## **Panpsychism And The Religious Attitude:**

**Panpsychism and the Religious Attitude** D. S. Clarke, 2012-02-01 Human beings have thoughts sensations and feelings and think that at least some of this mental life is shared with domestic and wild animals But are there reduced degrees of mentality found in mosquitoes bacteria and even more primitive natural bodies Panpsychists think so and have defended this belief throughout the history of philosophy beginning with the ancient Greeks and continuing into the present In this bold challenging book D S Clarke outlines reasons for accepting panpsychism and defends the doctrine against its critics He proposes it as an alternative to the mechanistic materialism and humanism that dominate present day philosophy

Panpsychism and the Religious Attitude D. S. Clarke, 2003-02-27 Defends panpsychism the view that mentality is present in all natural bodies with unified and persisting organization *Naturalizing God?* Mikael Leidenhag, 2021-07-01 Can nature be considered a religious object Religious naturalists answer yes as they seek to carve out a middle path between supernaturalism and atheistic secularism In this book Mikael Leidenhag critically examines the religious proposals philosophical commitments and ecological ambitions of key religious naturalists including Willem B Drees Charley D Hardwick Donald Crosby Ursula Goodenough Stuart Kauffman Gordon Kaufman Karl Peters and Loyal Rue Leidenhag argues that contemporary religious naturalism faces several problems both with regard to its understanding of naturalism and the ways in which it seeks to uphold a religious conception of reality He evaluates possible routes for moving forward considering naturalistic and theistic proposals He also analyzes the philosophical thesis of panpsychism the idea that mind is a pervasive feature of the universe and reaches down to the fundamental levels of reality The author concludes that panpsychism offers the most promising framework against which to understand the metaphysics and eco ethical ambitions of religious naturalism Process Approaches to Consciousness in Psychology, Neuroscience, and Philosophy of Mind Michel Weber, Anderson Weekes, 2009-11-18 This collection opens a dialogue between process philosophy and contemporary consciousness studies Approaching consciousness from diverse disciplinary perspectives philosophy psychology neuroscience neuropathology psychotherapy biology animal ethology and physics the contributors offer empirical and philosophical support for a model of consciousness inspired by the process philosophy of Alfred North Whitehead 1861 1947 Whitehead s model is developed in ways he could not have anticipated to show how it can advance current debates beyond well known sticking points This has trenchant consequences for epistemology and suggests fresh and promising new perspectives on such topics as the mind body problem the neurobiology of consciousness animal consciousness the evolution of consciousness panpsychism the unity of consciousness epiphenomenalism free will and causation Cosmopsychism and Original Sin Harvey Cawdron, 2025-09-18 Cawdron s book explores the applications of cosmopsychism the idea that the universe is conscious to contemporary discussions of original sin in Christian analytic theology There are two issues in the scholarship of original sin that the book focuses on The first is the transmission issue which explains how original sin is transmitted

between humans The second is the apparent tension between original sin and moral responsibility In doctrines that include original guilt where later humans are considered guilty for the first sin one has trouble with moral responsibility because later humans cannot have prevented something that happened before they were born This problem also impacts doctrines that do not include original guilt as one has to explain how people can be guilty for sinful acts if original sin makes the performance of these acts inevitable Cawdron argues that cosmopsychism can help us resolve both of these issues suggesting that the placing of consciousness at the fundamental level in cosmopsychism and the fact that the cosmic subject must individuate or de combine to form other subjects can provide us with a useful understanding of the transmission of original sin Cawdron also uses cosmopsychism to develop two models of original sin one including the doctrine of original guilt and another that does not to address tensions between the doctrine and moral responsibility

Systematic Atheology John R. Shook, 2017-12-01 Atheology is the intellectual effort to understand atheism defend the reasonableness of unbelief and support nonbelievers in their encounters with religion This book presents a historical overview of the development of atheology from ancient thought to the present day It offers in depth examinations of four distinctive schools of atheological thought rationalist atheology scientific atheology moral atheology and civic atheology John R Shook shows how a familiarity with atheology s complex histories forms and strategies illuminates the contentious features of today s atheist and secularist movements which are just as capable of contesting each other as opposing religion The result is a book that provides a disciplined and philosophically rigorous examination of atheism s intellectual strategies for reasoning with theology Systematic Atheology is an important contribution to the philosophy of religion religious studies secular studies and the sociology and psychology of nonreligion

*The Quantum of Explanation* Randall E. Auxier, Gary L. Herstein, 2017-03-31 The Quantum of Explanation advances a bold new theory of how explanation ought to be understood in philosophical and cosmological inquiries Using a complete interpretation of Alfred North Whitehead s philosophical and mathematical writings and an interpretive structure that is essentially new Auxier and Herstein argue that Whitehead has never been properly understood nor has the depth and breadth of his contribution to the human search for knowledge been assimilated by his successors This important book effectively applies Whitehead s philosophy to problems in the interpretation of science empirical knowledge and nature It develops a new account of philosophical naturalism that will contribute to the current naturalism debate in both Analytic and Continental philosophy Auxier and Herstein also draw attention to some of the most important differences between the process theology tradition and Whitehead s thought arguing in favor of a Whiteheadian naturalism that is more or less independent of theological concerns This book offers a clear and comprehensive introduction to Whitehead s philosophy and is an essential resource for students and scholars interested in American philosophy the philosophy of mathematics and physics and issues associated with naturalism explanation and radical empiricism

**Mind, Quantum, and Free Will** Peter Ells, 2022-12-09 The mind body problem is the ultimate intractable enigma How can we

being complex physical systems have multicoloured experiences and make conscious choices This book proposes that all fundamental constituents of the universe are agents which perceive one another and freely act according to their percepts Contemporary science can be explained in entirely mentalistic terms This is consistent with many interpretations of quantum mechanics such as GRW and Roger Penrose's OR theory

**Creativity and Its Discontents** Alan Wyk, Michel Weber, 2013-05-02 I do not expect a good reception from professional philosophers wrote Whitehead in 1929 immediately after the publication of *Process and Reality* Indeed it took nearly thirty years before scholars seriously started to try to decipher the book taken as a whole And there remains today professional Whiteheadians who claim that this work can or even should be bracketed by anyone wishing to get a clear picture of Whitehead's true speculative agenda *Creativity and Its Discontents* aims to provide evidence of the conditions for this state of affairs by gathering and contextualizing all the major reviews translated where need be of *Process and Reality* its original 1929 edition its various translations some of them still ongoing and its 1978 corrected edition It is designed as the ideal tool to accompany the recently published *Handbook of Whiteheadian Process Thought*

**Weltanschauung and Apologia** Elias Hofer, 2022-10-11 This book allows us to accompany C S Lewis on his intellectual and spiritual journey from atheism to pantheism and eventually to Christianity It analyzes key elements of Lewis's Christian worldview and identifies challenges leveled against it from alternative worldviews It examines Lewis's apologetic methodology highlighting how it was shaped by his worldview and provides an analysis of Lewis's specific responses to a number of objections The project also serves as a comparative analysis of worldviews particularly as they relate to truth claims of the Christian faith The notion of worldview is critical to the formulation of views One's worldview determines how reality is perceived It's characterized as a set of glasses through which we view our surroundings and interpret experiences It accounts for the perspective we bring to every event in life and helps explain why different people see things differently when looking at the same data The same evidence may lead one person to reject a particular conclusion while moving another to embrace what the other rejected Lewis's major works are explored at length in this book Although much has been written about Lewis Hofer's examination of the influence of worldview on his work is unique

**Groundwork for a New Kind of African Metaphysics** Aribiah David Attoe, 2022-01-05 It is not far fetched to say that much of what is termed African metaphysics remains a traditional affair without the sort of critical analysis that sheds away the burden of myths and ethnocentric rigidity African ideas about the nature of being God causality death etc have largely remained the same and unchallenged mainly due to the hesitancy of some African scholars to question these suppositions or build beyond them In this book Aribiah David Attoe presents a unified African metaphysics that first interrogates important notions held by many traditional African thinkers and then builds upon them to propose a largely materialistic account of African metaphysics The book reimagines and reconstructs the idea of God being causality and death in African metaphysics tackling some of the problems associated with these concepts in African thought It also opens

up new vistas of thought while engaging and encouraging African metaphysicians to explore a previously ignored perspective

New Conversations on the Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah

Egbai, Samuel T. Segun, Aribiah D. Attoe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy. Inside three scholars offer approaches to the problems of identity, consciousness and the mind. In the process they open new vistas for thought and raise fresh controversies to some of the oldest problems in philosophy. The first chapter focuses on the identity problem. The author employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable perceptible aspect of the human person. The next chapter explores the problem of consciousness. It deploys the new concept equiphénoménalism as a model to show that mental properties are not by-products but necessary products of consciousness. Herein the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible. The last chapter addresses the mind-body problem. It adopts the new concept proto-phenomenalism as an alternative explanatory model. This model eliminates the idea of a mind. As such it approaches the mind-body problem from a materialistic point of view with many implications such as the meaninglessness of our existence, the possibility of thought engineering as well as religious implications.

#### **Handbook of Whiteheadian Process Thought**

Michel Weber, 2013-04-30 Gathering 115 entries written by 101 internationally renowned experts in their fields, the Handbook of Whiteheadian Process Thought aims at canvassing the current state of knowledge in Whiteheadian scholarship and at identifying promising directions for future investigations through internal cross-elucidation and external interdisciplinary development. Two kinds of entries are weaved together in order to interpret Whitehead *secundum* Whitehead and to read him from the vantage point of interdisciplinary and crossdisciplinary research. The thematic entries provide i) a broad contextualisation of the issue at stake ii) a focus on Whitehead's treatment if any or of a possible Whiteheadian treatment of the issue iii) a history of relevant scholarship iv) a personal assessment by the Author. The biographical entries provide i) a brief *vita* of the targeted thinker ii) a sketch of his/her categories relevant to the Whiteheadian scholarship iii) a personal assessment of the actual or possible Whiteheadian semantic transfer to or from the thinker.

**From Literature to Biterature** Peter Swirski, 2013-10-01 From Literature to Biterature is based on the premise that in the foreseeable future computers will become capable of creating works of literature. Among hundreds of other questions it considers: Under which conditions would machines become capable of creative writing? Given that computer evolution will exceed the pace of natural evolution a million fold, what will such a state of affairs entail in terms of art, culture, social life and even nonhuman rights? Drawing a map of impending literary, cultural, social and technological revolutions, Peter Swirski boldly assumes that computers will leap from mere syntax-driven processing to semantically rich understanding. He argues that acknowledging biterature as a species of literature will involve adopting the same range of attitudes to computer authors.

computers as to human ones and that it will be necessary to approach them as agents with internal states and creative intentions Ranging from the metafiction of Stanislaw Lem to the Turing test familiar to scientists working in Artificial Intelligence and the philosophers of mind to the evolutionary trends of culture and machines Swirski's scenarios lay the groundwork for a new area of study on the cusp of literary futurology evolutionary cognition and philosophy of the future

**Neuromatic** John Lardas Modern,2021-10-07 John Lardas Modern offers a powerful and original critique of neurology's pivotal role in religious history In *Neuromatic* religious studies scholar John Lardas Modern offers a sprawling examination of the history of the cognitive revolution and current attempts to locate all that is human in the brain including spirituality itself *Neuromatic* is a wildly original take on the entangled histories of science and religion that lie behind our brain laden present from eighteenth century revivals to the origins of neurology and mystic visions of mental piety in the nineteenth century from cyberneticians Scientologists and parapsychologists in the twentieth century to contemporary claims to have discovered the neural correlates of religion What Modern reveals via this grand tour is that our ostensibly secular turn to the brain is bound up at every turn with the religion it discounts ignores or actively dismisses In foregrounding the myths ritual schemes and cosmic concerns that have accompanied idealizations of neural networks and inquiries into their structure *Neuromatic* takes the reader on a dazzling and disturbing ride through the history of our strange subservience to the brain **Panpsychism**

D. S. Clarke,2004-08-03 An anthology of readings in panpsychism spanning two millennia *Susanne Langer in Focus*

Robert E. Innis,2009 A thorough account of Langer's philosophical career *Reasonable Faith for a Post-Secular Age*

William Greenway,2020-12-16 Our global community desperately needs overt awakening to an age of reason and faith *Reasonable Faith for a Post Secular Age* meets this need by interpreting faith not in terms of belief in propositions but in terms of living surrender to having been seized by agape for every face including one's own Virtually all faith traditions from Buddhism to Humanism to Wiccan are rooted in agape and therefore share considerable spiritual and ethical common ground a truth long veiled In contrast to ethically feckless secular rationality over which a devastating global social Darwinism currently runs roughshod faith qua living surrender to agape grounds moral realism awakens us to love for all creatures and inspires struggles for justice Inspired by the philosophy of Emmanuel Levinas and Christian spirituality Greenway engages on the one hand intellectuals like Stanley Hauerwas Richard Rorty Gayatri Chakravorty Spivak Jeffery Stout Charles Taylor and Bernard Williams and on the other contemporary debates over consciousness free will evil and metaethics He details the character of secular rationality's devastating scission from moral reality and clarifies the promise of understanding faith and spirituality in terms of agape **The God of Metaphysics** T. L. S. Sprigge,2006-04-20 Publisher Description **'The Trail of the Human Serpent Is Over Everything'** Sami Pihlström,2008 This book takes a fresh look at how William James 1842 1910 conceptions of the human mind death mortality and immortality and religion provide us with a viable alternative to many contemporary philosophical approaches The distinctive Jamesian perspective is illuminated through critical discussions

of several different theories and conjectures The overall argument of this volume is that pragmatist metaphysics philosophy of mind and philosophy of religion must be subordinated to ethics To provide an historical and philosophical context for this revolutionary conception of the pragmatic method an introductory discussion of James views on pragmatism realism and truth is also included Instead of focusing on the general issues of realism and pragmatism however the volume examines the applications of these issues to topics such as death evil and other minds The book is vital reading not only for James scholars and pragmatists but for anyone thinking seriously about human mortality and the endless ethical challenges our life with other human beings that confront us
