smith

describes the fallout of the financial crisis how Stephen Harper's government restricted labour rights the rise of the gig economy and precarious work and the continued de industrialization in the private sector These pressures contributed to fracturing the movement as when Unifor the largest private sector union split from the Canadian Labour Congress the established house of labour Through it all rank and file union members have fought for better conditions for all workers including through campaigns like the fight for a 15 minimum wage The Canadian Labour Movement is the definitive book for anyone interested in understanding the origins achievements and challenges of the labour and social justice movements in Canada
