

# Palliative Care For Older People In Care Homes

**Fiona M. Ross, Ruth Harris, Joanne M.  
Fitzpatrick, Clare Abley**

## **Palliative Care For Older People In Care Homes:**

**End of Life in Care Homes** Jeanne Samson Katz, Sheila M. Peace, 2003-04-03 In our society the overwhelming majority of people die in later life They typically die slowly of chronic diseases with multiple co existing problems over long periods of time They spend the majority of their final years at home but many will die in hospitals or care homes This book explores the possibilities for improving the care of older people dying in residential care and nursing homes It argues that there are aspects of palliative care that given the right circumstances are transferable to dying people in settings that are not domestic or hospice based End of Life in Care Homes describes what happens in nursing and residential care homes when a resident is dying how carers cope and the practical health and emotional challenges that carers face on top of their day to day work Based on detailed research from both the UK and US the book shows how the situation can be improved **Palliative Care for Older People in Care Homes** J. M. Hockley, David Clark, 2002 In this work contributors from nursing and medicine from the social and health sciences and from ethics and health planning provide an international perspective on key issues in relation to end of life care such as assessment loss autonomy and the ethics of end of life decision making **Oxford Textbook of Anaesthesia for the Elderly Patient** Christopher Dodds, Chandra Kumar, Bernadette Veering, 2014-03 Oxford Textbook of Anaesthesia for the Elderly Patient provides a comprehensive and detailed overview of all aspects of anaesthesia for the elderly patient looking at the effect of ageing on the systems of the body and the role that age has on drug mechanisms Textbook of Palliative Care Roderick Duncan MacLeod, Lieve Van den Block, 2025-02-25 This second edition provides the most up to date information on all aspects of palliative care including recent developments including COVID 19 global policies service provision symptom management professional aspects organization of services palliative care for specific populations palliative care emergencies ethical issues in palliative care research in palliative care public health approaches and financial aspects of care This new Textbook of Palliative Care remains a unique comprehensive clinically relevant and state of the art book aimed at advancing palliative care as a science a clinical practice and as an art Palliative care has been part of healthcare for over fifty years but it still needs to be explained to many Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families However the science of palliative care is advancing and this new edition will contribute to a better understanding This new edition offers 86 updated or new chapters out of 108 written by experts in their given fields providing up to date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be We present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care The Textbook includes sections addressing aspects such as symptom management and care provision organization of care in different settings care in specific disease groups palliative care emergencies ethics public health

approaches and research in palliative care This new Textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important specialists as well as non specialists in any setting where people with serious advanced illnesses are residing It is also an important resource for researchers policy and decision makers at national or regional levels Neither the science nor the art of palliative care will stand still so the Editors and contributors from all over the world aim to keep this Textbook updated so that the reader can find new evidence and approaches to care

**Nursing Care of Older People** Andrew Hindle, Alison Coates, 2011-02-10 Nursing care of older people provides a new contemporary evidence based and practical guide to meeting the holistic health needs of older patients With a clear and engaging style the authors outline a rigorous and robust account of underlying principles and evidence with tools and tips for best nursing practice This comprehensive textbook examines the changes brought about by the ageing process to both physical and mental health as well as learning disabilities Providing essential insights necessary to deliver high quality nursing in primary and hospital care this text covers a wide range of issues and clinical topics Learning is aided by case studies nursing insights activities and reflection enabling readers to apply theory to practice This text is particularly useful for pre and post registration student nurses qualified nursing staff and other healthcare professionals working alongside nurses to deliver care to older people The online resource centre to accompany Nursing care of older people features For students and lecturers Additional interactive case studies National policy links Website links to national older people organizations charities and support groups and links to journals on older patients in health care Audio podcasts on the nursing care of older people

**Understanding Care Homes** Katherine Froggatt, Sue Davies, Julianne Meyer, 2009 This book draws together a range of research and development initiatives that emphasise the importance of partnership working and of enabling older people and their families to maintain the highest quality of life The book investigates how research and development can be undertaken to provide better care for the resident and their family

Palliative care for older people Lieve Van den Block, Gwenda Albers, Sandra Martins Pereira, Bregje Onwuteaka-Philipsen, Roeline Pasman, Luc Deliens, 2015-05-07 Current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25 30% of people over the age of 85 will show some degree of cognitive decline Palliative care for older people A public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that as the global population ages will ever more acutely shape the decisions of policy makers and care givers The book begins by outlining the range of policies towards palliative care for older people that are found worldwide It follows this by examining an array of socio cultural issues and palliative care initiatives from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients and from the need to encourage compassion towards end of life care within communities to the development of care pathways for older people Palliative care for older people A public health

perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world The book also highlights the social cultural considerations that influence the difficult decisions that those involved in palliative care face not least patients themselves and offers examples of good practice and recommendations to inspire support and direct healthcare policy and decision making at organisational regional national and international levels Transforming Palliative Care in Nursing Homes Mercedes Bern-Klug,2010 This volume outlines the belief that nursing homes can and should support the physical psychological and social needs of residents and that residents can thrive in nursing homes when these needs are met The book s contributors explore the role that palliative or comfort care plays in enhancing the quality of life of nursing home residents as well as the medical familial psychological cultural and financial issues that influence decision making about end of life care The book is designed to be a tool to prepare social workers to advocate for a greater incorporation of palliative care and psychosocial care into the culture of nursing home care The book includes discussions of the psychosocial needs of nursing home residents and families the financing of long term care and end of life care ethical issues in chronic care and end of life trends and characteristics in nursing home care rituals and grief at end of life and considerations for the future Each chapter includes case examples to further illustrate points made **Quality of Life and Person-Centered Care for Older People** Thomas Boggatz,2019-11-15 This book explores the meaning of quality of life in care for older persons and introduces the reader to their main concerns when receiving care Based on qualitative research it pays particular attention to the needs and requirements of older people considering their individual family situations social circumstances values and lifestyles Person centred care is a way of providing nursing care that puts older people and their families at the core of all decisions seeing each person as an individual and working together to develop appropriate solutions Following an introduction to the concept of quality of life in old age the book reviews essential findings from worldwide research into the experiences of older people with regard to nursing care and the impact of these experiences on their quality of life It investigates health promotion care provided in nursing homes and assisted living facilities and palliative care Each chapter includes a brief introduction to the respective field of nursing care and the problems it has to deal with concluding with a discussion of their implications for nursing practice in the respective field of care In closing the evidence from qualitative research is discussed in relation to current gerontological theories **Oxford Textbook of Palliative Medicine** Geoffrey W. C. Hanks,2011-07-21 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care Between Remembering and Forgetting James Woodward,2010-06-10 A much needed resource for reflection on the nature of dementia particularly its spiritual dimension And The implications for Churches and other faith groups *Mental Health and Care Homes* Tom Denning,Alisoun Milne,2011-05-26 The care home sector is large with over 400 000 residents in the UK and a similar number employed within

the homes Care home residents are often very old and many have multiple physical and mental health needs meaning that their care poses particular challenges This book offers a coherent and evidence based text exploring these issues

**Innovative Nursing Care** Klavdija Čuček Trifković, Mateja Lorber, Nataša Mlinar Reljić, Gregor Štiglic, 2023-01-30

Higher life expectancy on a global level requires complex nursing care as poor education and a lack of knowledge can lead to mistakes There is a need for nurses who can provide high quality and advanced nursing practice A mix of well grounded education and innovative research is needed where the first provides an understanding of best nursing practice care delivery and the second helps nurses determine best practices and improve nursing care

**Evidence Informed Nursing with Older People** Debbie Tolson, Jo Booth, Irene Schofield, 2011-02-04 Evidence Informed Nursing with Older People is an essential text for nursing students and registered nurses working with older people who are seeking to make connections between theory evidence and value based gerontological practice The rapidly rising aging global population requires that more attention is given to the needs and requirements of older people This textbook is a key resource for nursing students and registered nurses working with older people who wish to improve their practice Evidence Informed Nursing with Older People takes a unique case study approach with individual chapters presenting nursing practice based case studies on some of the most common areas of care faced by nurses working around the world with older people Each case study illustrates the connections between practice theory evidence and values User friendly and accessible this textbook includes key points reflection activities test points and perspectives from older people throughout Key features An up to date treatment of the nursing contribution to key geriatric syndromes International expert contributions from the UK Sweden Switzerland Australia and China An evidence based case study approach to the care of older people

**Encyclopedia of Biomedical Gerontology**, 2019-11-20 Encyclopedia of Biomedical Gerontology Three Volume Set presents a wide range of topics ranging from what happens in the body during aging the reasons and mechanisms relating to those age related changes and their clinical psychological and social modulators and determinants The book covers the biological and medical aspects of gerontology within the general framework of the biological basis of assessing age biological mechanisms of aging age related changes in biological systems human age related diseases the biomedical practicality and impracticality of interventions and finally the ethics of intervention Provides a one stop resource to information written by world leading scholars in the field of biomedical gerontology Fills a critical gap of information in a field that has seen significant progress in the last 10 years

**Lessons on Aging from Three Nations** Sara Carmel, Carol A. Morse, Fernando M. Torres-Gil, Jon Hendricks, 2018-10-26

The global phenomenon of the aging of societies during a period of outstanding scientific economic and technological advancements is a blessing for humanity These fundamental changes however create new needs and problems in all areas of life often difficult to address In some countries the trend is towards compression of the period of age related morbidity fewer years of living with disabilities but the absolute numbers of elderly people living with disabilities are increasing worldwide

This book highlights a series of global threats problems and challenges in the areas of care and caregiving through the prism of three multicultural nations the United States Israel and Australia The contributors to this book experts in their fields focus on the art of caregiving at the national level including the interface between family and state responsibilities policies and practices in the provision of services and the demands for education and training as well as the problems and difficulties faced by family caregivers This is the second of two edited volumes on aging and caregiving The first Lessons on Aging from Three Nations Volume I The Art of Aging Well examines positive aspects of and successful adaptations to aging This book will be of interest to students of gerontology and geriatrics those working in nongovernmental organizations private for profit and non profit agencies including voluntary charitable and religious groups those working in national regional and local governments and all general readers intrigued with the aging of societies and longevity

**Improving the Lives of People with Dementia through Technology** Martin Orrell, Déborah Oliveira, Orla McDermott, Frans R. J. Verhey, Fania C. M.

Dassen, Rose-Marie Dröes, 2022-11-30 This book explores the practical application of recent improvements in technology for people living with dementia and highlights the positive outcomes on care quality of life and services on patients through exploration of 15 research projects to redefine the future of dementia care Using research compiled in collaboration with leading universities and organisations across Europe this book demonstrates how INDUCTION s Interdisciplinary Network for Dementia Utilising Current Technology s findings resulted in implications for practical cognitive and social factors to improve the usability of technology evaluating the effectiveness of specific contemporary technology and tracing facilitators and barriers for implementation of technology in dementia care Featuring a unique training programme along with a wide range of patient public involvement this state of the art volume will be essential reading for researchers academics and scholars in the fields of dementia and mental health research gerontology psychology and nursing

Nursing in Care Homes Linda Nazarko, 2009-02-12 Nursing in Care Homes is a practical guide for nurses of all levels working in care homes It is directly relevant to everyday practice and covers clinical issues such as continence care wound care infection control and nutrition as well as information on a wide range of issues including legal requirements care home standards and liaising with social and health care services The revised and updated second edition includes new chapters on maximising abilities risk management stroke and diabetes and calls upon the recommendations of the National Service Framework for Older People and the requirements of the Care Standards Act 2002 Concise and easy to follow Nursing in Care Homes is an essential guide to skilled professional care for all nurses in care homes It will also be invaluable to nursing students undertaking their placements in care homes

Supporting Family Carers of Older People in Europe Simona Hvalic Touzery, 2007 This report provides a comprehensive overview of the current state of care services for older people in Slovenia with emphasis on family care There are numerous services intended for old people in the country some more others less accessible and developed yet almost no support is given to family carers who still provide the bulk of care to elderly Recent socio political developments in

the country give hope that the situation and the position of family carers will improve to better Redfern's Nursing Older People Fiona M. Ross, Ruth Harris, Joanne M. Fitzpatrick, Clare Abley, 2023-04-20 Redfern's Nursing Older People provides accessible evidence based information for nurses care assistants and other health professionals wanting to improve the quality of health and social care for older people Republished for the first time since 2006 this fifth edition has been comprehensively revised and rewritten by a large team of expert contributors while preserving the person centred spirit of earlier editions It applies best evidence in straightforward and practical ways to the demographic physical psychological social and emotional challenges of ageing with a focus on supporting independence and health maintenance With new contributions covering emerging challenges such as understanding frailty and the use of digital technology and the themes of diversity service user perspectives and the impact of the COVID 19 pandemic woven throughout Redfern's Nursing Older People is essential reading to help nurses shape practice improve outcomes and promote opportunities for ageing well Written by a team of 68 specialists and experts drawn from the fields of nursing social sciences gerontology and healthcare practice Covers the latest evidence policy and nursing practice Focus on nursing led solutions for improving activities of daily living independence and preventing common problems of ageing Accessible to all with stories case studies and lived experience to bring material to life Summaries and learning points support learning around complex problems Emphasis on countering ageism using images and wider literature where appropriate All chapters either extensively rewritten or completely new New chapters on frailty the misuse of alcohol as a growing problem in old age digital technology and nursing older people with intellectual disabilities Core themes of gerontology embedded throughout such as assessment and rehabilitation Impact of COVID 19 embedded throughout
