Pan Xiii Particles And Nuclei Proceedings Of The Thirteenth International Conference:

Pan Xiii: Particles And Nuclei - Proceedings Of The Xiii International Conference Alessandro Pascolini, 1994-05-31 This international conference was dedicated to the interface between nuclear and elementary particle physics. It was the thirteenth in a series initiated by T E O Ericson, A de Shalit and V F Weisskopf at CERN in 1963. The series provides the principal international forum for the presentation and critical examination of the main results of the experimental and theoretical research in the field of interest common to nuclear and particle physics. The topics cover the energy region where nucleons must be treated as composite particles but quarks and gluons cannot be considered asymptotically free. PAN XIII reviews the status of the field in a delicate stage of transition: new experiments and instrumental facilities are bringing in more detailed and more accurate data on the various facets of the nuclear and subnuclear universe but we are still far from a satisfactory and complete description of nucleons and nuclei in terms of underlying quarks and their interactions. **Annual**

All forms of fission from spontaneous fission of ^{252}Cf to high energy fragmentation are included. Together with studies on properties of neutron rich nuclei and astrophysics, the book also features new experimental techniques, directions and the emerging new radioactive beam facilities. **High Temperature Superconductivity - Proceedings Of The Beijing International**

The present status of the physics of fission is discussed in depth and perspectives for further research are outlined.
