*Linguistics across Historical and Geographical Boundaries* Dieter Kastovsky, Aleksander Szwedek, 2011-06-03 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.      **Papers in contrastive linguistics and language testing** Stig Johansson,1975      Corpus-based Approaches to Contrastive Linguistics and Translation Studies ,2021-08-04

Corpus based Approaches to Contrastive Linguistics and Translation Studies presents readers with up to date research in corpus based contrastive linguistics and translation studies showing the high degree of complementarity between the two fields in terms of research methodology interests and objectives. Offering theoretical descriptive and applied perspectives the articles show how translation and contrastive approaches to grammar lexis and discourse can be harmoniously combined through the use of monolingual bilingual and multilingual corpora and how contrastive information needs to inform translation research and vice versa. The notion of contrastive linguistics adopted here is broad thus alongside comparisons of Malay English idioms and the French imparfait and its English equivalents there are articles comparing different varieties of French and sign language with spoken language. This collection should be of interest to researchers in corpus linguistics contrastive linguistics and translation studies. In addition the section on corpus based teaching applications will be of great value to teachers of translation and contrastive linguistics.      **Time Works Wonders** Tomasz P. Krzeszowski,2013 The volume consists of reprints of papers originally published between 1967 and 2009. Terms like congruence equivalence and tertium comparationis as well as fundamental principles of classical structural contrastive studies are defined. The study also contains articles which lay foundations of cognitively based contrastive studies.      Papers and Studies in Contrastive Linguistics ,1999 Vol 1 contains papers delivered at the 2d Karpacz Conference on Contrastive Linguistics 1971      **Resources in**

Butler,María de los Ángeles Gómez González,Susana M. Doval-Suárez,2005-09-22 This book brings together a collection of articles characterized by two main themes the contrastive study of parallel phenomena in two or more languages and an essentially functional approach in which language is regarded first and foremost as a rich and complex communication system inextricably embedded in sociocultural and psychological contexts of use The majority of the studies reported is empirical in nature many making use of corpora or other textual materials in the language s under investigation The book begins with an introductory section in which the editors provide surveys of the state of the art in both functional and contrastive linguistics The other five sections of the volume are devoted to i a cognitive perspective on form and function ii information structure iii collocations and formulaic language iv language learning and v discourse and culture      **Corpus Studies in Contrastive Linguistics** Stefania Marzo,Kris Heylen,Gert De Sutter,2012 Contrastive Linguistics like other linguistic disciplines is becoming more and more data oriented relying increasingly on the statistical analysis of corpus data to reveal and investigate the similarities and dissimilarities between languages This title illustrates this trend with a representative sample of contrastive linguistic case studies      **Handbook of Pragmatics** Jef Verschueren,Jan-Ola Östman,2022-08-15 The Manual section of the Handbook of Pragmatics produced under the auspices of the International Pragmatics Association IPrA is a collection of articles describing traditions methods and notational systems relevant to the field of linguistic pragmatics the main body of the Handbook contains all topical articles The first edition of the Manual was published in 1995 This second edition includes a large number of new traditions and methods articles from the 24 annual installments of the Handbook that have been published so far It also includes revised versions of some of the entries in the first edition In addition a cumulative index provides cross references to related topical entries in the annual installments of the Handbook and the Handbook of Pragmatics Online at <https://benjamins.com/online/hop> which continues to be updated and expanded This second edition of the Manual is intended to facilitate access to the most comprehensive resource available today for any scholar interested in pragmatics as defined by the International Pragmatics Association the science of language use in its widest interdisciplinary sense as a functional i e cognitive social and cultural perspective on language and communication      **Theoretical Issues in Contrastive Linguistics** Jacek Fisiak,1980 Contrastive Linguistics roughly defined as a subdiscipline of linguistics which is concerned with the comparison of two or more subsystems of languages has

long been associated primarily with language teaching Apart from this applied aspect however it also has a strong theoretical purpose contributing to our understanding of language typology and language universals Issues in theoretical CL which also feature in this volume are the choice of model the notions of equivalence and contrast and directionality of descriptions Languages used for illustration in this volume include English German Danish and Polish Papers and studies in contrastive linguistics ,1976 **Cross-linguistic Correspondences** Thomas Egan,Hildegunn Dirdal,2017-11-15 Contrastive Linguistics is an expanding field as witnessed by the publication in recent years of an increasing number of monographs collected volumes and journal articles The present volume which comprises an introduction and ten chapters dealing with lexical contrasts between English and other languages shows advances within the well established lexical work in the field Each of the chapters takes lexical items as its starting point and compares English with one or more languages The languages represented are Spanish Lithuanian Swedish German Norwegian and Czech Furthermore they emphasise the link between lexis and grammar not only within the same language but also across languages Finally several studies represent one of the more recent developments of contrastive linguistics namely a growing focus on genre and register comparisons The book should appeal to both established scholars and advanced students with an interest in lexis genre corpus linguistics and or contrastive linguistics **Papers and Studies in Contrastive Linguistics.
