Greist, James W. Jefferson, 2001-09 A patient guide book on the diagnosis and treatment of panic disorder and agoraphobia *Anxiety* Bozzano Luisa, 2013-10-22 This volume analyses the perplexing and often disabling form of distress known as anxiety from a psychological rather than a biomedical perspective illustrating the rich contribution that psychological theory has made and is making to this topic The first section extensively examines the clinical literature describing and delineating with case examples the cluster of characteristic features termed panic anxiety Research findings in other clinical areas such as alcohol dependence are shown to have conceptual and empirical links with panic anxiety The second section of the book reviews and evaluates the main theoretical approaches to anxiety including specific models of panic and agoraphobia challenging many traditional assumptions and advocating the analysis of anxiety as a socially constructed meaning imposed on experience rather than a theoretical concept or psychopathological state The methodological implications are discussed and a schematic model of panic anxiety is proposed The theoretical integration represents a major contribution to the resurgence of interest in this field and will be of relevance to all researchers and postgraduate students within the mental health professions FROM THE PREFACE This book has two main objectives The first is to describe a dimension of psychological distress I have called panic anxiety This takes up the first part of the book which surveys literature that is primarily descriptive and psychiatric The second objective is pursued in the second part of the book in which I examine a large number of theories of anxiety to see what they might have to offer in explaining the panic anxiety cluster of complaints I am therefore concerned to apply psychological theory to a real world problem that is to what people who seek professional help loosely describe as panic

anxiety and fears of public situations The theoretical and experimental literature on anxiety is so vast that I have had to be disciplined and in no small measure prejudiced in favour of a particular theoretical perspective I have attempted as far as possible to treat anxiety as a lay construct that is as a social construction and not a scientific concept For this reason I have endeavoured to refer to reports of anxiety or to complaints of anxiety in order to avoid the common tendency to reify anxiety as an entity which exists independently of the social origins of the term Accordingly I believe that the relevant question to ask is not What is anxiety but What are the antecedents of reports or complaints of anxiety It is intended that this book should provide a coherent perspective on a common form of psychological distress of value to therapists researchers and students of abnormal psychology In many ways the problems for which people seek help do not define natural areas of scientific research and so it is difficult to combine theoretical and practical interests in one book The complaints with which I am particularly concerned panic and fears of public places can be analysed to reveal scientific questions which have a significance much wider than the explanation of particular complaints made to professionals working in a clinical context Apart from its obvious social significance a clinical area is therefore simply a point of departure for scientific investigation My intention then is to use this clinical area as an illustration of how such problems might be tackled from a theoretical perspective which is essentially psychological The theoretical position I have adopted owes much to the views of Sarbin 1964 1968 Mandler 1975 and Averill 1980a b In taking anxiety to be a lay construct I assume that the What is questions rightly belong to the sociology of knowledge Of course the applied psychologist also has substantive issues to consider Panic Disorder and Agoraphobia John R. Walker, G. Ron Norton, Colin A. Ross, 1991-01-01 Anxiety Disorders Comorbid with Depression: Pocketbook Spiliotis Argyropoulos, Adrian Feeney, David Nutt, 2001-11-01 In clinical practice complex patients with comorbidity of mood and anxiety disorders are arguably the norm These volumes focus on this area providing up to date reviews of the conceptual issues that confront the clinician when evaluating these patients Concise and easy to read they also present a practical approach to the management and treatment of patients with comorbid mood and anxiety disorders
