Steadman, 2006-10-15 Publisher Description **The Endemic Flora of St Helena** Quentin C. B. Cronk, 2000 This work contains an account of all the endemic flowering plants and ferns of St Helena an isolated island in the South Atlantic well known as the site of Napoleon s exile in 1815 Less well known however is that it has a flora of outstanding interest with many endemic genera **Biology of Marine Birds** E. A. Schreiber, Joanna Burger, 2001-08-16 Biology of Marine Birds provides the only complete summary of information about marine birds ever published It analyzes their breeding biology ecology taxonomy evolution fossil history physiology energetics and conservation The book covers four orders of marine birds in detail and includes two summary chapters that address the biology of shorebirds and wading birds and their lives in the marine environment Summary tables give detailed information on various aspects of their life histories breeding biology physiology and energetics and demography It provides a guide to ornithologists and students for research projects *Avian Biology* Donald Farner, 2012-12-02 Avian Biology Volume VIII assesses selected aspects of avian biology It is generally the conceptual descendant of Marshall s earlier treatise Biology and Comparative Physiology of Birds but is more than simply a

revision of it This volume consists of two relatively lengthy diverse chapters that focus on adaptive significance of coloniality in birds and fossil records of birds In particular this volume looks into group phenomena related to central place systems that is systems in which one or more individuals move to and from a centrally located place in the course of daily activities It also addresses selective factors that have been suggested to explain why individuals should form colonies rather than disperse within the available foraging space This book will be useful as a reference material for advanced students and instructors in this field of interest **Cuckoos of the World** Johannes Erritzøe, Clive F. Mann, Frederik Brammer, Richard A.

Fuller, 2012-03-29 This authoritative handbook part of the Helm Identification Guides series looks in detail at the world's cuckoos couas and coucals the family Cuculidae Famed as brood parasites of other birds the cuckoos include a diverse range of species from the roadrunners of North America to the spectacular malkohas of southern Asia This book discusses the biology and identification of these birds on a species by species basis bringing together the very latest research with accurate range maps more than 600 stunning colour photographs that illuminate age and racial plumage differences and 36 superb plates by a team of internationally renowned artists The Behaviour, Population Biology and Physiology of the

Petrels John Warham, 1996-06-10 Over a lifetime's work with the group John Warham has firmly established himself as one of the foremost experts on these birds In this book he completes the major survey started in his earlier work *The Petrels Their Ecology and Breeding Systems* The text is comprehensive well illustrated and fully referenced Together with the earlier companion volume this encyclopedic treatment presents an amazingly detailed yet accessible introduction to this important much studied bird family for the biologist the conservation manager and the dedicated amateur ornithologist Key Features Authored by an authoritative expert in the field Explores an important model group of birds Appeals to a conservation interest Extinct Birds Julian P. Hume, 2017-08-24 A comprehensive review of the hundreds of bird species that have

become extinct over the last 1 000 years of habitat degradation over hunting and rat introduction *Extinct Birds* has become the standard text on this subject covering both familiar icons of extinction as well as more obscure birds some known from just one specimen or from travellers tales This second edition is expanded to include dozens of new species as more are constantly added to the list either through extinction or through new subfossil discoveries The book is the result of decades of research into literature and museum drawers as well as caves and subfossil deposits which often reveal birds long gone that disappeared without ever being recorded by scientists while they lived From Great Auks Carolina Parakeets and Dodos to the amazing yet almost completely vanished bird radiations of Hawaii and New Zealand via rafts of extinction in the Pacific and elsewhere this book is both a sumptuous reference and astounding testament to humanity's devastating impact on wildlife *New Zealand Journal of Zoology*, 1978-09 *Avian Paleontology at the Close of the 20th Century* Society of Avian Paleontology and Evolution. Symposium, 1999 The 32 papers collected herein reflect the great diversity and interest that the study of fossil birds has generated in recent years The first seven papers Mourer Chauvir et al Worthy and Jouventin
