Benton, 2019-03-31 The Philippines series of the PALI Language Texts under the general editorship of Howard P McKaughan consists of lesson textbooks grammars and dictionaries for seven major Filipino languages     Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1973     The Evolution of Grammar Joan Bybee, Revere Perkins, William Pagliuca, 1994-11-15 Joan Bybee and her colleagues present a new theory of the evolution of grammar that links structure and meaning in a way that directly challenges most contemporary versions of generative grammar This study focuses on the use and meaning of grammatical markers of tense aspect and modality and identifies a universal set of grammatical categories The authors demonstrate that the semantic content of these categories evolves gradually and that this process of evolution is strikingly similar across unrelated languages Through a survey of seventy six languages in twenty five different phyla the authors show that the same paths of change occur universally and that movement along these paths is in one direction only This analysis reveals that lexical substance evolves into grammatical substance through various mechanisms of change such as metaphorical extension and the conventionalization of implicature Grammaticization is always accompanied by an increase in frequency of the grammatical marker providing clear evidence that language use is a major factor in the evolution of synchronic language states The Evolution of Grammar has important implications for the development of language and for the study of cognitive processes in general     **A Grammar of Madurese** William D. Davies, 2010-08-31 Madurese is a major regional language of Indonesia with some 14 million speakers mainly on the island of Madura and adjacent parts of Java making it the fourth largest language of Indonesia after Indonesian Javanese and Sundanese There is no existing comprehensive descriptive grammar of the language with existing studies being either sketches of the whole grammar or detailed descriptions of phonology and morphology or some particular topics within these components of the grammar There is no competing work that provides the breadth and depth of coverage of this grammar in particular though not exclusively with regard to syntax     **Ilokano Reference Grammar** Ernesto Constantino, 2019-03-31 The Philippines series of the PALI Language Texts under the general editorship of Howard P McKaughan consists of lesson textbooks grammars and dictionaries for seven major Filipino languages Ilokano is an Austronesian language It ranks third among the major languages of the Philippines being spoken by just over 12 percent of the population Widely spoken throughout the Philippines Ilokano is the dominant language of most of the provinces of Northern Luzon and is used as a lingua franca by

non Ilokano speakers in this area Settlers have also carried the language to Mindoro and to several areas in Mindanao The Ilokano reference grammar was developed under the auspices of the Pacific and Asian Linguistics Institute PALI of the University of Hawaii and accompanies the Ilokano dictionary by the same author as well as Ilokano Lessons by Bernabe Lapid and Sibayan This reference grammar concentrates on syntactic structures Professor Constantino cites morphological forms in depth in his dictionary Consequently the treatment here should be used in conjunction with both the dictionary and the lessons mentioned above It is the hope of the editor and author alike that this reference grammar will prove of value and interest to learners of Ilokano

**Dictionary of Languages** Andrew Dalby, 2015-10-28 Covering the political social and historical background of each language Dictionary of Languages offers a unique insight into human culture and communication Every language with official status is included as well as all those that have a written literature and 175 minor languages with special historical or anthropological interest We see how with the rapidly increasing uniformity of our culture as media's influence spreads more languages have become extinct or are under threat of extinction The text is highlighted by maps and charts of scripts while proverbs anecdotes and quotations reveal the features that make a language unique

*Word Order Universals* John A Hawkins, 2014-05-19 *Word Order Universals* [Basic Word Order \(RLE Linguistics B: Grammar\)](#) Russell S Tomlin, 2014-02-03 This book examines the frequencies of the six possible basic word or constituent orders SOV SVO VSO VOS OSV OVS provides a typologically grounded explanation for those frequencies in terms of three independent functional principles of linguistic organization From a database of nearly 1 000 languages and their basic constituent orders a sample of 400 languages was produced that is statistically representative of both the genetic and areal distributions of the world's languages This sample reveals the following relative frequencies in order from high to low of basic constituent order types 1 SOV and SVO 2 VSO 3 VOS and OVS 4 OSV It is argued that these relative frequencies can be explained to be the result of the possible interactions of three fundamental functional principles of linguistic organization Principle 1 the thematic information principle specifies that initial position is the cross linguistically favoured position for clause level thematic information Principle 2 the verb object bonding principle describes the cross linguistic tendency for a transitive verb and its object to form a more tightly integrated unit syntactically and semantically than does a transitive verb and its subject Principle 3 the animated principle describes the cross linguistic tendency for semantic arguments which are either more animate or more agentive to occur earlier in the clause Each principle is motivated independently of the others drawing on cross linguistic data from more than 80 genetically and typologically diverse languages Given these three independently motivated functional principles it is argued that the relative frequency of basic constituent order types is due to the tendency for the three principles to be maximally realized in the world's languages SOV and SVO languages are typologically most frequent because such basic orders reflect all three principles The remaining orders occur less frequently because they reflect fewer of the principles The 1 000 language database and the genetic and areal classification frames are

*Nominalization in Western Austronesian* Maria Bardají, 2024-10-07 This book explores nominalization processes in Totoli Sulawesi Indonesia within the context of western Austronesian symmetrical voice languages The main focus is on lexical nominalizations especially on action nominal constructions derived with pV pVN pVg and kV By means of corpus data the book provides a characterization of the form and the functions of these constructions and their hybrid nominal and verbal nature It then investigates the role of nominalization and subordination in information packaging using the concept of at-issueness Finally it provides a systematic survey of nominalization constructions in 67 western Austronesian symmetrical voice languages      **Demonstratives** Holger Diessel, 1999-12-15 All languages have demonstratives but their form meaning and use vary tremendously across the languages of the world This book presents the first large scale analysis of demonstratives from a cross linguistic and diachronic perspective It is based on a representative sample of 85 languages The first part of the book analyzes demonstratives from a synchronic point of view examining their morphological structures semantic features syntactic functions and pragmatic uses in spoken and written discourse The second part concentrates on diachronic issues in particular on the development of demonstratives into grammatical markers Across languages demonstratives provide a frequent historical source for definite articles relative and third person pronouns nonverbal copulas sentence connectives directional preverbs focus markers expletives and many other grammatical markers The book describes the different mechanisms by which demonstratives grammaticalize and argues that the evolution of grammatical markers from demonstratives is crucially distinct from other cases of grammaticalization      **Historical Linguistics 2019** Bethwyn Evans, Maria Kristina Gallego, Luisa Miceli, 2024-11-15 This volume comprises a selection of papers that were presented at the 24th International Conference on Historical Linguistics ICHL24 which took place at the Australian National University ANU in Canberra from 1-5 July 2019 The volume's aim is to reflect the breadth of research presented at the conference with each chapter representative of a workshop or themed session A striking aspect of ICHL24 was the three day workshop on

computational and quantitative approaches to historical linguistics and two of the chapters represent different aspects of this workshop A number of chapters present research that explores mechanisms and processes of change within specific domains of language while others explore interactions of change across linguistic domains Two chapters represent a common theme at the conference and consider the role of historical linguistics in explaining non linguistic histories of language diversification

*Causatives and Causation* Jae Jung Song,2014-06-11 Causatives and Causation is the first comprehensive study of causative constructions found in the world s languages This important new research based on a data base of more than 600 languages not only investigates fully the richness and variety of causative types but also presents an alternative perspective to the traditional typological approach The new typology enables a better understanding of how the human mind cognizes causation and how this is reflected in language Causatives and Causation is also an important attempt to integrate language typology with diachrony by constructing a diachronic model of causative affixes on the basis of this new typology Drawing on the theoretical insight of Role and Reference Grammar this book provides a case study of the causative constructions in Korean providing additional support for both the proposed new typology and the diachronic model It also examines the pragmatic foundations of causatives an important but previously unexplored area of study

**Modality and Structure in Signed and Spoken Languages** Texas Linguistics Society. Conference,2002-10-24 Publisher Description **Optimality Theory** Rene Kager,1999-06-28 This is an introduction to Optimality Theory whose central idea is that surface forms of language reflect resolutions of conflicts between competing constraints A surface form is optimal if it incurs the least serious violations of a set of constraints taking into account their hierarchical ranking Languages differ in the ranking of constraints and any violations must be minimal The book does not limit its empirical scope to phonological phenomena but also contains chapters on the learnability of OT grammars OT s implications for syntax and other issues such as opacity It also reviews in detail a selection of the considerable research output which OT has already produced Exercises accompany chapters 1 7 and there are sections on further reading Optimality Theory will be welcomed by any linguist with a basic knowledge of derivational Generative Phonology

**Approaches to Grammaticalization** Elizabeth Closs Traugott,Bernd Heine,1991-01-01 The study of grammaticalization raises a number of fundamental theoretical issues pertaining to the

relation of langue and parole creativity and automatic coding synchrony and diachrony categoriality and continua typological characteristics and language specific forms etc and therefore challenges some of the basic tenets of twentieth century linguistics This two volume work presents a number of diverse theoretical viewpoints on grammaticalization and gives insights into the genesis development and organization of grammatical categories in a number of language world wide with particular attention to morphosyntactic and semantic pragmatic issues The papers in Volume I are divided into two sections the first concerned with general method and the second with issues of directionality Those in Volume II are divided into five sections verbal structure argument structure subordination modality and multiple paths of grammaticalization
