City of Gary, Indiana**, 1973 **The City Club Bulletin**, 1916 *The City as Target* Ryan Bishop, Gregory Clancey, John W. Phillips, 2012-03-29 Bringing together scholars from a diverse range of disciplines *The City as Target* provides a sustained and critical response to the relationship between the concept of targeting in its many forms and notions of understanding imagining and shaping the urban Among the many spatial and graphic terms used to describe cities in urban studies the word target is rarely encountered Though equally spatial it differs from these others by implying some motive force and more than that a force with some intentionality To target is to aim to project and ultimately to impact It suggests a space of violence or at least action or movement resulting in displacement which most other terms do not In that sense it is useful underused and perhaps revelatory Rather than approach the city as simply a site of growth processes and developments the contributors to this volume treat it as the recipient of attentions The work draws on a wide variety of geographical sites and historic monuments in order to explore this concept examining and challenging current urban theories It seeks to highlight both the power of The Global City and the current vulnerability and fragility of urban culture exploring the city as a recipient and a culprit in relation to issues including terrorism and urban warfare the latest cyclical failure of global financial markets and the relatively new spectre of environmental unsustainability Offering a unique and relevant contribution to the literature this work will be of great interest to scholars of urban theory international relations postcolonial politics and military studies **The Management of a City School** Arthur Cecil Perry, 1908 **Supreme Court, City and County of New York**, 1880 Environmental History of Water Petri S. Juuti, Tapio Katko, H. Vuorinen, 2007-02-01 The World Water Development Report 2003 pointed out the extensive problem that Sadly the tragedy of the water crisis is not simply a result of lack of water but is essentially one of poor water governance Cross sectional and historical intra national and international comparisons have been recognized as a valuable method of study in different sectors of human life including technologies and governance *Environmental History of Water* fills this gap with its main focus being on water and sanitation services and their evolution Altogether 34 authors have written 30 chapters for this multidisciplinary book which divides into four chronological parts from ancient cultures to the challenges of the 21st century each with its introduction and conclusions written by the editors The authors represent such disciplines as history of technology history of public health public policy development studies sociology engineering and management sciences This book emphasizes that the history of water and sanitation services is strongly linked to current water management and policy issues as well as future implications Geographically the book consists of local cases from all inhabited continents The key

penetrating themes of the book include especially population growth health water consumption technological choices and governance There is great need for general long term analysis at the global level Lessons learned from earlier societies help us to understand the present crisis and challenges This new book Environmental History of Water provides this analysis by studying these lessons Report of the Board of Education of the City of Waterbury Waterbury (Conn.).
